Print Name: David Wilson Date of Request: 6-22-11

ID #: 2-748 Date of Birth: 3-7-84 Housing Location: I-15

Nature of problem or request: I need to see a specialist to determine if I should wear sunglasses or not to keep me from getting migraines and stop the pressure and sharp pain in my left eye. When I'm outside in the bright light, I have a pair of sunglasses that I wear. I consent to be treated by health staff for the condition described outside right now and I need a profile to be able to continue to wear them. When I wear them I don't have any problems with pressure or sharp pain in my left eye and I don't get migraines. If I'm unable to continue to wear the sunglasses I won't be able to do outdoor exercise.

I am David Wilson

ID #: Z-748 Date of Birth: 3-7-84 Housing Location: I-15

Nature of problem or request: I need to see a specialist to determine whether I need to wear sunglasses. I've asked for a profile to wear sunglasses on numerous occasions. And all I've gotten from Dr Bradford is your medical not needed and from Dr Barber is No. I need to see

I consent to be treated by health staff for the condition described. somebody who has more than general knowledge when I go outside I will get migraines due to it being really bright outside. My left eye will get a sharp pain and what feels like pressure and after a while my whole head will start hurting. It gets to the point where the only thing I can do is lay down. I need the profile in order to be able to keep the sunglasses I wear outside without them. I will be unable to go outside to exercise.

ID #: Z-748 Date of Birth: 3-7-84 Housing Location: I-15

Nature of problem or request: I need to see a specialist to determine whether or not I need to wear sunglasses when I go outside because when I don't wear sunglasses outside I will get migraines. I've had problems with head aches since middle school and since then it has gotten worse I started getting  
 I consent to be treated by health staff for the condition described, migraines all the time. I started wearing sunglasses in 2002. I've tried 7 times with Dr Barber and 4 times with Dr Bradford to get a profile to wear sunglasses and there both ignoring ~~the~~ the fact that I should wear sunglasses and stop the migraines from recurring and keep them from getting worse. I've asked for the David Wilson SIGNATURE  
 Profile because it's cheaper. without the profile won't be able to go outside if my sunglasses are taken away from me. when I get migraines I start ~~behind~~ behind my left eye with a sharp pain and pressure and the spreads to the rest of my head.

Inmate Name Wilson David ID# 2748 Date 6/26/10

"I get HA from bright light" "I had some sunglasses for 2 years but  
Subjective: Doc took them away from me" "can I have some order"

This 26 year old  Male  Female  
Presents with a chief complaint of HA R IT the sun/Bright light  
Date of onset: 2003  
Previous history?  Yes  No If yes explain wore sunglasses  
C/O headache?  Yes  No If yes any change in frequency, duration or severity compared to previous headaches?  
 Yes  No If yes explain migran HA + migraine  
Previous treatment?  Yes  No If yes explain \_\_\_\_\_  
Result of an injury?  Yes  No If yes explain \_\_\_\_\_

Associated complaints of:  
Pain:  Yes  No Burning:  Yes  No Itching:  Yes  No Blurred vision:  Yes  No  
Vertigo / dizziness:  Yes  No Other  Yes  No Explain any Yes responses:

Objective: 128 / 96 T 98.6 P 74 R 18 029706 wt 237  
Vital Signs BP \_\_\_\_\_ T \_\_\_\_\_ P \_\_\_\_\_ R \_\_\_\_\_

Eye  Not applicable to complaint  
Vision change?  Yes  No If yes explain \_\_\_\_\_  
Foreign body?  Yes  No If yes explain \_\_\_\_\_  
Conjunctiva normal  Yes  No If yes explain \_\_\_\_\_  
PERLA WNL  Yes  No If yes explain \_\_\_\_\_  
Sclera normal  Yes  No If yes explain \_\_\_\_\_  
Visual acuity: Pre-treatment RT N/A LT \_\_\_\_\_ Post-treatment RT \_\_\_\_\_ LT \_\_\_\_\_

Ear  Not applicable to complaint  
Both external ears normal  Yes  No Both ear canals normal  Yes  No  
Both tympanic membranes Visualize  Yes  No Erythema  Yes  No Bulging  Yes  No  
Able to hear fingers rubbed together or watch ticking  Yes  No  
Explain any abnormal \_\_\_\_\_

Nose  Not applicable to complaint  
Active bleeding  Yes  No Signs of trauma  Yes  No

Throat  Not applicable to complaint  
Enlarged tonsils  Yes  No Inflamed, red throat  Yes  No Exudate  Yes  No

Mouth  Not applicable to complaint  
Swollen gums  Yes  No Broken tooth / teeth  Yes  No Signs of trauma  Yes  No  
Condition of teeth  poor  fair  good

Cervical Lymph Nodes  Not applicable to complaint  
Enlarged  Yes  No Tender  Yes  No

Nursing Protocols 2008

Minor HEENT Problems

~~CONFIDENTIAL & PRIVILEGED~~

Assessment (Check applicable boxes)

- Alteration in comfort     Potential for altered sensory perception

Related to

- Earache     Excess ear wax     Headache     Dental pain  
 Nosebleed     Sore throat     Eye injury or problem

Plan (Check applicable boxes)

- Physician contacted for same for same day treatment and orders
- Referred to Physician/Mid-level due to:
- Mechanism of injury suggesting additional trauma     Condition not responding to protocol  
 Impaired eye status     Impaired ear status     Signs of infection
- Referred to dentist due to
- Dental pain/problem

The following nursing interventions were completed (Check applicable boxes)

- Medication allergies and other contraindications to medications reviewed & pregnancy ruled out prior to treatment
- OTC ear wax softener instilled in \_\_\_\_\_ ear(s)
- OTC ear wax softener issued to inmate with instructions for use
- Ear irrigation completed
- Inmate to return in \_\_\_\_\_ days for ear irrigation
- Eyes flushed with \_\_\_\_\_ X \_\_\_\_\_ minutes
- Foreign body removed
- Eye patch applied/ issued
- Acetaminophen 325mg \_\_\_\_\_ tabs \_\_\_\_\_ times/day for \_\_\_\_\_ days  Issued \_\_\_\_\_ tabs for KOP
- Ibuprofen 200mg \_\_\_\_\_ tabs \_\_\_\_\_ times/day for \_\_\_\_\_ days  Issued \_\_\_\_\_ tabs for KOP
- Aspirin 325mg \_\_\_\_\_ tabs \_\_\_\_\_ times/day for \_\_\_\_\_ days  Issued \_\_\_\_\_ tabs for KOP
- Carbamide Peroxide (Debrox)  
 15ml bottle \_\_\_\_\_ drops \_\_\_\_\_ Ear \_\_\_\_\_ times/day for \_\_\_\_\_ days  Issued \_\_\_\_\_ bottle for KOP
- Throat Lozenges take \_\_\_\_\_ tabs, q 2 hrs, for \_\_\_\_\_ days  issued \_\_\_\_\_ tabs for KOP
- Education: Patient education provided
- Activity restriction:     Not indicated     Yes x \_\_\_\_\_ days and security notified

Follow up:

- Return to clinic in \_\_\_\_\_ days for ear irrigation
- Sick call if signs and symptoms of infection develop or symptoms do not subside
- Physician/Midlevel referral if indicated

Additional Comments *Pt wants sunglasses for eyes. He stated he was sensitive to light which causes HIA. He takes*

**VISION SAFETY NOTICE:**

Your lenses meet or exceed American National Standard Z80.1 and FDA requirement 21CFR Sec 801.410 for impact resistance but are not unbreakable or shatterproof. Of all the materials that lenses can be made from polycarbonate is the most impact resistant.

- If struck with sufficient force, the lenses can break into sharp pieces that can cause serious injury to the eye, or blindness. Even if the lenses do not break, the force of impact may cause the lenses or spectacle frame to contact the eye or surrounding area causing injury.

- The continued impact resistance of your lenses depends on how well you protect them from physical shocks and abuse. For your own protection, scratched or pitted lenses should be replaced immediately.

- If your occupational or recreational activities expose you to the risk of flying objects or physical impacts, your eye safety requires special safety spectacles with safety lenses, side shields, goggles and/or a full face shield.

4 THE COURT: Good morning. We're here on the  
5 matter of Doyle Hamm vs. Jefferson Dunn, Commissioner of the  
6 Alabama Department of Corrections.

7 As you know, Mr. Hamm has filed an amended  
8 complaint seeking preliminary injunctive relief as to the  
9 manner of the execution that has been set for February 22nd.  
10 His complaint is the kind that's referred to as an  
11 as-applied challenge to the method of execution.

12 Preliminarily, we have to address the defendant's  
13 motion to dismiss or alternatively for summary judgment  
14 because evidentiary materials were submitted in support of  
15 that motion, I notified counsel that we would be converting  
16 that to a motion for summary judgment and gave counsel for  
17 both sides the opportunity to submit all evidence that they  
18 wish considered on the motion for summary judgment.

19 The motion basically challenges the timeliness of  
20 Mr. Hamm's complaint, so that will be the first thing that  
21 we take up today.

22 For purposes of the record, I want to note that I  
23 am treating all of the exhibits that were offered in support  
24 of or objection to the motion for summary judgment as  
25 admitted for purposes of the summary judgment hearing only.

1           At this time, if counsel would like to, I will  
2 give you an opportunity to make a little preliminary  
3 statement.

4           As I explained to counsel, I have got lots of  
5 questions and that's where the focus will be for most of the  
6 morning.

7           I guess since it is the Department of Corrections'  
8 motion, Mr. Govan, you in this case would be the one to make  
9 the first statement, if you would like to.

10           MR. GOVAN: Yes, Your Honor. Thank you. Thomas  
11 Govan on behalf of the Department of Corrections.

12           As we set out in our motion for dismiss and  
13 alternative summary judgment motion, the grounds that --  
14 legal grounds that, even assuming the facts as true,  
15 demonstrate that we're entitled to summary judgment in this  
16 case for two -- interrelated but different reasons. The  
17 first is unreasonable delay based on laches.

18           Based on the facts of this case, the delay with  
19 which Mr. Hamm filed his 1983 complaint falls straight under  
20 precedent from the Eleventh Circuit affirming dismissals and  
21 denials of stays of execution based on unreasonable delay.

22           The facts of this case is Mr. Hamm's federal  
23 habeas petition was denied in October of 2016, when the  
24 Eleventh Circuit has held that an inmate who has a  
25 reasonable regard for his rights to know that it would be

1 likely an execution date would be set, Mr. Hamm did not file  
2 a 1983 challenge then.

3           When the State moved to set an execution date in  
4 June of 2017, Mr. Hamm still did not file a 1983 complaint  
5 and waited until December 13th, the day the Alabama Supreme  
6 Court set his execution date.

7           And courts have held, from the Eleventh Circuit as  
8 well, that those situations justify a dismissal based on  
9 laches.

10           To the extent he has alleged that his medical  
11 conditions may have caused him to -- is a justification for  
12 delay, again, assuming the facts and the allegations that --  
13 the factual allegations in the complaint as true, he has  
14 alleged that this problem with his intravenous access is  
15 based on a long-standing medical condition, and there is no  
16 evidence in the record that any changes occurred recently  
17 that would justify his delay in this case.

18           The second is statute of limitations. And the  
19 Eleventh Circuit in McNair has set out the standard for  
20 that, that an accrual for 1983 claim accrues when direct  
21 review is complete or when an execution protocol is  
22 subjected to a substantial change.

23           Well, for practical purposes, Alabama has been  
24 employing lethal injection since 2002. So, Mr. Hamm has  
25 been aware since then that that would require venous access

1 in this particular case.

2 And the evidence in his complaint, attached with  
3 it Dr. Heath's affidavit, where Mr. Hamm reported that he  
4 had allegedly had difficulty obtaining venous access since  
5 2014. And there's no evidence in the record that a  
6 substantial change has occurred in the execution protocol or  
7 that there had been recent developments in his health from  
8 any medical records or medical testimony that would show how  
9 anything has changed in the past two years in his condition,  
10 much less since 2002.

11 For all of those reasons, Your Honor, even  
12 assuming the facts in the light most favorable to the  
13 plaintiff, the defendants would be entitled to summary  
14 judgment based on laches and statute of limitations grounds.

15 Thank you.

16 THE COURT: Thank you. Mr. Harcourt.

17 MR. HARCOURT: Thank you, Your Honor. As the  
18 Court correctly stated, this is an as-applied challenge.  
19 And in part, that's a very important aspect of this case.

20 There's been a lot of litigation about the use of  
21 lethal injection, there has been a lot of lethal injection  
22 litigation. This is not that kind of a case. Those kind of  
23 cases have been going on across the country, and also in  
24 Alabama, but this is a completely different case because it  
25 is as-applied and raises particular issues about, centrally,

1 about Mr. Hamm's venous access.

2 Now, as the Court correctly noted in its orders,  
3 there are really two questions this morning: The first is a  
4 question on the substance, whether there are genuine issues  
5 of material fact concerning any legal claims.

6 There are lots of twos in this case. That's the  
7 first real question. And there are two claims here. The  
8 claim regarding venous access and then the claim regarding  
9 the Eighth Amendment cruel and unusual punishment as a  
10 whole.

11 In that first claim, in the first count, there are  
12 also two prongs to that, which is the first, risk of  
13 substantial harm; and then second, an alternative.

14 Now, I would say that on that whole cluster of  
15 issues involving kind of the substance of the two claims,  
16 that there -- that there are -- I believe, clearly, central  
17 issues in dispute.

18 The most key issue being that basically my expert  
19 believes, based on his expert opinion, that it would be  
20 practically impossible to put a catheter in the one small  
21 tortuous vein that Doyle Hamm has. And, on the other hand,  
22 one of the witnesses for the State of Alabama seems to  
23 indicate that Doyle Hamm has many veins that would be  
24 accessible.

25 So, I think that brings us then to the second

1 issue for us this morning which has to do with the timing of  
2 the case which was what Counsel Thomas Govan raised which  
3 has to do with the laches precedent.

4 On that claim, what I would like to suggest is  
5 that this case is somewhat sui generis and completely  
6 different than all of those other decisions that have  
7 addressed the question of laches and equitable remedies.

8 And it's sui generis and completely different  
9 because the Alabama Supreme Court initiated a process of  
10 review and essentially took the case under its -- under its  
11 jurisdiction, under its control, under its wing entering  
12 orders for me to be allowed to have a medical expert, asking  
13 me to file weekly updates, weekly updates, I filed six  
14 weekly updates. And in that sense the case was rightfully  
15 in front of the Alabama Supreme Court.

16 Now -- and I say rightfully because they're the  
17 Court that signs the execution warrant. And we were  
18 rightfully in front of them asking for the protocol. I was  
19 asking the Alabama Supreme Court -- well, I asked counsel  
20 for the defendants, who were not willing to turn it over to  
21 me, I asked for orders from the Alabama Supreme Court for  
22 the protocol.

23 I got an order for a medical examination. I asked  
24 for the Alabama Supreme Court to appoint a special master to  
25 kind of review what's going on in this case.

1 I asked them for an independent medical  
2 examination so that it wouldn't just be my doctor. And  
3 so -- and so the Alabama Supreme Court was completely on top  
4 of the case.

5 In fact, one pleading I filed where I tried to  
6 explain Doyle Hamm's situation, and we'll come to it when we  
7 go through the exhibits, the Alabama Supreme Court sua  
8 sponte treated, as a second motion for an extension of time,  
9 an enlargement of time to respond to them, sua sponte.

10 So it was clear that the case was in front of the  
11 Alabama Supreme Court where -- which is the right -- which  
12 is the rightful court to be hearing this case. They are the  
13 ones who set the execution date.

14 So, there's something -- there's -- this case is  
15 sui generis on those equitable principles and was perfectly  
16 before the Alabama Supreme Court until they decided to set  
17 an execution date on December 13th, whereupon,  
18 I immediately, the same day, filed in federal court.

19 I believe, and I will argue later, that it would  
20 have been a violation of principles of comity, principles of  
21 federalism to simply file in federal court when the Alabama  
22 Supreme Court was handling the case.

23 And I have some cases that I would like to  
24 discuss.

25 When we have -- when -- in response to the Court's

1 questions, perhaps I'll go through the exact time line. I  
2 realize we're trying to keep our introductions very short.

3 I have just a few kind of slides that show the  
4 time line, and I can go through those as soon as the Court  
5 would like to ask those kinds of questions.

6 Thank you, Your Honor.

7 THE COURT: All right. Thank you. I do want to  
8 state for the record that this morning we're going to be  
9 talking just about the timeliness issue. There is some  
10 overlap between allegations in the complaint and evidence  
11 offered in support of it and in opposition to the timeliness  
12 motion that touches on issues that are involved in the  
13 merits that we have to at least consider while discussing  
14 whether the complaint should be dismissed based upon  
15 unreasonable delay or a statute of limitations argument.

16 But as much as we can, I want to keep us kind of  
17 focused on that timeliness at this initial session.

18 I would like to set out what I have found to be  
19 basic undisputed facts that bear upon the decision of  
20 timeliness. And, of course, I think we all know that the  
21 summary judgment standard is whether the movant has  
22 established that there are no genuine issues of material  
23 fact and, if no material issues of fact, is the movant  
24 entitled to judgment as a matter of law. In this case,  
25 would the defense be entitled to dismissal of the case based

1 upon laches or statute of limitations.

2 So, although in brief the commissioner argues that  
3 there are quite a few undisputed facts, I have found that  
4 many of those are disputed. So these are the ones that I  
5 have found to be undisputed that are relevant to the issues  
6 here this morning.

7 First, it's undisputed that Mr. Hamm was convicted  
8 of capital murder and sentenced to death in 1987. His  
9 sentence became final in 1990.

10 In 2002, Alabama adopted its current method of  
11 execution by lethal injection.

12 In 2014, Mr. Hamm was diagnosed with B-cell  
13 lymphoma and particularly had -- would we call it a tumor  
14 behind his left eye? Is that the appropriate term?

15 MR. HARCOURT: Yes, Your Honor.

16 THE COURT: Don't ever hesitate to correct me on  
17 medical issues or statements today.

18 That tumor was treated. And while the defendant  
19 asserts correctly that there is no certain evidence that  
20 Mr. Hamm's lymphoma is still active, there also is no  
21 certain evidence that Mr. Hamm's lymphoma is not still  
22 active.

23 And I note for that purpose the medical scans and  
24 reports from 2014 and 2015 regarding lymph nodes in the  
25 chest and abdomen that never were tested or treated.

1           We also have Dr. Roddam's affidavit saying he  
2 examined Mr. Hamm on January 2nd, 2018, and found no  
3 evidence of lymphadenopathy in the cervical supraclavicle or  
4 axillary areas of Mr. Hamm's body.

5           But we don't have any evidence about an  
6 examination below the clavicle or in the abdomen where  
7 nodes -- where knots were noted in March of 2017.

8           We've got a series of affidavits from nurses at  
9 the prison facility about the dates on which they attempted  
10 to draw blood and were either successful or unsuccessful and  
11 how many pricks or sticks were necessary.

12           But we also have Mr. Hamm's affidavit that doesn't  
13 dispute that those efforts were made, but disputes the  
14 number of sticks that were necessary before blood could be  
15 drawn.

16           We do have, as undisputed, that on December 13th,  
17 2017, the Alabama Supreme Court set Mr. Hamm's execution  
18 date for February 22nd, 2018, and on that same date Mr. Hamm  
19 filed this 1983 suit.

20           Also undisputed, but not particularly listed in  
21 the undisputed facts by the defendants, is that Mr. Hamm  
22 contested the setting of the execution date in the Alabama  
23 Supreme Court for the same or similar reasons to those  
24 asserted in his 1983 action here.

25           I do think that there are some significant

1 disputes of fact or disputed facts that may or may not be  
2 determinative of the issue today of the timeliness but I do  
3 think it's important to note some of those.

4           While the defendants assert that Mr. Hamm's cancer  
5 went into remission in March of 2016, I may have missed in  
6 the voluminous submissions medical evidence of an oncologist  
7 so declaring, so that's one thing that, if you can point it  
8 to me, I would love to see.

9           The plaintiff asserts, however, that the cancer is  
10 not in remission, that aspects of his lymphoma were not  
11 treated when noted in 2014 and 2015, particularly the lymph  
12 nodes in the chest and abdomen area.

13           Also, Dr. Heath's October 2017 affidavit states  
14 that Mr. Hamm has active B-cell lymphoma. I would like to  
15 know at some point how that determination is made when there  
16 have not been any scans or examinations by an oncologist  
17 since, I believe it was, March of 2015. Dr. Blanke does  
18 state that it's impossible to state with any degree of  
19 certainty whether or not he has active lymphoma overall. So  
20 those are factual issues.

21           As I noted previously, none of the medical records  
22 that I saw revealed any treatment of the noted issues with  
23 nodules in the chest and abdomen that were made in 2014 and  
24 2015 in the scans.

25           So, I do think that there are a lot of questions

1 about Mr. Hamm's current medical condition. Those may or  
2 may not affect the timeliness issue but they are disputes  
3 that I find.

4 Mr. Hamm says in his affidavit that beginning in  
5 March of 2017, the cancer -- I'm sorry, this is from the  
6 amended complaint, says that the cancer has returned and  
7 he's been experiencing lymphadenopathy associated with  
8 earlier diagnosis.

9 So I have some questions about how the plaintiff  
10 can assert affirmatively that the cancer is back, again,  
11 without any scans or anything to affirmatively support that.

12 And I guess this is as good a time as any for me  
13 to begin with some of the questions that I have about these  
14 medical records and medical conditions.

15 And these may not necessarily be questions that  
16 can be answered today, but they do raise for me some real  
17 issues about what is going on with Mr. Hamm.

18 I noted previously Dr. Roddam's affidavit about  
19 his examination of Mr. Hamm on January 2nd and that he found  
20 no evidence of lymphadenopathy in the cervical supraclavicle  
21 or axillary areas of Mr. Hamm's body. So that covers his  
22 neck, above the collar bone and his armpits. What about the  
23 other areas of Mr. Hamm's body and how do these areas relate  
24 to the areas where Mr. Hamm complained about having lumps or  
25 feeling knots in his chest and abdomen in March of 2017?

1 I guess I raise that more as one of those  
2 questions that doesn't have to be answered at this time, but  
3 it's a question that kept coming into my head.

4 Also, this I do believe, Mr. Govan, you can answer  
5 for me, is Dr. Roddam an oncologist?

6 MR. GOVAN: No, Your Honor.

7 THE COURT: Okay. Do you know when the last time  
8 was that the Department of Corrections had an oncologist  
9 examine Mr. Hamm?

10 MR. GOVAN: Your Honor, I am not sure of the exact  
11 last date.

12 However, I will say that there is evidence in the  
13 record from -- and this is at Exhibit 1 from the evidence  
14 that we submitted, Bates stamp 331 which is a report from  
15 Brookwood Cancer Care Center of March of 2016. And in the  
16 report, I believe it notes that the diagnosis was that he  
17 was stable, follow up, but there were no new symptoms in  
18 regard to the orbital lymphoma.

19 I'm sorry, 331 of this -- this is in the --  
20 Mr. Hamm's medical records --

21 MR. HARCOURT: Document 23 of 31?

22 MR. GOVAN: No. This is actually in Defendant's  
23 Exhibit Number 1 for the evidence that we submitted last  
24 week.

25 THE COURT: What was the page number?

1 MR. GOVAN: 331.

2 MS. HUGHES: Bates stamp 331.

3 MR. GOVAN: It is a March 2016 --

4 THE COURT: Okay.

5 MR. HARCOURT: Is it this (indicating)?

6 MR. GOVAN: Yes. And I will note that from this  
7 document it appears it was a follow up from the orbital  
8 lymphoma that was operated on -- excuse me, radiation was  
9 conducted on, this follow up was dated March 15th, 2016. At  
10 the bottom, stable with no new symptoms. He'll be seen  
11 again in six months with a follow up MRI if approved by the  
12 prison system.

13 Judge, one of the things that you had a question  
14 on was the lymphadenopathy. And I have several arguments on  
15 that. But I just wanted to note in particular the  
16 lymphatic -- it says, there are no palpable nodes in the  
17 cervical supraclavicle axillary or inguinal areas. I may be  
18 mispronouncing that.

19 THE COURT: Okay. I know what the first three  
20 areas are. What is inguinal?

21 MR. GOVAN: Your Honor, I do not know standing  
22 here at this moment.

23 THE COURT: Okay. So that is the only difference  
24 from Dr. Roddam's affidavit.

25 So, is this the basis for the defense argument

1 that he's been in remission since March of 2016?

2 MR. GOVAN: Partly, Your Honor. But there's other  
3 reasons as well that there -- number one, there has been no  
4 other report that I'm aware of where anybody has found  
5 anything suggesting that he -- that it has returned.

6 And there are -- littered throughout his medical  
7 records are statements that the left orbital lymphoma is in  
8 remission.

9 And I can --

10 THE COURT: Right. But that would be in his head  
11 area.

12 MR. GOVAN: Correct.

13 THE COURT: Right? And in March of 2017, he began  
14 complaining about -- I'm trying to remember exactly the word  
15 that he used, lumps or knots in his chest and abdominal  
16 areas. And those were confirmed in the medical records by,  
17 I think it may have been perhaps a nurse practitioner who  
18 had examined him at that time.

19 MR. GOVAN: Your Honor, if I can respond, this is  
20 at Page 146 of Defendant's Exhibit 1. And this appears to  
21 be a note from the records about Mr. Hamm's complaint about  
22 the knots in his chest. And I know it's hard to read, but  
23 it appears to say chest X-ray, I think, normal. The fourth  
24 line down from the bottom.

25 THE COURT: Right.

1 MR. GOVAN: Just more of a global point, Your  
2 Honor, whether or not -- even assuming as true that Mr. Hamm  
3 may have had knots in his chest, that is not relevant to his  
4 ultimate claim, or at least we have not seen any allegation  
5 in his complaint about how that will be relevant to whether  
6 he has venous access, particularly in arms, in legs. And  
7 there has been no allegation -- for example, assuming that  
8 there are lymph nodes on his chest. Mr. Hamm has not made  
9 an allegation of how that would be relevant to establishing  
10 venous access.

11 He has made an allegation that potentially, if  
12 there was some around his neck, that it might impact  
13 applying a central venous line, but that fact that he's  
14 alleging right there regarding his chest would not impact  
15 his neck.

16 And there have been no allegations why, even  
17 assuming it's true that there are lymph nodes that occurred  
18 in his chest, how that would have any relation to the  
19 ability for him -- venous access in his arms, legs, anywhere  
20 else on his body.

21 He has never asserted that venous access would be  
22 done by inserting an IV in his chest. And for our  
23 understanding, that would not be a procedure either.

24 So we would --

25 THE COURT: All right. But I was viewing that as

1 more of potential indication of issues with the lymphatic  
2 system that could be beyond those that were palpated in his  
3 chest and abdomen.

4           If there are, in fact, impacts on the lymphatic  
5 system, could that also impact the ability to access veins  
6 that could be impacted by the problem with the lymphatic  
7 system?

8           MR. GOVAN: Two points on that, Your Honor. From  
9 what I understand about lymphadenopathy, that can be caused  
10 by many different things. And lymphatic cancer may or may  
11 not be one of them. But that can be caused by things that  
12 have nothing to do with cancer.

13           In fact, if you look at Mr. Hamm's medical  
14 records, some of the medical records that he is seeking to  
15 submit today shows he's complained about lymphadenopathy for  
16 many, many years.

17           Of course, that would fall into our timeliness  
18 arguments. But also there has been no allegation that I'm  
19 aware of from his complaint that even assuming that there  
20 was some lymphatic cancer that had returned, even assuming  
21 that that has a relationship to the complaints of the knots  
22 in his chest, that would affect his peripheral venous  
23 access. They appear to be two separate issues.

24           Now, Dr. Heath, the only allegation that I can see  
25 from his affidavit is that if there were swollen lymph nodes

1 in his neck, that that could affect one potential place  
2 where a central line could be done.

3 But absent that, I'm not aware of any allegation  
4 that would relate to how, even assuming the lymphatic cancer  
5 has returned, which there is no evidence of that, even  
6 assuming that he has -- currently has lymph nodes on his  
7 chest that are enlarged, again, he reported that in March,  
8 that wouldn't have any relation to the ability to obtain  
9 venous access on Mr. Hamm.

10 THE COURT: Well, that gets to a lot of the  
11 unknowns. And I certainly do not even pretend to understand  
12 medicine. But, I noted that a chest X-ray was done, but is  
13 an X-ray the appropriate diagnostic tool for determining  
14 whether there is any cancerous lesions or nodules in the  
15 chest area?

16 I mean, I don't know if that would show up on an  
17 X-ray.

18 MR. GOVAN: I don't know the answer to that  
19 question, Your Honor. I think, again, it was -- again, for  
20 the complaint from the medical records in that particular --  
21 there was no -- at that point, does not appear the complaint  
22 was about cancer. It was about knots on his chest. And it  
23 appears from the medical records that the X-ray was taken in  
24 regards to that problem, not -- there was no allegation even  
25 from Mr. Hamm that I can see in that medical record that he

1 is saying that the cancer has returned. He was complaining  
2 about the knots on his chest.

3           Again, even -- I'm not sure of the answer  
4 ultimately how that would be diagnosed, we would contend the  
5 ultimate issue is, regardless, there is no nexus to how that  
6 would relate to gaining peripheral IV access on Mr. Hamm.

7           THE COURT: Mr. Harcourt, how does the potential  
8 presence of knots in Mr. Hamm's chest affect peripheral  
9 access?

10           MR. HARCOURT: Thank you, Your Honor. So, Your  
11 Honor, you're correct that there are two health conditions  
12 that are interfering with a potential lethal injection.

13           One has to do with his veins and whether it's even  
14 possible to put a catheter in his peripheral veins which  
15 would be arms, hands, legs and feet. And that addresses the  
16 question of peripheral access.

17           There are some important issues here regarding the  
18 lethal injection protocol that we're not going to get into  
19 about -- in public, is my understanding, because there is a  
20 confidentiality agreement surrounding that. But I received  
21 the lethal injection protocol yesterday afternoon under the  
22 confidentiality agreement. And I would say that having  
23 reviewed that it raises enormous constitutional questions,  
24 which we can address separately, involving the questions of  
25 both access to his veins. And we can perhaps do that in

1 camera.

2 So, there's one issue of peripheral access and  
3 there's another issue of possible central venous access.

4 Central venous access is a very -- it requires  
5 operating room and sonograms to determine where the veins  
6 are so you don't hit an artery. This is not something you  
7 do in your garage.

8 Central venous access requires anesthesiologists  
9 who could anesthetize someone and then, using sonograms,  
10 tilting, et cetera, where they are going in, possibly find a  
11 central vein which is further in our bodies.

12 And that raises the second major question which  
13 has multiple dimensions, not just those that go to the  
14 protocol itself, which we will address in camera, but  
15 central questions about how then would lymphatic cancer  
16 potentially affect that.

17 THE COURT: All right. So let me stop you there  
18 just briefly.

19 So it is not your contention that any possible  
20 lymphatic cancer would impact the peripheral venous access  
21 but could affect the potential central venous access if that  
22 were necessary; is that the argument?

23 MR. HARCOURT: Let me make a slight modification  
24 on that. The lymphatic cancer was a key contributing  
25 factor -- was a key contributing factor to the deterioration

1 of his health leading gradually over the course of many  
2 years to a point where it is practically impossible to draw  
3 blood from the one remaining small tortuous vein on his  
4 right hand.

5           And you will note that this isn't from my  
6 exhibits, it's in the defendant's, in the defendant's  
7 exhibits, that when they have been trying to get venous  
8 access to draw blood, which is very different from inserting  
9 a thick catheter, they have been repeatedly, even failing,  
10 after failure, going to that one small tortuous vein on the  
11 right hand.

12           And if you look at the affidavit of Ms. Kelley  
13 McDonald, who is the nurse who was trying to get access to  
14 his veins with a butterfly needle, tiny needle, to draw  
15 blood, we're not trying to put in a robust catheter here.  
16 She goes -- October 3rd she goes to the vein in the right  
17 hand and there are five attempts in the course of that  
18 little affidavit that she relates. She first goes on  
19 October 3rd into the right hand, she couldn't draw blood.  
20 This was the first time, apparently, she -- from the  
21 affidavit, it seems that she begins working there in  
22 October, I'm not entirely sure, we haven't been able to  
23 depose witnesses or anything, but it seems it says she  
24 starts working in the lab at Donaldson in October 2017.

25           And she -- the first place she tries to draw

1 blood -- and I assume, I know when you are trying to draw  
2 blood, you're trying to find the best place. She zeros in,  
3 like a V-line into this little vein on the hand and couldn't  
4 draw blood on October 3rd. This would have been with a  
5 needle. Two sticks. She tries twice into the right hand.

6 Now, she tries a second time into that little vein  
7 after she hasn't been able to get in, assuming if you are  
8 not able to get into that little vein the first time, you  
9 might look somewhere else since, apparently, according to  
10 their experts, he has veins all over that would be  
11 accessible for a large catheter.

12 October 31st, she tries again, the right hand, two  
13 times. Now, she had had problems before and she's -- I  
14 won't go over that testimony, but she goes about five times,  
15 every single time trying to stick the same place having  
16 problems not going elsewhere. That is a reflection --

17 THE COURT: So the argument is that the lymphatic  
18 cancer that he had in 2014 may have been in remission in  
19 March of 2016, may be perhaps back or we cannot emphatically  
20 say one way or the other without tests, that its impact was  
21 over the course of time accelerating or affecting the  
22 deterioration of the peripheral veins that had been going on  
23 for some time because of all of his history of drug use and  
24 Hepatitis C and all those other kinds of things.

25 MR. HARCOURT: Let me add a few things to that

1 because that's a piece of the picture but it's not all of  
2 it.

3 THE COURT: I'm trying to make sure I understand  
4 what impact you say the lymphatic cancer has on peripheral  
5 access.

6 MR. HARCOURT: Yes. So, there is the fact that  
7 the lymphatic cancer is itself a health deterioration which,  
8 along with the other elements, age, of course, but prior  
9 medical history, prior drug use also, intravenous drug use,  
10 and also the treatment, all of the cancer treatment. In  
11 other words, you get pricked a lot and veins and they're  
12 putting a lot of contrast into your veins for all of the  
13 treatment, and that also has an affect on the health of your  
14 veins.

15 So, on the venous access, it is a question of a  
16 long history compounded by the lymphatic cancer and the  
17 treatments for the lymphatic cancer, trying to get in. And  
18 I believe in 2014, they were able to get in in that right  
19 vein in 2014 for some of the contrast or something like  
20 that, but -- and I'm not a doctor and this is where medical  
21 expertise would seem very important, getting into a vein  
22 once or twice or -- veins don't last -- that harms the vein,  
23 actually, and as a result of that repeated use, et cetera,  
24 the veins get damaged. As a result of putting in contrast,  
25 the veins get damaged, et cetera.

1           So we have the lymphatic cancer which itself is  
2 deteriorating his body, but then we also have the  
3 treatments, et cetera.

4           Now, on the lymphatic cancer, though, and you had  
5 a lengthy back and forth with defendant's counsel,  
6 Mr. Govan, I would like to say a few things about his  
7 lymphatic cancer.

8           I would -- it's difficult -- it's practically  
9 impossible on the state of the medical examinations that  
10 have been done, because the proper examinations have not  
11 been done, to determine whether or not Doyle Hamm has --  
12 whether or not his lymphatic cancer, which was diagnosed, I  
13 mean, clearly he had a huge mass in his skull, back in his  
14 eye, it was radiated, so he has had lymphatic cancer, it's  
15 practically impossible because we don't have the right  
16 medical workup to know what's going on in his body right  
17 now. That's the God's honest truth.

18           We can tell --

19           THE COURT: I think I noted that as a disputed  
20 issue of fact because we don't have complete medical  
21 information because there has not been an exam by an  
22 oncologist, there has not been any scans to determine.

23           MR. HARCOURT: We do know for sure, and we can  
24 observe -- I would state for the record, I would like the  
25 record to reflect that Doyle Hamm has a huge lesion on his

1 cheek underneath his eye, his left eye, and the massive  
2 cancer was behind his left eye and he still has a large  
3 quarter-size lesion on his cheek indented. It goes back  
4 like six centimeters.

5 THE COURT: Hasn't that been diagnosed as --

6 MR. HARCOURT: It was diagnosed in 2014 as  
7 carcinoma, in 2014, in February of 2014. And in Defendant's  
8 Exhibit -- Plaintiff's Exhibits --

9 THE COURT: I think it's undisputed that that  
10 carcinoma has not been removed.

11 MR. HARCOURT: That is undisputed.

12 THE COURT: So that may also impact his overall  
13 health condition.

14 MR. HARCOURT: Yes, Your Honor. It's been  
15 biopsied three times. This is in Plaintiff's Exhibit 7.

16 THE COURT: All right. I think what we need to be  
17 focusing on now, though, is --

18 MR. HARCOURT: Sorry. The lymphatic --

19 THE COURT: What we need to be focusing on now are  
20 the questions that go to the timeliness. And his medical  
21 condition is a big unknown because there have not been tests  
22 that would definitively address whether he has lymphatic  
23 cancer now, what impact that may have on venous access and  
24 things of that nature.

25 I'm fully aware of those unknowns and those

1 questions.

2 But what I'm trying to get to is actually a  
3 response to Mr. Govan's argument that there's not been any  
4 linkage of these potential health risks to peripheral  
5 access. And you have now explained that they go to the  
6 continuing process of deterioration of Mr. Hamm's veins,  
7 peripheral veins.

8 And I'm assuming also, based upon Dr. Heath's  
9 affidavit, that if there are, in fact -- if there is, in  
10 fact, lymphatic cancer, that could affect lymph nodes and  
11 other things in the various areas of Mr. Hamm's body into  
12 which central venous access might be tried as an  
13 alternative.

14 So, all of those issues, as I see them, are  
15 disputed factual questions.

16 But the issue as to timeliness really is more when  
17 could Mr. Hamm have known that these unknown health issues  
18 could affect the constitutionality of lethal injection as  
19 administered by the Department of Corrections as to  
20 Mr. Hamm.

21 MR. HARCOURT: Yes, Your Honor.

22 THE COURT: That is kind of a long way of getting  
23 around to that issue. But that's the issue that we have to  
24 focus on this morning.

25 MR. HARCOURT: Yes, Your Honor. Let me try to be

1 as brief as possible to get right to that question. And to  
2 do that, I am going to lay two foundations.

3 One which goes back to the question of lymphatic  
4 cancer. So the first quick foundation, because there was a  
5 lot of discussion about that, and I think this is important.  
6 The best way to determine whether he has lymphatic cancer or  
7 not would be, and I'm not a doctor, but from consulting some  
8 oncologists, would be a PET scan and a bone marrow, I think  
9 it's a biopsy, some kind of way of testing the bone marrow.  
10 Okay. And those were actually suggested by the doctors at  
11 Brookwood.

12 So, if you look in Defendant's Exhibit -- no,  
13 Plaintiff's, I have got them marked in Plaintiff's Exhibits  
14 from Donaldson, on Page 152, Bates Page 152, this is Exhibit  
15 8, it's a separate binder, it's Plaintiff's Exhibit 8 which  
16 is a seven hundred seventy-seven page document.

17 MR. GOVAN: What Bates stamp?

18 MR. HARCOURT: Page 152 and 135, Bates stamped on  
19 the bottom right-hand side of defendant's -- and this is  
20 Exhibit 8. I provided the Court with two binders, there is  
21 a separate binder for medical Exhibit 8.

22 THE COURT: What was that number again?

23 MR. HARCOURT: I'm going to Page 152, right-hand  
24 side. It's a CT just contrast and there's a big paragraph  
25 in the middle where they talk about a PET study may be of

1 benefit for further evaluation depending on the clinical  
2 situation. A PET study, P-E-T.

3 On Page 135 as well, on Page 135 of that document,  
4 which are the Donaldson records that have come in both by  
5 defendants and by the plaintiff, 135, there's a big  
6 paragraph there, history of lymphoma. At the end of it, it  
7 would be best to have a PET scan, this can't be done, CT  
8 scans haven't been found -- that's at early stage.

9 Basically, my understanding is, proper -- kind of  
10 proper reasonable care in this condition where he has a  
11 bulging thing would be to try and get a PET scan because  
12 that's the real way to figure out whether someone has  
13 lymphoma or marrow. It's never been done in this case.

14 One of the issues in this case is -- goes to count  
15 two, but I think it fuses this whole situation is whether he  
16 has received adequate care.

17 And I think that if -- and I'm going to quickly  
18 end my first point on lymphatic cancer, and the fact that  
19 he's here four years later with this lesion on his face that  
20 has been biopsied three times and ordered to be removed by  
21 the doctors, but never removed, indicates that we have  
22 issues about the medical care that he's received that  
23 results in the fact that I'm without -- I do not have the  
24 scans, et cetera, to show that all of these suspicions of  
25 the lymph node problems all over his body are actually

1 continuing. So that is one thing about that.

2 THE COURT: Maybe I wasn't clear. But I thought I  
3 had recognized that as being a major problem. And I have a  
4 lot of questions about what his condition is today. And it  
5 does seem to me that the Department of Corrections controls  
6 Mr. Hamm's access to medical care, the Department of  
7 Corrections controls decisions as to whether PET scans or CT  
8 scans or any other kind of scans are done to determine his  
9 medical condition.

10 And it does seem to me when we're talking more in  
11 line with equitable issues that the entity that controls the  
12 only method of determining whether someone's health  
13 condition has deteriorated to the state where it could  
14 impact the ability to access veins for intravenous  
15 injection, that it seems to me to cut against the equitable  
16 argument of laches when the Department of Corrections has  
17 not done those things that could put to rest Mr. Hamm's  
18 allegations or could bring into play the need for a  
19 different approach to execution of Mr. Hamm's sentence. And  
20 I recognize that.

21 But I do want to spend as much time as we can  
22 talking about the things that we do know. Okay. And I'm  
23 with you completely on this inability of Mr. Hamm to  
24 definitively state today what is going on, what is the  
25 scenario, what are the problems, if any, in accessing

1 peripheral and central veins for purpose of the injection.

2 So I don't think we need to talk much more about  
3 that. I have got it.

4 MR. HARCOURT: Thank you, Your Honor. Thank you.  
5 And I'm not going to talk anymore about that then. Except  
6 for this footnote that they recommended an MRI in this last  
7 one and it hasn't been done.

8 So on the question of timing. On the question of  
9 timing, that's where the timing engages both the health  
10 conditions affecting, on one hand, peripheral access and, on  
11 the other hand, the possibility of lymphadenopathy  
12 interfering with a central line.

13 So, in 2014, there was clearly evidence of  
14 lymphatic cancer, lymphatic cancer treatment in 2014, but I  
15 don't think there was an indication at that time that there  
16 were these problems with venous access.

17 The question in this case on the timing is when  
18 does everything come together such that it presents a  
19 constitutional problem.

20 And I would say that only with hindsight today,  
21 actually, can I suggest that on my reading of all of these  
22 records, the kind of storm came together at some point in  
23 the spring of 2017.

24 Now -- and, again, I don't -- and again, it's not  
25 something that I think was necessarily clearly visible even

1 at that time.

2 He did respond somewhat well to the radiation in  
3 2014. And so there was --

4 THE COURT: But that radiation was in the head  
5 area.

6 MR. HARCOURT: Yes, Your Honor, skull.

7 THE COURT: We're not talking about any kind of  
8 access to veins in the skull for execution.

9 MR. HARCOURT: Thank God, Your Honor.

10 THE COURT: Right.

11 MR. HARCOURT: Right.

12 THE COURT: I think we really need to be focusing  
13 more on access to the veins that would be used in execution.

14 MR. HARCOURT: Correct.

15 THE COURT: And the change there. And I have got  
16 some more questions I would like to get to. I really do  
17 understand your argument about the lack of medical evidence  
18 to specifically say when these issues came about.

19 But what records we do have indicate that in March  
20 of 2017 he complained about lumps in his chest. And perhaps  
21 an X-ray was done, but no scan, no MRI, nothing else to  
22 determine that.

23 I also know he's got the lesion on his face that's  
24 been diagnosed as being carcinoma, and I know what can  
25 happen when one does not get treated for skin cancer.

1           We also have the records of the nurses who  
2 attempted, sometimes successfully, sometimes unsuccessfully,  
3 in the last three or four months to access the vein, I've  
4 got that. Okay.

5           I want to move on to some other areas, if that's  
6 okay.

7           MR. HARCOURT: I think the issue is the timing or  
8 your -- the question about the timing of when this -- when I  
9 found out or -- and what I did; is that the question, Your  
10 Honor?

11           THE COURT: No. I don't have a question on the  
12 table for you now.

13           I want to get to also the statute of limitations  
14 argument because I do think they're intertwined with the  
15 laches argument.

16           McNair, of course, advises that when there is a  
17 facial challenge to a method of execution, that it accrues  
18 on the later of either the date when State review is  
19 complete or the date when the capital litigant becomes  
20 subject to a new or substantially changed execution  
21 protocol.

22           So, the commissioner has argued that Mr. Hamm  
23 should have filed his case no later than 2004, two years  
24 after the 2002 lethal injection protocol.

25           My question for you, Mr. Govan, is how the heck

1 could he have filed an as-applied challenge in 2004 when  
2 he's not challenging the method of lethal injection  
3 generally but is saying that in this case, because of his  
4 unique health situation, the deterioration of his peripheral  
5 veins, the fact that he has, in fact, had lymphoma and may  
6 have it now, would make access to those veins more  
7 difficult, how could he have possibly have filed his claim  
8 on an as-applied basis in 2004, as you say he should have  
9 done, when he didn't even get diagnosed with lymphoma until  
10 2014?

11 MR. GOVAN: Yes, Your Honor. Couple of responses  
12 to that.

13 First, just on the McNair standard and, again,  
14 you're right, that was -- that particular case was a facial  
15 challenge. But --

16 THE COURT: Has that standard ever been applied in  
17 an as-applied case? That really was a bad sentence.

18 Has the McNair triggering of the statute of  
19 limitations standard been used in a case involving an  
20 as-applied challenge to method of execution?

21 MR. GOVAN: Yes, Your Honor. And what we cited in  
22 our brief was the Gissendaner case from the Eleventh  
23 Circuit, I believe it's a 2015 case. And that really is  
24 really the more relevant case to look at because it took the  
25 McNair standard and applied it to an as-applied claim, and

1 that particular case was a Georgia inmate.

2 And Georgia also had a two-year statute of  
3 limitations just like Alabama does.

4 And what the Court focused on is that the  
5 allegations that -- also about venous access for different  
6 reasons, some similar, did not pertain to any recent  
7 developments that from the record appeared to have occurred  
8 within the past two years. And that --

9 THE COURT: Right. Because in that case the  
10 plaintiff had always had those conditions, if I'm not  
11 mistaken. If I've got the right one. She'd always been  
12 female, she was obese and there was one other reason that  
13 she was arguing that as-applied to her was unconstitutional,  
14 but the Court found that those things -- there was nothing  
15 that had changed; right?

16 MR. GOVAN: Correct.

17 THE COURT: But here we've got things that have  
18 changed --

19 MR. GOVAN: Well, Your Honor --

20 THE COURT: Or the plaintiff alleges that they  
21 have changed. And for the purpose here I have to accept  
22 that.

23 MR. GOVAN: Your Honor, that's correct. In  
24 looking at the summary judgment, though, even assuming --  
25 that is exactly the point for two reasons.

1           Number one, in his initial complaint, he was  
2 alleging that the problems with the venous access were  
3 because of long-standing health issues, his cancer, which  
4 occurred more than two years before the filing of the  
5 complaint, his intravenous drug use, which occurred well  
6 before -- many, many years ago, and the whole gist of his  
7 claim were these were long-standing issues that contributed  
8 to intravenous access.

9           Secondly, there is no evidence in the record to  
10 support his contention that somehow his veins have become  
11 substantially more compromised in the past year or even the  
12 past two years.

13           He alleges -- in fact, the opposite. He alleges,  
14 by including the affidavit from Mr. Heath, that there was  
15 problems or difficulty achieving venous access in 2014,  
16 again, more than two years ago.

17           Now, he has --

18           THE COURT: But we also have the affidavits from  
19 your nurses reflecting that while they sometimes were able  
20 to access veins, they could not always access veins, and it  
21 often took more than one or two tries to do that. That,  
22 coupled with Mr. Hamm's affidavit that the nurses have had  
23 more trouble recently, and I don't remember the exact words,  
24 access those veins.

25           So, if we look at a process that is a process,

1 we're -- the plaintiff is not arguing that on this specific  
2 date, this specific event occurred and, as a result, my  
3 veins, all of a sudden, became compromised and difficult to  
4 access.

5 He's alleging that this was a process that  
6 occurred over time as a result of all of those medical  
7 conditions that he's dealt with and that it's been getting  
8 worse.

9 But clearly he could not have made that argument  
10 in 2004.

11 MR. GOVAN: Your Honor, I know that's what he's  
12 alleging, but there's no evidence supporting that he  
13 couldn't. There is no definitive evidence saying that --  
14 and I agree, yes, Your Honor, he was not diagnosed with  
15 cancer before 2004.

16 But there --

17 THE COURT: So let's put that aside then. He  
18 could not have filed this as-applied claim in 2004.

19 MR. GOVAN: Your Honor, I don't know if that is  
20 true or not, because he has not presented evidence -- the  
21 evidence that he has presented in opposition to summary  
22 judgment does not show that his veins today or two years ago  
23 or in 2004 were significantly different.

24 Again, he's kind of arguing one side thing or the  
25 other and he's complaining about the right hand, but the

1 nurses were pricking him, but that's exactly the same hand  
2 that he says to Dr. Heath in Dr. Heath's report there was  
3 difficulty accessing in 2014.

4 THE COURT: But --

5 MR. GOVAN: There's nothing --

6 THE COURT: -- he says it has gotten more  
7 difficult.

8 MR. GOVAN: Your Honor. He says that, that is  
9 correct.

10 THE COURT: You make an argument in your brief,  
11 you say that there is no iota of evidence to support his  
12 claim. And then you go on to say that he has a self-serving  
13 affidavit.

14 MR. GOVAN: Correct.

15 THE COURT: In essence, saying that the Court  
16 shouldn't consider that self-serving affidavit as creating  
17 any genuine issue of material fact.

18 But hasn't Chief Judge Carnes himself told us that  
19 a self-serving affidavit by a plaintiff can be sufficient to  
20 create a genuine issue of material fact. He said that in  
21 the Feliciano case -- I'm doing good to remember that name  
22 of a case, and that's as far as I can go right now.

23 But don't I have to, at summary judgment, take  
24 Mr. Hamm's self-serving affidavit as evidence so that there  
25 is at least an iota or perhaps even a scintilla or, under

1 the Feliciano standard, sufficient evidence to raise a  
2 question at least as to whether, beginning in the spring of  
3 2017, his veins became more difficult to access.

4 And here is the Feliciano case, Feliciano vs. City  
5 of Miami Beach, a 2013 decision by Judge Carnes, where he  
6 says, Feliciano's sworn statements are self-serving, but  
7 that alone does not permit us to disregard them at the  
8 summary judgment stage.

9 So I cannot ignore his affidavit, as much as you  
10 may think that it is not credible or should be ignored, I  
11 cannot do that at this stage.

12 So we have to take into account the evidence that  
13 is presented through his affidavit and cannot ignore it.

14 MR. GOVAN: I understand, Your Honor. And our  
15 point in arguing that was -- I understand the Court's  
16 ruling.

17 But we cited a case in our brief at Page 17  
18 regarding evidence that can be presented, the Van Junkins  
19 case, where the party gives clear answers and then produces  
20 something -- an issue to create a material issue of fact,  
21 that does not prevent summary judgment.

22 What we were pointing to is that, again, in his  
23 complaint, he has alleged that these are -- that the venous  
24 access was a long-standing issue, and he cited Dr. Heath's  
25 report, mentioned the same exact problems he's alleging from

1 the same exact vein in the same exact hand in 2014 that he  
2 alleged in 2017.

3 So, our point is this: You can't have it both  
4 ways. You can't turn around and say, oh, this is something  
5 that I have been having a problem with for a long time, and  
6 then to avoid summary judgment on timeliness issue, try to  
7 say that this is a more recent development.

8 But even if --

9 THE COURT: Can there not be situations that get  
10 worse over time?

11 MR. GOVAN: I'm sure there are, Your Honor. I  
12 just -- there is no evidence in this, other than his  
13 affidavit suggesting that.

14 THE COURT: Which I have to accept.

15 MR. GOVAN: I guess in regards to the summary  
16 judgment, Your Honor, if that's your ruling, again, we would  
17 contend there is reason, there is case law for you not to  
18 accept that, but even if that is the case in the statute of  
19 limitations issue, that would not have any affect on his  
20 unreasonable delay on the first prong -- that let's -- let's  
21 accept that fact as true, in March of 2017, he is claiming  
22 that things have gotten worse.

23 Now, again, they have been able to draw blood  
24 since then at Donaldson which would kind of refute that, but  
25 at that point, even assuming that's true, he delayed for

1 another nine to ten months to file his 1983 complaint, and  
2 that's the problem under laches.

3 THE COURT: Let's get then to the issue that  
4 Mr. Harcourt raised in his opening and that is the  
5 litigation that was going on in the Alabama Supreme Court  
6 after the request had been made for setting an execution  
7 date. And you argue that he didn't have to do that. He  
8 didn't have to participate in the state court.

9 But was he not ordered by the Supreme Court to  
10 respond to the request to set an execution date?

11 MR. GOVAN: Yes, because that is what he  
12 requested. All those things that he's referring to are  
13 things that he asked for. I mean, he asked for more time to  
14 respond. He asked for a chance to be able to go get his  
15 evaluation.

16 THE COURT: And the Alabama Supreme Court actually  
17 ordered, did it not, that he be allowed to have a medical  
18 examination conducted by Dr. Heath for Mr. Hamm?

19 MR. GOVAN: I don't believe they ordered an  
20 examination. They ordered that he be allowed to undergo his  
21 medical evaluation by a certain date.

22 THE COURT: Okay. So that allowed him to do that.  
23 Let me get to the crux of the matter.

24 This case is brought as a Section 1983 case,  
25 right?

1 MR. GOVAN: Correct.

2 THE COURT: Okay. In the Supreme Court decision  
3 of Nelson vs. Campbell, Justice O'Conner noted that the  
4 Prison Litigation Reform Act also would apply to this case,  
5 to a 1983 case challenging the method of execution, and that  
6 the PLRA requires that inmates exhaust available state  
7 administrative remedies before bringing a Section 1983  
8 action challenging the conditions of their confinement.

9 She had made the analogy that a challenge to the  
10 method of execution in that case, in the Nelson case, was  
11 similar to arguing indifference to medical needs that would  
12 fall within Section 1983.

13 So, under the reasoning of Nelson, did not  
14 Mr. Hamm have to present his case and litigate these  
15 arguments before the Alabama Supreme Court before filing his  
16 case here?

17 MR. GOVAN: Absolutely not, for a whole host of  
18 reasons.

19 Number one, a 1983, as the Court held, in the  
20 United States Supreme Court in Hill, is a claim about a  
21 method of execution. That is a separate claim about a  
22 challenge to his conviction or sentence. And the proper  
23 vehicle for that is in a federal -- to challenge -- make a  
24 federal claim, it is in a federal 1983 action.

25 The Alabama Supreme Court is an appellate court.

1 It's not an administrative place to raise -- there's not an  
2 administrative process to raise challenges of confinement in  
3 the Alabama Supreme Court. There would just be no  
4 jurisdiction for that. It's not a court for taking  
5 evidence.

6 The only reason --

7 THE COURT: All right. Well, in other Section  
8 1983 cases, does not the federal court have to wait until  
9 the state court has ruled on those issues before the federal  
10 court can weigh in?

11 MR. GOVAN: No, Your Honor. Again, like, for  
12 example, several reasons to that.

13 First, number one, look at the Hallford case and  
14 the Grayson case that were cited in our briefs. In those  
15 cases, the Eleventh Circuit held that those cases were  
16 untimely, even though no execution date had even been set by  
17 the Supreme Court. And that's because --

18 THE COURT: Right. But those were all challenges,  
19 were they not, to the method of execution on its face,  
20 facial challenges as opposed to as-applied.

21 MR. GOVAN: Yes, they were.

22 THE COURT: Let's look at Seibert. Well, that one  
23 I don't think dealt with any kind of exhaustion. But that  
24 dealt with an as-applied challenge, right?

25 MR. GOVAN: I believe so, Your Honor, yes.

1 THE COURT: In Seibert, the Court -- actually,  
2 there had been two challenges. He had originally filed a  
3 facial challenge, but while that facial challenge was  
4 pending in federal court, he was then diagnosed with  
5 pancreatic cancer and hepatitis C. And the district court  
6 dismissed his initial facial challenge as being untimely,  
7 but found that his as-applied case was timely because it was  
8 filed as soon as he could have brought it which was after  
9 the diagnosis.

10 So is there not a different standard that applies  
11 to as-applied challenges versus facial challenges?

12 MR. GOVAN: On laches, Your Honor?

13 THE COURT: Yes.

14 MR. GOVAN: No, I'm not aware of any case holding  
15 that.

16 Seibert was different factually. Because the  
17 Court noted that the hepatitis C diagnosis occurred -- they  
18 filed his amended complaint, his as-applied claim one week  
19 after being diagnosed with cancer. That's factually why  
20 Seibert is different on laches, an as-applied claim, than  
21 this.

22 Second --

23 THE COURT: But my point is that you're arguing on  
24 laches that he could have and should have filed it years  
25 ago, right?

1 MR. GOVAN: Correct. Or even nine months ago. We  
2 can accept the best case for him.

3 THE COURT: We'll get to the nine months again in  
4 just a minute.

5 But clearly under Seibert, which says that the  
6 diagnosis, in essence, is what triggered his right to file  
7 an as-applied claim.

8 MR. GOVAN: Your Honor, no, that was not -- in  
9 that particular case on that ground, in that particular fact  
10 scenario, that's what it was. I would contend again the  
11 fact scenario here is different.

12 The claim in Seibert was specifically about  
13 hepatitis C and how that would affect -- that's not the  
14 same -- it's not a blanket slate for a triggering date.

15 He is arguing things --

16 THE COURT: But his facial challenge was untimely  
17 but his as-applied was not.

18 So you have to look at different things to  
19 determine the timeliness of a facial challenge versus the  
20 timeliness of an as-applied challenge.

21 MR. GOVAN: Your Honor, I don't know -- there's  
22 not a case stating that it's improper to look at the same  
23 kind of things in an as-applied case versus a facial.

24 Again, for example --

25 THE COURT: But the facial was untimely because

1 there had not been anything that changed in the protocol or  
2 the method of execution. So it was untimely.

3 But then he gets diagnosed with a medical  
4 condition that gives rise to his as-applied challenge. And  
5 because of that medical condition, his as-applied challenge  
6 was not untimely. Will you agree with me?

7 MR. GOVAN: In Seibert, yes.

8 THE COURT: So, here we have not a facial  
9 challenge to the method of execution, but an as-applied,  
10 saying that because of my medical condition that has  
11 deteriorated since all these things that contributed to the  
12 compromise of the veins have come together and it's gotten  
13 worse since 2014 when he was diagnosed with lymphatic  
14 cancer, so we somehow have to figure out, and on the record  
15 in front of me, I can't say when it was that all those  
16 things coalesced to make access to his veins more difficult  
17 and more problematic, if at all.

18 But that is his allegation and his affidavit says  
19 that things have gotten worse. And without the kind of  
20 medical information, I think we would all like to see,  
21 that's the best I have. Plus the affidavits from the nurses  
22 about their difficulty in accessing that vein.

23 But I do want to get back to the question of  
24 exhaustion. And I have got a question for you,  
25 Mr. Harcourt.

1           In your reply brief on Page 19, you cite or you  
2 argue that his claim was not ripe until he exhausted the  
3 legal claim before the Alabama Supreme Court and you go on  
4 on several pages to discuss that.

5           But I did not see any citation to any authority  
6 that that was, one, required; or two, the appropriate  
7 exhaustion.

8           You do cite generally to *Younger* and *Colorado*  
9 *River*, but I did not see any more specific citations  
10 regarding the Section 1983 challenge to execution.

11           MR. HARCOURT: Yes, Your Honor. So, on the laches  
12 claim, putting aside for a moment the issues of statute of  
13 limitations --

14           THE COURT: Okay. Maybe you didn't understand my  
15 question.

16           I want to know if there is any authority to  
17 support your exhaustion argument that the claim was not ripe  
18 until after you had fully litigated it in the Alabama  
19 Supreme Court in response to the request to set an execution  
20 date.

21           MR. HARCOURT: So, what makes the claim not ripe  
22 and not really properly before the Court until the Alabama  
23 Supreme Court has adjudicated it are these issues of comity  
24 and federalism that are in cases such as -- in the kind  
25 of -- in the following of *Younger*.

1           And I think that if you -- and that was the  
2 reason, I apologize that I was talking about equity and that  
3 I was talking about laches, because these notions of  
4 exhaustion are integrally linked to these notions of  
5 allowing the state process to have its review and not  
6 interfering.

7           Now -- so there are a couple --

8           THE COURT: So is your answer no, you don't have  
9 any case authority to support your argument that in a 1983  
10 challenged execution an inmate must pursue remedies within  
11 the state system to avoid the setting of an execution date  
12 or to litigate there the issues that he's raising in an  
13 as-applied challenge before bringing it in federal court?

14           MR. HARCOURT: Correct, Your Honor. I do not  
15 believe, I mean, on the quick research that we have done so  
16 far, Your Honor, I do not believe that there is a case that  
17 would preclude or kind of bar a 1983 lawsuit on those  
18 grounds.

19           So, in other words, it's not a question of a bar  
20 in the same context -- as in some other context.

21           THE COURT: All right. I certainly think that  
22 your argument based on Younger and Colorado River and the  
23 principles asserted in those cases and its progeny make  
24 sense. It certainly seems logical to me that if the Alabama  
25 Supreme Court has to decide whether it's appropriate to set

1 an execution date, that presenting your arguments there,  
2 before bringing it in federal court, certainly makes sense  
3 to me.

4 Mr. Govan, do you take the position that Mr. Hamm  
5 should not have tried to convince the Alabama Supreme Court  
6 that lethal intravenous injection would be cruel and unusual  
7 punishment as-applied to him before it set an execution  
8 date?

9 MR. GOVAN: Yes, Your Honor. I mean, that  
10 specific claim is a method of execution claim that is  
11 appropriate in a 1983.

12 Because, again, for two reasons. Again -- going  
13 all the way back to Hill --

14 THE COURT: So he should never have presented this  
15 argument to the Alabama Supreme Court?

16 MR. GOVAN: He --

17 THE COURT: And just let them go on and set an  
18 execution date and then -- or file his 1983 case at that  
19 time so that you have the simultaneous things going on.

20 MR. GOVAN: He certainly could have done that and  
21 he did. But that is a different question whether that was  
22 proper to do and whether, under a laches argument, that act  
23 somehow tolls the time, which it doesn't.

24 Again, because again, if you look back to all the  
25 case law we have, Williams vs. Allen, someone is looking to

1 reasonable proof regard for the rights we know that once  
2 your federal habeas petition is done, the last obstacle is  
3 setting an execution date.

4           And if you want to pursue a federal method of  
5 execution challenge in 1983, the place to go is to federal  
6 court.

7           And just as a practical matter, pretty much every  
8 execution date that is set or that is litigated in the  
9 Alabama Supreme Court when you file a motion, there is  
10 corresponding 1983 actions that are going on either before,  
11 during or after. It's two separate issues.

12           And looking at the Alabama Supreme Court, the only  
13 reason why that's the Court that would set the execution  
14 date, is under Rule 8 of the Alabama Rules of Appellate  
15 Procedure, that's the Court that lifts the stay from an  
16 execution at the appropriate time. And the appropriate time  
17 is when all the traditional appeals are exhausted.

18           Method of execution claim, even as-applied, is a  
19 separate thing. It's not challenging the conviction or  
20 sentence, which an Alabama Court is looking at. It's  
21 asserting a federal constitutional claim about an as-applied  
22 challenge that should be brought in federal court.

23           And the fact that he litigated that or tried to  
24 litigate it in the Alabama Supreme Court is more example of  
25 the fact that he could have brought that in federal court

1 where it belongs, because it's not a challenge to a  
2 conviction or sentence, allegedly --

3 THE COURT: But it's a challenge to the execution,  
4 is it not? Or the execution as-applied by the Department of  
5 Corrections?

6 MR. GOVAN: Well, if he -- as I understand it, by  
7 bringing this claim in a 1983, the whole purpose of a 1983  
8 is he is not challenging the sentence. He cannot bar the  
9 sentence.

10 THE COURT: Right. I didn't express that  
11 correctly. It's challenging the implementation of the  
12 execution at a particular time.

13 MR. GOVAN: That's correct.

14 THE COURT: Right? And was he not asking for an  
15 opportunity to explore the medical condition of Mr. Hamm  
16 before setting a date for execution?

17 MR. GOVAN: He was certainly asking for that, but  
18 whether that was proper or the Alabama Supreme Court could  
19 do something about it, for instance -- that is --

20 THE COURT: Well, let me ask you this: If it  
21 wasn't proper, why did the Alabama Supreme Court give him  
22 more time and why did the Alabama Supreme Court, whatever it  
23 did, allowing the examination by Dr. Heath of Mr. Hamm?

24 If that was improper for the Alabama Supreme  
25 Court, why didn't it just say, huh-uh, forget it, we're not

1 going to even consider your arguments.

2 MR. GOVAN: I don't know -- they didn't give a  
3 reasoning for that. I just know from their past practices,  
4 inmates, when motions for execution dates are set, inmates  
5 routinely ask for additional time for a variety of reasons  
6 and the Alabama Supreme Court grants them. That's not  
7 unusual.

8 Again, the fact is that -- and another thing, too,  
9 why it would be -- if that's what he's saying, there would  
10 be no -- the Alabama Supreme Court can't take evidence, it's  
11 a fact-finding court. There is nothing pending in any state  
12 court that they could even remand to or grant a stay for, so  
13 there's no mechanism they could have really done anything to  
14 address these specific claims. And that's because these  
15 specific claims are not something that would come up in a  
16 typical state post-conviction proceeding.

17 These are as-applied method of execution claims  
18 that are routinely and always brought as a 1983 in federal  
19 court. That's why it should have been brought earlier.  
20 That's why the fact that he was filing things in the Alabama  
21 Supreme Court has nothing to do with the unreasonable delay  
22 in filing the federal court action.

23 THE COURT: All right. Well, if we're looking at  
24 the question of unreasonable delay, and we're talking about  
25 a delay of six months or so, I think you may say nine

1 months, but I'm not sure when it was clear and that's  
2 something that I think still raises question of fact, but  
3 some time in the spring, let's say it became questionable as  
4 to whether he would have any veins that would support, not a  
5 small butterfly needle, but a large gauge catheter, and here  
6 we have an argument that that delay, for equitable reasons,  
7 trumps or thwarts any equitable considerations of making  
8 sure that the execution that will go forward at some time in  
9 some method is not going to be an unconstitutional one, that  
10 it's not going to produce unnecessary pain and suffering so  
11 as to rise to the level of cruel and unusual punishment.

12 I recognize that the Courts have emphasized that  
13 the State does have a significant interest in carrying out  
14 its sentence, but we're talking about thirty years on death  
15 row and you're making a big deal about a delay of possibly  
16 nine months.

17 So where do the equities really shake out there,  
18 Mr. Govan?

19 MR. GOVAN: Your Honor, the equities would lie in  
20 favor of the State. The fact that he has been on death row  
21 for thirty years weighs in favor of the State's right to be  
22 able to carry out a lawful execution for the victims of this  
23 crime, for the administration of justice, that fact lies in  
24 favor of the State.

25 And the fact that, again, his federal habeas

1 litigation was pending until October of last year, State  
2 moved in June -- excuse me, October of 2016, the State moved  
3 in June of 2017 to set his execution date, and if this, as  
4 the Courts have noted, these types of cases, they don't have  
5 to, but they tend to take a long time. And the fact that  
6 those cases could take up to a year weighs in favor of the  
7 State, when a stay is at issue or a last minute lawsuit is  
8 filed, and the equitable reasons that allow that lawsuit to  
9 continue to go on.

10           So nine months does make a big difference if  
11 you're trying to litigate this.

12           Again, when we say nine months, that's the best  
13 case scenario for Mr. Hamm.

14           Again, we point out in our brief, there's a lot --  
15 his own allegations support that this could be something  
16 that he could have brought earlier.

17           When we're talking about the length of delay, the  
18 long thirty years that the victims of his crimes have waited  
19 or the State has waited to carry out this lawful sentence,  
20 yes, nine months does matter, because this will delay this  
21 case for years.

22           And the best example of that is the Nelson case  
23 that Mr. Hamm cites all over in his brief. The lawsuit was  
24 initially filed in 2003. The U.S. Supreme Court decided in  
25 2004. Five years later, that litigation was still going on

1 when Mr. Nelson finally died in 2009. That is an extremely  
2 cautionary tale of the lengths of -- delay in this case.

3 And --

4 THE COURT: Well, let me allay those fears. If I  
5 deny your motion and if I allow this case to go forward, it  
6 will not be a five year delay. It will be a prompt  
7 resolution of the medical issues and protocol issues.

8 It will be my highest priority to see that it is  
9 done promptly and not a five year delay.

10 MR. GOVAN: Thank you, Your Honor. And I  
11 appreciate that very much. And I'm sure the victims of  
12 Mr. Hamm's crime appreciate that as well. I understand the  
13 importance of this.

14 We would just contend that even any delay, his  
15 execution has been set by the Alabama Supreme Court, any  
16 delay would weigh against Hamm and in favor of the State in  
17 granting the motion for summary judgment and the denial of  
18 the stay.

19 THE COURT: Let me ask you about another equitable  
20 consideration.

21 You have argued that Mr. Hamm has no certain  
22 medical evidence to support his allegations. Who controls  
23 access to medical care for Mr. Hamm?

24 MR. GOVAN: Obviously the Department of  
25 Corrections.

1 THE COURT: Okay. Who controls whether he can get  
2 some type of scan, a PET scan, CT scan, MRI, whatever?

3 MR. GOVAN: The Department of Corrections would.

4 THE COURT: Okay.

5 MR. GOVAN: I would say, based on a lot of times  
6 like evidence in this case, but what referring physicians in  
7 the past have requested, and again, there's PET scans and CT  
8 scans, there's nothing recent that would suggest that any  
9 outside physicians or oncologists have suggested that is a  
10 necessary thing in Mr. Hamm's case.

11 THE COURT: Well, there is evidence that in 2014,  
12 in 2015, the doctors requested or suggested a PET scan and  
13 that was never done.

14 And I think medical evidence would support a  
15 finding that that is the most determinative test that can be  
16 done to address questions of cancer.

17 But, my next question is, who controls access to  
18 Mr. Hamm's medical records?

19 MR. GOVAN: The Department of Corrections.

20 THE COURT: Okay. And Mr. Harcourt requested  
21 those medical records in January of 2017, correct?

22 MR. GOVAN: I believe that is -- is that correct?  
23 I believe that's correct.

24 THE COURT: I think we have an affidavit to that  
25 affect in the record.

1           And the Department of Corrections -- and there  
2 were repeated efforts to get those. The Department of  
3 Corrections didn't provide those to him until July of 2017.

4           So we have a six, six-and-a-half month delay by  
5 the Department of Corrections in providing Mr. Harcourt with  
6 records that he needed to assess his client's condition.  
7 And shouldn't I take into account in balancing the equities  
8 that the Department itself may have some responsibility for  
9 the delay in the filing of this suit?

10           MR. GOVAN: Your Honor, that would be certainly  
11 something you would need to weigh. But even when weighing  
12 that, that still falls down on against Mr. Hamm.

13           Let's assume that it took, for a variety of  
14 reasons, number one, let's assume that -- and it's not even  
15 clear that the fault for how long it took is the Department  
16 of Corrections' fault. I know he has made these allegations  
17 it's taken this long. I don't know in the record if it's  
18 clear that he followed all the proper channels to get them.

19           Second, assuming that it happened in July, that's  
20 still almost six months until he files his 1983 action.

21           And third --

22           THE COURT: And did he not start shortly  
23 thereafter trying to get access to his client for Dr. Heath  
24 to do an examination?

25           MR. GOVAN: I don't know when -- I'm not sure

1 there is evidence in the record of when he specifically  
2 started -- other than in the -- I think his August 8th  
3 filing in the Supreme Court he mentioned he was trying. But  
4 I don't know --

5 THE COURT: Yes, which was within a month after  
6 receiving the medical records he began that process.

7 MR. GOVAN: Correct. And he produced a  
8 preliminary report from Dr. Heath at that point. And  
9 clearly, without a shadow of doubt at that point, if he's  
10 trying to raise claims, which he did, about venous access in  
11 his filings in the Alabama Supreme Court, he certainly could  
12 have filed a challenge in federal district court, even  
13 before he conducted the actual evaluation.

14 THE COURT: Well, then there would have been an  
15 argument, like you're making now, that there is absolutely  
16 no medical evidence to support his claim.

17 And if I'm not mistaken, Dr. Heath did his exam  
18 and his report in September, am I correct on that date,  
19 Mr. Harcourt?

20 MR. HARCOURT: Yes, Your Honor. September 23rd  
21 was the examination and October 1 was when the report was  
22 filed, was written and filed.

23 THE COURT: Okay. So the report was October the  
24 1st?

25 MR. HARCOURT: October 4th is the date of the

1 report, yes.

2 THE COURT: Okay. So we have got a report October  
3 4th. Then that gets us closer to December 23rd when this  
4 case was filed.

5 MR. GOVAN: December 13th, Your Honor.

6 THE COURT: December 13th. So we're talking about  
7 two months now.

8 MR. GOVAN: That's correct. If I could back up --

9 THE COURT: Two months from the time when Mr. Hamm  
10 had some medical evidence to support his allegation that his  
11 veins had deteriorated to the point where there was only one  
12 tiny vein in his right hand that could be accessed for a  
13 butterfly needle.

14 MR. GOVAN: Your Honor, that's when he filed his  
15 report, but that's still not evidence that it could not have  
16 been done earlier. Because, again, the whole reason he was  
17 asking for the evaluation in the first place in August was  
18 because he claimed that a review of the medical records  
19 supported the fact, in a preliminary statement from  
20 Dr. Heath, that there was substantial concerns about his  
21 peripheral venous access.

22 So, again, he had that knowledge even before  
23 Dr. Heath's report, enough to be able to file a complaint  
24 with a good faith allegation and seek discovery which might  
25 be an evaluation of Mr. Hamm -- that would have been enough

1 to raise a good faith allegation in just general pleading --  
2 in a 1983 action, that certainly could have been raised  
3 before.

4           Back to the medical records, Your Honor. I think  
5 the fact that, the larger point I think you mentioned that  
6 we made the argument there's nothing in the record showing  
7 that there is venous access problems or some nexus between  
8 cancer and the venous access problems, that further supports  
9 the fact that -- why it took until July to get the medical  
10 records was not an impediment to filing a lawsuit because  
11 there is nothing in those records that really bolster that.  
12 All that is coming from this are his self reports,  
13 Mr. Hamm's self reports to Dr. Heath about things that  
14 happened in 2014, self reports in his affidavit about it  
15 being more difficult in March of this past year, but there's  
16 nothing in those medical records that really support that.

17           So in weighing the equities in this case, the fact  
18 that he had the medical records in July is enough but didn't  
19 inhibit him from filing a lawsuit on good faith allegations.

20           THE COURT: I beg to differ. I think there is at  
21 least the initial examination in March that confirmed that  
22 there were palpable knots in his chest and abdomen area, if  
23 I'm not mistaken.

24           I have actually, I think, asked most of the  
25 questions I have regarding the question of the timeliness of

1 this case.

2 Let me just quickly look back and make sure.

3 (Brief pause)

4 THE COURT: I think I have covered my questions.  
5 Is there anything else that either of you would like to say  
6 on the issue of timeliness?

7 MR. HARCOURT: Your Honor, may I respond to some  
8 of the points? There was a lot covered. And I just wanted  
9 to quickly touch on a few points.

10 On this question of 1983 and the equitable  
11 considerations and laches, I would like to say that, I mean,  
12 this is kind of turning the whole history of the 1983  
13 statutes in a federal civil rights kind of upside-down.

14 The history of Section 1983 is to give federal  
15 courts the avenue where state courts fail to uphold federal  
16 rights. It's not intended to be a way to avoid state  
17 courts. It's not intended to be a way to bypass -- it's  
18 suppose to treat state courts as, respectfully, equally to  
19 allow them to address these issues.

20 And if -- it's kind of like, if that doesn't  
21 happen, then one can go to federal court under Section 1983.  
22 It's where the state courts fail. And that's what happened  
23 in this case.

24 And there is comity and there are issues of  
25 federalism under Younger and a number of cases following

1 Younger that would militate against intervening.

2 In fact, even in habeas corpus, you know, you can  
3 move the federal court to hold a case in abeyance while you  
4 have to litigate a state issue because, for instance, there  
5 might be a state issue where the state courts have to  
6 decide. And I've done that. I did that in 1992. We held a  
7 case in abeyance in federal court because it was a state  
8 issue.

9 So, these issues are -- it seems to be flying in  
10 the face and entirely disrespectful of the relationship  
11 between the federal and the state judiciary to say you  
12 immediately have to file a 1983 lawsuit in federal court and  
13 not care about what the states are doing.

14 So I would -- I wanted to quickly say that.

15 In terms of the delays, we did speak a little bit  
16 about my request on January 19th, 2017 to get the records,  
17 which took until July 20th. I have a quick slide on this.

18 THE COURT: I'm with you on that.

19 MR. HARCOURT: Another one is the protocol, Your  
20 Honor, and that's another very big delay.

21 THE COURT: Which I have not had a chance to read  
22 at all and I want to look at that.

23 MR. HARCOURT: We got it yesterday as well. Let  
24 me just state, Your Honor, in terms of that delay, I  
25 originally asked for the -- now -- well, actually, I would

1 like to very quickly go over a little bit of the timing and  
2 some of the steps that were not explicitly discussed by the  
3 defendants in this case because -- and the request for the  
4 lethal injection protocol is a big piece of that.

5 But just to correct something that was said. When  
6 I filed my first motion to respond to the Alabama Supreme  
7 Court on July 11, 2017, and this in the plaintiff's  
8 exhibits, which is Exhibit 11, Plaintiff's Exhibit 11, it's  
9 in the one that's got the forty-four exhibits.

10 THE COURT: Okay.

11 MR. HARCOURT: Exhibit 11 -- I mean, to go very  
12 quickly over the timing here.

13 I had requested the records on January 19th,  
14 that's Plaintiff's Exhibit 9, and followed through a few  
15 times. Ultimately feeling that I needed some documentation  
16 of this, I sent an email on June 29th saying --

17 THE COURT: I follow all that. I've got that.  
18 I'm with you on that.

19 MR. HARCOURT: When I originally asked for more  
20 time, I did not know what the venous condition was. And  
21 it's clear from the first page, undersign counsel has  
22 requested -- hold up, it's not possible to assess the  
23 multiple risks that Mr. Hamm faces within execution. It's  
24 not as if -- it takes the records to know what the risks are  
25 in a case like this, with an individual who has had a

1 lengthy medical history, et cetera.

2 THE COURT: But then, if that individual has not  
3 received recommended follow-up treatment or recommended  
4 evaluations, it makes it even more difficult, does it not?

5 MR. HARCOURT: Yes, Your Honor. I mean, in other  
6 words, first I needed the records. Then -- and they're not  
7 complete in the sense that I'm not able to actually draw on  
8 them because of missing PET scans, et cetera, to make my  
9 case.

10 But I needed, first, to get the records in order  
11 to understand how his condition would interfere with a  
12 possible lethal injection.

13 And this was going very fast, Your Honor. That  
14 was filed on July 11th asking to get the records. I didn't  
15 get the records until July 20th.

16 On August 6th, I had a one-hour telephone  
17 consultation with Dr. Heath, it was on a Sunday. Dr. Heath  
18 is in the operating room every day of the week. This is on  
19 a Sunday, October 6th. That is in the record on Page --

20 THE COURT: Yeah. And I'm aware of those delays  
21 and the reason for them.

22 MR. HARCOURT: I originally asked for the lethal  
23 injection protocol from counsel for the defendants on  
24 August -- excuse me, on -- I had written all this down,  
25 August 28th. And it's exhibit --

1 THE COURT: And you received those today.

2 MR. HARCOURT: Exhibit 16. I asked for --

3 THE COURT: You received them yesterday, not  
4 today. I got them today.

5 MR. HARCOURT: Yes, you're right. August 28th.  
6 The response was that I was not entitled to them, that's  
7 Exhibit 18.

8 On September 7th, I received a letter from counsel  
9 for the defendants, Exhibit 18, saying, on September 7th  
10 that I'm not entitled to the lethal injection protocol.

11 I followed that up with a letter on September  
12 11th, Exhibit 20, saying I don't understand why. I'm an  
13 officer of the court. I will do anything, confidentially,  
14 we have now signed a confidentiality agreement. I  
15 specifically said, I will, of course, retain the protocol as  
16 confidential, privilege document, it's not given to -- I  
17 won't give it to anyone. I'm understanding that as counsel  
18 for an inmate who is going to be executed, I should have  
19 access to the protocol.

20 I also don't understand why the protocol actually  
21 isn't a public document. I believe it's a public document  
22 in every other state. But in any event, it was withheld  
23 from me. September 11th. I specifically asked the Court,  
24 the Alabama Supreme Court, to order that I -- that I receive  
25 the protocol. And that was on -- that's Exhibit 22,

1 Paragraph 2. These are my weekly updates. I'm filing --  
2 Alabama Supreme Court has asked me to file weekly updates.  
3 I'm updating them on everything I'm doing.

4 On the fourth weekly update, on September 22,  
5 Paragraph 2, I specifically say, to date, undersigned  
6 counsel has still not received any information about the  
7 protocol. Undersigned counsel renewed its request,  
8 therefore, it would be necessary to -- discuss, to discuss  
9 these issues.

10 In my pleading with the Alabama Supreme Court  
11 filed on October 2nd, which is Exhibit 25, which was  
12 basically my, you know, my response in which I included  
13 Dr. Heath's report and a few other things. I specifically  
14 asked them for the kind of process that would be appropriate  
15 in a case like this. The kind of process that would make it  
16 possible even for me to know whether there's a  
17 constitutional violation under the protocol.

18 And I asked -- so, this is Exhibit 25, Page 17,  
19 actually Page 16 -- actually, Your Honor, Page 15 of Exhibit  
20 25. I apologize. Where I say, first, the Court should  
21 order the Attorney General to confidentially disclose to  
22 undersigned counsel the exact protocol for venous access,  
23 the list of medical equipment that will be used. Those are  
24 things that are absolutely necessary in this case, Your  
25 Honor.

1           If the State believes that it's going to be doing  
2 central venous access -- we'll go into -- we'll go into  
3 these in camera, but it would be very normal for a counselor  
4 in any litigation of this type to ask for the protocol, to  
5 ask for the list of medical equipment that is actually going  
6 to be used so that the attorney can have some idea of what's  
7 going to happen, including the gauge and length of the  
8 catheters and the needles. And I haven't received anything.

9           I needed that in order -- I actually, Your Honor,  
10 it's almost as if this case is not ripe until yesterday when  
11 I received the lethal injection protocol.

12           It's probably, I would say, that under principles  
13 of Younger and equitable laches, it's only yesterday that I  
14 can prove my case.

15           I also asked the Court to appoint a special master  
16 to ensure that it would be a good protocol. And I'm  
17 addressing the Alabama Supreme Court here. They are the  
18 ones who are setting an execution date. They are the ones  
19 who, in the State of Alabama, is going to be the one who --  
20 the second most harmed entity in the event of a botched  
21 execution.

22           Because if, in fact, there is not venous access,  
23 which is something we're going to have to prove, although I  
24 believe that it's pretty well established, but that would be  
25 for an evidentiary hearing, if that's the case, what happens

1 in other states when there are these botched executions like  
2 this because of a catheter going into flesh rather than a  
3 vein and infiltrating the skin is that executions are shut  
4 down in the state.

5 So, I am speaking to the Alabama Supreme Court  
6 here. I ask them for an opportunity to be heard so that we  
7 could put together a protocol that would be acceptable to  
8 all parties and that wouldn't violate -- and wouldn't be  
9 cruel and unusual punishment.

10 As you see Exhibit 26, the Court orders a response  
11 from the State of Alabama on that.

12 So -- and on and on. I did not -- I did not  
13 receive the protocol until yesterday. So there's a time  
14 there that also I believe from an equitable laches  
15 perspective is relevant.

16 Then finally, the last point is, I have also been  
17 trying to always update and get all of the most recent  
18 medical records. In the litigation at the Alabama Supreme  
19 Court, when I filed my response on October 2nd, counsel for  
20 the State, so my response was 25, I don't think I have the  
21 State's response, but in Exhibit 27, which was my response  
22 to the defendant's response, it's clear, they all of a  
23 sudden were putting in new records of things that had  
24 happened since I had gotten my records out of nowhere.  
25 Okay? In fact, I think, somewhat misleadingly, they were

1 saying that a physician with the Department of Corrections  
2 had indicated, this is footnote one on Page 2, that a  
3 physician for the Department of Corrections indicated that  
4 there's no evidence of ocular lymphoma, et cetera, and there  
5 had been work and there had been medical work that had been  
6 done since I had gotten the records that haven't been turned  
7 over to me, I didn't have access to any of these medical  
8 records that were being done while this was going on. And,  
9 you know, something about a physician, it's not even a  
10 physician, it was some practitioner, I don't know. In any  
11 event, they were conducting examinations that were then  
12 being turned over to counsel that were then being introduced  
13 to the Alabama Supreme Court without me -- without me being  
14 able to in any way examine, in any way get those records.

15 So, I have been always trying to have the most  
16 recent records. I will -- my interest is that everything is  
17 in front of the Court, all the records are in front of the  
18 Court. I have desperately tried to get his records since  
19 what I got in July 20th. And --

20 THE COURT: Mr. Harcourt, maybe I can cut this  
21 short by telling you that I'm going to deny the motion, if  
22 you'll give me time to do it.

23 MR. HARCOURT: Yes, Your Honor.

24 THE COURT: As I stated earlier, the standard for  
25 summary judgment, which is what the defendants seek here, is

1 whether there are any genuine issues of material fact.

2 I find that there are quite a few genuine issues  
3 of material fact that go to the question of the timeliness  
4 of Mr. Hamm's complaint.

5 The biggest issue in my opinion is whether, as  
6 Mr. Hamm claims in his affidavit, which I have to accept as  
7 true at summary judgment stage for purposes of summary  
8 judgment, he claims that his access to his veins worsened in  
9 the spring of 2017.

10 If that is, in fact, true, then that would be when  
11 the statute of limitations would begin to run for filing of  
12 his as-applied challenge to the method of execution.

13 So, the statute of limitations argument would be  
14 barred, and that's based upon my reading of the Seibert case  
15 that in essence recognize that his as-applied claim arose  
16 when the medical condition was diagnosed that raised  
17 questions about the constitutionality of that execution.

18 I also note that there is no way that he could  
19 have filed this case in 2004 within two years of the  
20 adoption of the lethal injection standard because he's not  
21 challenging lethal injection as itself being  
22 unconstitutional.

23 There are issues of timeliness involving laches,  
24 and I know that that time period can be shorter than a  
25 statute of limitations time period.

1           But assuming that the plaintiff's medical  
2 condition became worse in the spring of 2017, the question  
3 then is whether the plaintiff unreasonably delayed in filing  
4 this Section 1983 claim.

5           I think the Nelson case gives some support to the  
6 argument made by Mr. Harcourt that State remedies should be  
7 exhausted before filing a 1983 claim challenging the method  
8 of execution.

9           Exactly what that means, I don't think has been  
10 fleshed out in subsequent cases, but it does seem reasonable  
11 to me for plaintiff's counsel to have believed that raising  
12 these issues in front of the Alabama Supreme Court was an  
13 appropriate step before filing the case here.

14           So I find that belief, whether legally correct, to  
15 be a reasonable one and to defeat the argument that Mr. Hamm  
16 unreasonably delayed or was dilatory in filing the 1983  
17 action.

18           Also, when looking at the equities involved, I do  
19 think that I have to consider the fact that plaintiff's  
20 counsel diligently tried, since January of this year, to  
21 obtain medical records and did not obtain them until July,  
22 so -- I'm sorry, I don't think a plaintiff should waltz in  
23 to court making allegations about a medical condition  
24 without having at least reviewed medical records to support  
25 that kind of claim. And the efforts to obtain them were

1 delayed, I'm not putting fault either place, but recognizing  
2 that there was a delay and that additional records have been  
3 produced subsequent to July that bear upon Mr. Hamm's  
4 condition.

5           These genuine issues of fact play into my  
6 determination that there was not undue delay that would  
7 justify application of laches here.

8           I recognize that Courts have recognized the  
9 equitable interest of the State in carrying out the  
10 execution in a timely fashion, but I cannot say that that  
11 outweighs the mandate of this Court to apply the  
12 Constitution of the United States equally and appropriately.

13           And I think the equities in this case lie in favor  
14 of exploring the plaintiff's claim and making sure that the  
15 execution, which will happen at some point, does not violate  
16 his constitutional right to be free from cruel and unusual  
17 punishment.

18           So, as I mentioned to y'all in chambers, I will  
19 try to get a written order to that affect out within the  
20 next week or so, but that's my ruling on it.

21           We will then take up the merits of the request for  
22 a preliminary injunction, although I think it's really more  
23 important or more appropriate this time to evaluate whether  
24 a stay would be appropriate, even though not specifically  
25 requested, there's authority for the Court in doing that, so

1 that we can get some of these questions answered and move  
2 forward as promptly as possible.

3 We will take that issue up at, I said we would  
4 reconvene at 1:30, I'm going to be out of the office for a  
5 while and I need to review those protocols before we get  
6 into that issue.

7 So let's meet back here then at 2:00 o'clock to  
8 start the second phase. Okay. Does that work?

9 MR. GOVAN: Yes, Your Honor.

10 MR. HARCOURT: Yes, Your Honor.

11 THE COURT: Okay.

12 (Lunch recess)

13

14 (Sealed in camera conference held)

15

16 (Open court)

17 THE COURT: You may proceed.

18 MR. GOVAN: We call Mark Heath.

19 MARK HEATH, SWORN

20 THE CLERK: State your first and last name for the  
21 court.

22 THE WITNESS: My first name is Mark, M-A-R-K,  
23 Heath, H-E-A-T-H.

24 THE COURT: Just for the record, Dr. Heath, we're  
25 going to make that oath retroactive to your prior testimony,

1 okay?

2 THE WITNESS: Yes.

3 THE COURT: All right. You may proceed. Let me  
4 state for those who are in the courtroom, we have not taken  
5 an extremely long lunch hour. We have been working for the  
6 last several hours on issues related to the Department of  
7 Corrections' protocol for lethal injection execution that is  
8 a confidential document so, therefore, the information  
9 regarding that had to be maintained confidential.

10 I just wanted you to know we have been working  
11 while you have been wondering where we were.

12 You may proceed.

13 MR. GOVAN: Thank you, Your Honor.

14 CROSS-EXAMINATION

15 BY MR. GOVAN:

16 Q Dr. Heath, I'm Thomas Govan from the Attorney  
17 General's Office.

18 Do you have your reports in front of you?

19 A I do not.

20 Q Okay.

21 MR. GOVAN: Your Honor, if it would be -- if it's  
22 okay, I would like to provide him with a copy of his report  
23 so we can reference that, I have some questions to ask him.

24 THE COURT: That is certainly fine.

25 MR. GOVAN: For the record, I'm going to be giving

1 Dr. Heath his preliminary report and follow-up report which  
2 are Exhibits 1 and 2 in plaintiff's exhibit list.

3 Q Dr. Heath, you mentioned that your daily practice  
4 involves obtaining both peripheral and central intravenous  
5 access, correct?

6 A Correct.

7 Q And just to make sure we're on the same terms,  
8 peripheral -- in laymen's terms, peripheral intravenous  
9 access means inserting an IV catheter into a peripheral vein  
10 on a person's extremities that is usually visible or  
11 palpable or something to that effect.

12 A Yes.

13 Q Okay. And you mentioned you do that for the purpose  
14 of administering anesthetic agents to induce general  
15 anesthesia.

16 A Usually sometimes to give fluid or blood or other  
17 purposes, but usually for inducing anesthesia and then it  
18 gets used for many other things during the operation.

19 Q But for all those things would be intravenous  
20 administration of fluids or agents; is that correct?

21 A Yes.

22 Q You would agree with me, while you're an  
23 anesthesiologist, you do not need to be an anesthesiologist  
24 to be able to insert or establish an IV line?

25 A That's correct.

1 Q You could be a nurse?

2 A Correct.

3 Q EMT?

4 A Correct.

5 Q Physician's assistant?

6 A Correct. The important thing is one has had the  
7 training and experience to know how to do it.

8 Q And you would agree with me that twenty to twenty-two  
9 gauge catheters are sufficient to establish an IV line; is  
10 that correct?

11 A Depends for what purpose.

12 Q For administering medicinal agents, intravenous  
13 agents.

14 A Again, it depends on the -- on what the volume is  
15 going to be administered and how quickly it needs to be  
16 administered.

17 A twenty-two gauge IV is a very small IV. I think  
18 if you look in Dr. Bagley's report, he has some discussion  
19 about the sizes and twenty-two gauge is smaller than I  
20 prefer to use. Sometimes I need to use them.

21 Q So you have used a twenty-two gauge IV catheter to  
22 establish IV lines in the past?

23 A Yes, many times.

24 Q You would agree with me also that a butterfly needle  
25 can be used to establish an IV line?

1 A It can be, but that is an inferior way of doing it.

2 Q What size of butterfly needles can be used to  
3 establish an intravenous line?

4 A Any size that's smaller than the vein can be used.  
5 It depends on what the purpose is, what it's going to be  
6 used for.

7 Q Can you give me some examples of sizes?

8 A In general, in general, the larger the better, you  
9 can give volume and drugs more quickly. I don't ever use  
10 butterflies for injecting drugs. I can't think of ever  
11 having done that in over twenty thousand cases.

12 Q You have never used that?

13 A I don't believe I have ever used a butterfly for  
14 injecting drugs.

15 Q You agree it's possible to use that to inject drugs  
16 intravenously?

17 A Yes.

18 Q You examined Mr. Hamm on September 23rd, 2017, at  
19 Donaldson Correctional Facility?

20 A That sounds right, yes.

21 Q Based on your examination, you would agree with me  
22 that Mr. Hamm does have some peripheral venous access?

23 A Yes.

24 Q You found a vein at the dorsum of Mr. Hamm's right  
25 hand that you said could be accessible.

1 A It's potentially accessible. I would consider myself  
2 fortunate to establish a functioning IV in it.

3 Q And you would agree with me that the dorsum of a hand  
4 is a place that can be used clinically to establish an IV  
5 line, correct?

6 A Yes.

7 Q You said in your report that inserting an IV catheter  
8 into this vein in Mr. Hamm's case would be challenging, but  
9 would you agree with me that if you used a butterfly IV  
10 needle that that would present less of a challenge of  
11 establishing an IV line in that particular vein?

12 A It would be a very inferior IV access point. I don't  
13 think most anesthesiologists would want to use that.

14 Q But that would be a possibility -- that is a  
15 possibility for establishing an IV line, correct?

16 A Technically, yes. But the access would be of such  
17 poor quality that one would be extremely reluctant to use  
18 it.

19 Q Okay. Dr. Heath, you mentioned that you examined, I  
20 think on Page 3 of your report, Mr. Hamm's hands and arms  
21 for venous access.

22 What did you specifically do to examine his arms?

23 A I had him bare his arms because he had his shirt on.  
24 I would normally use a tourniquet to make the veins distend,  
25 but we weren't allowed to bring -- I wasn't allowed to bring

1 any medical equipment of any kind or really bring anything  
2 into the examining -- into the prison. And so I used a tie  
3 as a tourniquet and put that around his upper arm, and then  
4 carefully went over by visual and palpation, visual  
5 inspection and palpation looking for evidence of veins.

6 Q What about on his feet, what did you do?

7 A Same thing. Well, tourniquet was on his legs, but  
8 the same.

9 Q Where did you place the tie as a tourniquet on his  
10 leg?

11 A I don't recall exactly, but I would normally place it  
12 up on the calf, up near the knee.

13 Q You stated in your report, I believe, when referring  
14 to Mr. Hamm's legs and feet that you stated -- that he  
15 related that all of his veins on those extremities were,  
16 quote, used up by chronic intravenous drug use.

17 Do you recall that from your report?

18 A It sounds familiar, but can you point me to where it  
19 says that?

20 Q I believe it's on Page 3, Paragraph 7.

21 A My Page 3 doesn't have paragraph numbers.

22 Q Yes. So, it's -- paragraph of the previous page,  
23 three lines down on Page 3. This is on Exhibit Number 1 of  
24 plaintiff's exhibits.

25 A I see what you're talking about.

1 Q Is that -- is that something that Mr. Hamm directly  
2 told you?

3 A I spent a number of minutes going -- asking him  
4 questions about his intravenous drug history. I don't  
5 remember whether I asked him about it or whether, you know,  
6 in the flow of conversation whether it was something he told  
7 me he volunteered or whether I explicitly asked.

8 But I was asking a lot of questions about the  
9 sites that he -- the specific sites in his body that he used  
10 for injecting drugs.

11 Q And what were those specific sites?

12 A Really everywhere. It's a tragic thing when people  
13 are compellingly addicted to substances and they inject  
14 everywhere where they can find access. In addition to all  
15 the normal places in the hands and the arms and feet and  
16 legs, he described injecting into his neck, into his mouth,  
17 into his penis, basically everywhere you could imagine.

18 Q Those other places don't have an affect necessarily  
19 on peripheral IV veins, correct?

20 A Those are all peripheral IV lines.

21 Q Talking about heads and things of that nature, mouth,  
22 that's not related to peripheral IV access, correct?

23 A No. Those are all peripheral veins that he was  
24 injecting into, so they are peripheral IV access.

25 Q Did you review Mr. Hamm's medical records in

1 preparation for your evaluation?

2 A Partially, yes.

3 Q Did you --

4 A I'm sorry. I have been sent a lot of medical  
5 records. I reviewed them when I was sent them and then also  
6 some of them in preparation for this hearing.

7 Q Did you find any records confirming that he had  
8 compromised veins?

9 A I did not see anything in the records explicitly  
10 showing that. In talking with him, he told me about IV  
11 access that had been obtained during procedures that were  
12 referred to in the records and I could corroborate what he  
13 told me with what they did. For example, in 2014, with  
14 difficulty they were able to get a catheter into his right  
15 hand.

16 Q I want to follow back up on that in a minute.

17 But outside of what he told you, you saw nothing  
18 in the medical records that established -- that confirmed  
19 that he had difficulty establishing IV veins in any  
20 procedures?

21 A Only in the affidavits that I received later, but not  
22 in the actual medical records.

23 Q Okay. You mentioned a procedure in 2014. And you're  
24 aware that a biopsy was conducted in 2014 of what turned out  
25 to be orbital -- left orbital lymphoma?

1 A Yes.

2 Q And in that procedure you would agree that the report  
3 from the UAB medical staff indicated they achieved general  
4 anesthesia for that without any difficulty?

5 A That was my sense, I don't remember them saying  
6 without any difficulty, but that was my sense that the  
7 procedure had gone smoothly.

8 Q So at least in that procedure there was no difficulty  
9 achieving intravenous access, correct?

10 A No. Based on what Mr. Hamm told me, there was  
11 difficulty achieving access, but they did achieve it and  
12 were able to successfully induce and maintain anesthesia.

13 MR. GOVAN: I have Exhibit 8 from Petitioner's  
14 exhibits or Bates stamp 163. I would like to approach the  
15 witness to show this or put it up on the elmo, if that's  
16 possible.

17 THE COURT: We've got an elmo. It's not hooked  
18 up. It may take a minute to get ready. Do you want to show  
19 that to him?

20 MR. GOVAN: Yes, Your Honor, if that's okay. I'd  
21 like to approach.

22 THE COURT: Okay.

23 Q (By Mr. Govan) Dr. Heath, this is from Plaintiff's  
24 Exhibit Number 8, Bates stamp 163, it's a UAB medicine  
25 report. And if you look, I can come around.

1 A Sure.

2 Q And if you look, it states, type of anesthesia,  
3 general. And if you look down at summary, operation, says,  
4 patient arrived in operating room, stable condition, general  
5 anesthesia was achieved with no difficulty. Do you see  
6 that?

7 A Yes, that's standard surgical language. They are not  
8 aware of -- the difficulties don't arise to their attention.

9 Q So wouldn't that refute the idea that there was  
10 difficulty, from what Mr. Hamm said, there was difficulty  
11 achieving IV access?

12 A Not at all. I don't think there is a surgeon on  
13 earth that would include challenging access as part of  
14 the -- of their surgical note. That's a -- just proforma  
15 language that they put in to indicate that there was no  
16 major events such as cardiac arrest or difficult intubation  
17 or anything at the start of the case.

18 Q So if there was a problem in achieving IV access,  
19 you're saying that the standard medical practice is to not  
20 denote that in a report?

21 A The surgeon probably wouldn't even have been present  
22 or almost certainly wasn't present during that part of the  
23 process. And I would not be noting that on their surgical  
24 note, which is what that is.

25 Q You stated in your January -- this will be

1 Plaintiff's Exhibit 2, your January 16th report.

2 THE COURT: Before we leave that, could I ask a  
3 question about that? Is whether there's difficulty  
4 obtaining an IV line different based upon whose perspective  
5 is being given?

6 THE WITNESS: Yes, yes, absolutely. We might  
7 struggle for a while to get IV access and when we get it, we  
8 induce anesthesia, the nurses call the surgeon, they come in  
9 and do the checklist and stuff and we're underway. I  
10 wouldn't -- I probably wouldn't even mention it. If they  
11 were saying, complaining, why did it take so long to get  
12 started, I'd say I had a hard time with the IV. But they  
13 wouldn't -- probably wouldn't know about it.

14 THE COURT: From the perspective of the person  
15 being stuck, if it takes more than one try, perhaps, or two  
16 tries, perhaps, would it be unusual for that person being  
17 stuck to think that there was difficulty with anesthesia or  
18 obtaining an IV, whereas the person doing the sticking may  
19 not think that two or three tries was a big deal?

20 THE WITNESS: Well, it's definitely a bigger deal  
21 for the patient than it is for the person doing it.

22 I think it depends on the individual, if they have  
23 an expectation -- if they've had medical encounters before  
24 where it always went in the first time, then they're going  
25 to say, oh, I had a bad doctor or nurse today, they had to

1 try three times. Other people are used to the fact that  
2 multiple attempts are often necessary on them.

3 THE COURT: All right.

4 Q (By Mr. Govan) One more question on that, Dr. Heath,  
5 you mentioned the notation about achieving general  
6 anesthesia without great difficulty.

7 Would you agree with me that in your clinical  
8 world if it took one or two sticks to establish an IV line,  
9 from a clinician's perspective, that would not be a great  
10 difficulty in establishing an IV line?

11 A Yes. I think if you get it on the second try, then  
12 that would not be -- that would not be notable.

13 Q You stated in your January 16th, 2018, report that  
14 multiple --

15 THE COURT: But that would be from the  
16 anesthesiologist's standpoint, right?

17 THE WITNESS: Yes.

18 THE COURT: You already said that this note that  
19 we're looking at in the medical records was the surgeon's  
20 note.

21 THE WITNESS: Yes. Again, that's very standard  
22 language and it would refer to some significant event or  
23 calamity that was relevant to the subsequent surgical  
24 narrative.

25 THE COURT: For example, if something happened

1 when the patient was being placed under anesthesia, heart  
2 rate dropped, blood pressure dropped and the procedure had  
3 to be stopped, that would be noted in the surgical note?

4 THE WITNESS: They would note that. And if those  
5 things happen -- very significant, blood pressure,  
6 hemodynamic problems like you're talking about occurred and  
7 when the surgeon came in, I would say, hey, Mike, everything  
8 is fine, but we had -- has had a couple of scary moments  
9 there but everything is fine, I think you can go ahead.  
10 There might be a conversation like that. And I don't think  
11 the surgeon -- the surgeon might note that in the note or  
12 not.

13 THE COURT: But the surgeon isn't concerned with  
14 how many times it took to get a successful stick.

15 THE WITNESS: They're only concerned if it's  
16 holding the OR up.

17 MR. HARCOURT: Your Honor, I just wanted to  
18 discuss the time for a split second. I don't know if I  
19 could request perhaps special -- his plane is at 6:45. And  
20 I think it only takes about fifteen minutes to get to the  
21 airport. I think we're okay. But I just want to make sure  
22 that he doesn't miss his plane because he's got to be in the  
23 OR tomorrow.

24 THE COURT: Right. I think if he's out of here by  
25 5:30 he should be good. Do you have your luggage with you?

1 THE WITNESS: Yes.

2 THE COURT: Okay.

3 Q (By Mr. Govan) Dr. Heath, in your January 16th, 2018  
4 report, which is Plaintiff's Exhibit 2, you say that  
5 multiple factors such as hydration status, temperature,  
6 tissue edema and medications can affect the visibility and  
7 palpability of veins over time, correct?

8 A Yes.

9 Q Did you have any conversations with Mr. Hamm prior to  
10 your September 23rd evaluation about his hydration prior to  
11 your evaluation of his veins?

12 A I never spoke with or met him or anything before  
13 encountering him in the prison.

14 Q Did you have any conversations with Mr. Hamm's  
15 attorney prior to your September 23rd evaluation about  
16 Mr. Hamm's hydration prior to your evaluation?

17 A No.

18 Q So you did not encourage Mr. Hamm to be fully  
19 hydrated before your evaluation of his veins?

20 A No.

21 Q Would you agree with me if he had been -- let me back  
22 up.

23 You don't know his hydration status, what his  
24 hydration status was when you evaluated him on September  
25 23rd?

1 A I know that he wasn't greatly dehydrated. He had  
2 none of the signs of dehydration. He wasn't asking for --  
3 saying he was very thirsty or anything like that.

4 Q But you don't know how much he had --

5 A He actually got a drink but put it in his pocket, he  
6 didn't open it. All the things suggested he was in a state  
7 of normal hydration.

8 Q You don't know how much he had -- prior to -- the  
9 twenty-four hours prior to September 23rd, you don't know  
10 how much he had to drink in that twenty-four hour period,  
11 correct?

12 A That's correct.

13 Q Would you agree with me that if perhaps he had been  
14 more hydrated on September 23rd, that may have affected your  
15 ability to feel or see other peripheral IV veins?

16 A Possibly, yes.

17 Q In your report, I think you talked about this, too,  
18 that Mr. Hamm told you there was some difficulty in 2014  
19 prior to his cancer treatments to establish an IV access,  
20 peripheral IV access.

21 A Yes.

22 Q I think we covered this, but this information came  
23 solely from self reporting from Mr. Hamm?

24 A Correct.

25 Q You would agree with me while there was some initial

1 difficulty in each of those procedures in 2014, even,  
2 assuming what Mr. Hamm says is true, the medical providers  
3 were ultimately able to achieve IV access in those  
4 procedures?

5 A Yes.

6 Q You mentioned also in your report that -- this is  
7 Page 4, I think, of your initial report -- Mr. Hamm relates  
8 that he has intermittent waxing and waning tumors on his  
9 chest, neck and groin.

10 A Yes.

11 Q Again, this was self reported by Mr. Hamm, correct?

12 A Correct.

13 Q And you actually felt those areas during your  
14 examination, correct?

15 A Correct.

16 Q And you did not detect any palpable lymph nodes?

17 A Correct.

18 Q In your report on Page 4, Paragraph 8, second  
19 sentence, you said that these waxing and waning tumors in  
20 his chest, neck and groin, this likely represents  
21 lymphadenopathy, swollen lymph nodes, related to his  
22 lymphatic malignancy.

23 But you would agree with me there's -- you did not  
24 personally feel any swollen lymph nodes during your  
25 examination, correct?

1 A Correct.

2 Q And you are aware that Mr. Hamm's medical records do  
3 not indicate that he is currently diagnosed or being treated  
4 for lymphadenopathy?

5 A Well, he has -- still has, as of his last scans,  
6 there's evidence of internal lymph nodes. He's not being  
7 treated for those. Now, they have not been evaluated in  
8 terms of what they represent.

9 Q Last scans, what are you referring to?

10 A His, I believe, CT or MRI shows lesions in his lungs  
11 and chest. And I think also in his abdomen.

12 Q You would agree with me that lesions in your chest  
13 and abdomen would not have relevance to whether peripheral  
14 IV access could be achieved, correct?

15 A They themselves wouldn't impede peripheral access,  
16 but it relates to whether he has ongoing disease now or not.  
17 And I don't believe he's been effectively evaluated or  
18 formally evaluated to determine whether -- the status of his  
19 lymphoma.

20 Q Whether -- I'm talking about lymphadenopathy at this  
21 point. You would agree with me whether he has been  
22 effectively treated or not, there are no medical records  
23 stating he's currently being diagnosed or treated for  
24 lymphadenopathy?

25 A Well, he's being treated but he hasn't been cleared.

1 Q Currently.

2 A Correct.

3 Q So, you would agree with me your statement that  
4 these -- his complaints of swollen lymph nodes represents  
5 lymphadenopathy related to his lymphatic malignancy, that's  
6 not an accurate statement --

7 A I don't know what they were. They would need to be  
8 biopsied. The only way to know what those lesions are is to  
9 biopsy one. It may be some scans that provide some  
10 information also. But they need to be biopsied.

11 Q You stated you don't know what they are, but you  
12 still said in your report that they are likely  
13 lymphadenopathy?

14 A In the context of his having lymphoma or at least,  
15 the very least, recently been treated for lymphoma without  
16 being cleared from that, that would be the number one thing  
17 that would come to mind to say to a doctor, you have got a  
18 patient who was treated for lymphoma a couple years ago and  
19 now he has lesions popping up on his chest or wherever, he  
20 would be like, oh, sounds like lymphoma is coming back.

21 Q You would agree with me that enlarged lymph nodes can  
22 occur for many reasons that have nothing to do with  
23 lymphoma?

24 A I say it right there. There are many other possible  
25 causes of lymphadenopathy and the only way to determine the

1 actual cause would be to biopsy one of these lesions. It's  
2 the next sentence.

3 Q And you mentioned in that sentence related to his --  
4 you say this likely represents lymphadenopathy related to  
5 his lymphatic malignancy.

6 You would agree with me that his medical records  
7 indicate that he is currently in remission for the orbital  
8 lymphoma from which he received radiation in 2014.

9 A When those records were written, yes, the ones that I  
10 got before visiting him. Remission means that the disease  
11 can come back.

12 Q Certainly anything is possible, but there is no --  
13 you have not evaluated him for whether the orbital lymphoma  
14 has returned, correct?

15 A Well, the scans have. The scans have evaluated him  
16 about the orbital lymphoma. Lymphoma is a systemic disease.  
17 It can affect lymph nodes anywhere. The cells can travel  
18 anywhere in the body. That's why I'm saying that lesions in  
19 the abdomen or chest, while they don't specifically impede  
20 obtaining central access or peripheral access --

21 Q Okay.

22 A -- it's part of the picture. And as clinicians, we  
23 look at the entire picture. That's the relevance of them.

24 Q You would agree with me whether or not he has orbital  
25 lymphoma, whether that has returned, would not have an

1 impact on it necessarily achieving peripheral IV access?

2 A Yes. I don't see a way that a lesion that was  
3 confined to his eye and brain area could affect his arm.

4 Q Okay. You also noted in your report that Mr. Hamm  
5 has a facial defect under his left eye in Paragraph 10.

6 A Yes.

7 Q And you would agree with me that a facial defect in  
8 or around or underneath the eye would not have an impact on  
9 whether peripheral IV access could be achieved?

10 A Yes.

11 Q In Paragraph 14 you noted that he has active B-cell  
12 lymphoma, a form of cancer that involves the lymph nodes.

13 You would agree with me when he was diagnosed it  
14 was confined to orbital lymphoma, behind his eye, the actual  
15 lymphoma that was treated with radiation in 2014?

16 A His orbital and also extending into his skull and  
17 into -- toward -- into the area where the brain is, the  
18 calvarium.

19 Q And you would agree with me that the medical records,  
20 current medical records in 2017 indicate that he is in  
21 remission for the orbital lymphoma?

22 A Yes.

23 Q You stated this, too, I just want to be clear.

24 Whether someone suffers from orbital lymphoma would not have  
25 an affect on obtaining peripheral IV access in a person's

1 hands, arms or feet?

2 A If it's confined to the head, yes, that's correct.

3 Q You stated in your January 16, 2018 report that it is  
4 easier to insert a needle into a vein to withdraw blood than  
5 it is to insert an intravenous catheter, because you said  
6 that blood -- a blood draw needle is thinner than a needle  
7 you would use to establish an IV catheter for intravenous  
8 access.

9 A If you can show me where -- what I meant is the  
10 needle for the catheter, when you have a catheter, it's  
11 surrounding a needle, so the combination of the needle plus  
12 the catheter is a substantially larger diameter than the  
13 needle alone.

14 Q I'm referring to Paragraph 9 on Page 2 of your --  
15 which is Plaintiff's Exhibit 2 -- of your joint January 16th  
16 report, second sentence says, this is because a blood drawn  
17 needle is thinner and sharper than an intravenous catheter.

18 A If you keep reading. Which consists of a needle  
19 surrounded by a plastic tube.

20 Q Correct. Would you also agree with me that typically  
21 when you need to draw blood you actually sometimes need to  
22 use a larger catheter than you would be in establishing an  
23 IV line because blood can be thicker or bigger than the  
24 agents you'd be administering in an IV line?

25 A I don't agree with that.

1 Q You don't agree with that statement?

2 A No. You use a very, very thin needle to get blood  
3 out and I'm not sure you're talking about in terms of  
4 thickness of blood. Do you mean viscosity or -- I'm not  
5 sure what you mean by that, but it's not true. You can draw  
6 blood out of a very small needle.

7 Q You can use --

8 A Just comes out more slowly.

9 Q You could use a butterfly needle to withdraw blood?

10 A Yes, as the staff in the prison have attempted to do,  
11 yes. Butterfly needle is appropriate for drawing blood,  
12 absolutely.

13 Q And you could also use an IV needle as well, regular  
14 IV needle?

15 A You have to be careful, if you flushed IV fluid  
16 through it, then any laboratory values you obtain from that  
17 might be diluted by the fluid or the ions and other things  
18 in the fluid that you have given, so you have to be careful  
19 doing that.

20 Q Dr. Heath, I just have a few more just general  
21 questions about your background.

22 In Paragraph 2 of your initial report you stated  
23 that you have given expert opinion in a number of cases  
24 involving the use of lethal injection.

25 How many total have you testified in?

1 A Do you include open court testimony like I'm doing  
2 here now or depositions or providing a sworn affidavit? I'm  
3 not sure what --

4 Q How many times have you been retained in a lethal  
5 injection method of execution challenge as an expert?

6 A Very, very proximate but I'd say in the realm of  
7 fifty to one hundred.

8 Q How many times have you testified in those type of  
9 cases?

10 A Any kind of testimony including submitting an  
11 affidavit?

12 Q Yes. Deposition testimony, affidavit testimony, in  
13 court testimony.

14 A Fifty to seventy-five. Again, these are very, very  
15 proximate numbers.

16 Q And in those cases -- all those cases have been on  
17 behalf of the inmate challenging his method of execution?

18 A Correct.

19 Q I think I have seen this in the record in this case,  
20 but from prior cases, I have seen your CV and you have given  
21 over twenty-four different lectures on problems arising, in  
22 your opinion, with lethal injection.

23 A Talk about the problems and ethical issues with  
24 physicians in a variety of aspects of it, yes.

25 Q And you have testified -- you would agree with me

1 that you have been lecturing and testifying on these issues  
2 since approximately 2002?

3 A That sounds about -- maybe 2003, something like that.

4 Q And you have testified against a variety of states'  
5 lethal injection protocols?

6 A Yes. Well, testified about them, and I'm not sure  
7 against is the right word, but testified about them and also  
8 the federal government.

9 Q I'm sorry. You have testified on behalf of a  
10 plaintiff --

11 A Yes.

12 Q -- challenging a state's or federal government's  
13 lethal injection protocol?

14 A Correct.

15 Q Involving many different types of protocols?

16 A Yes.

17 MR. GOVAN: That's all the questions we have at  
18 this time.

19 THE COURT: All right. Mr. Harcourt.

20 DIRECT EXAMINATION

21 BY MR. HARCOURT:

22 Q Dr. Heath, Mr. Govan was asking you about your  
23 qualifications in terms of having been involved in numerous  
24 questions about lethal injection.

25 Have you declined to testify in any cases or to

1 testify in cases?

2 A Yes. I've denied some cases, yes.

3 Q Have you declined to testify in cases in Georgia?

4 A Yes.

5 Q Have you declined to testify in cases in Missouri?

6 A Yes.

7 Q Have you declined to testify in cases in Texas?

8 A I think so, yes.

9 Q Have there been occasions when attorneys have asked  
10 you to be an expert witness and to assist them in a case  
11 where you've told them that there was no problem with the  
12 case?

13 A Basically, yes. When you say decline, basically  
14 there is usually a preliminary discussion, they send me  
15 protocol and stuff like that, and then we'll talk. And some  
16 states are doing things in a way that has very minimal level  
17 of risk in my opinion and I tell the attorneys that I don't  
18 think that I would be able to say anything that would be  
19 helpful to their client and they have always agreed with me  
20 and not retained me.

21 Q And are you opposed to the death penalty in all  
22 cases?

23 A I grapple with that one, and I have gone back and  
24 forth. Currently I'm in a phase where I'm okay with it.

25 Q Okay. You have been qualified as an expert in

1 Alabama federal court, correct?

2 A Correct.

3 Q That was on the David Nelson case?

4 A I'm not sure if there was ever a hearing that I  
5 testified in in that case.

6 But in the Arthur case, I was. A couple of cases,  
7 yes, but I don't think the Nelson case, I'm not sure.

8 Q And have you ever been excluded as an expert?

9 A No.

10 Q Very quickly. In response to Mr. Govan's questions,  
11 you said that issues of knots and such, and I think it was  
12 in the report, would intuitively or you would say one would  
13 think it might be related to the lymphoma because he has  
14 been diagnosed with lymphatic cancer; is that right?

15 A That would be the number one fear, yes.

16 Q May I quickly show Defendant's Exhibit 8, Bates stamp  
17 151. This is a CT scan of the neck, I believe, Page 151.

18 Does that report indicate that there were abnormal  
19 lymph nodes found in that -- on that scan?

20 A Yes. It says enlarged lymph nodes consistent with  
21 reactive lymph nodes is seen, should say are seen.

22 Q Did the pathologist who looked at that report  
23 immediately say thereafter that it could -- it probably is  
24 related or -- I don't have the language in front of me,  
25 probably related to lymphatic cancer?

1 A I don't recall what you're talking about.

2 MR. HARCOURT: May I approach the witness, Your  
3 Honor?

4 THE COURT: Yes, you may.

5 MR. HARCOURT: (Indicating) may I ask whether  
6 the --

7 A Yeah. Findings are consistent with orbital lymphoma  
8 and then it says enlargement consistent with reactive lymph  
9 nodes is seen.

10 Q So, let me turn the page to another CT scan of the  
11 chest.

12 THE COURT: Before you leave that, would you make  
13 clear for the record what the date of that examination is,  
14 please?

15 MR. HARCOURT: Yes, Your Honor. This is an  
16 examination from April 18, 2014.

17 Q On the back, the next page, Page 152, a scan from  
18 also April 18, 2014, the question is just about the  
19 inferences that one might make regarding abnormal lymph  
20 nodes in his case.

21 Did the doctor -- now, this -- so this is an old  
22 scan from 2014, not -- I'm not suggesting it's current, but  
23 did the doctor or the pathologist in that case also  
24 immediately leap to the suggestion that it's -- that because  
25 there are abnormalities in the lymph nodes that it could

1 very well be related to the lymphoma?

2 A Yes.

3 MR. GOVAN: I object on leading and speculation.

4 THE COURT: I sustain.

5 A Basically saying that the CT shows adenopathy in the  
6 mediastinum, that's the middle of the chest, around the  
7 heart, at the core of the chest, basically. And then he  
8 goes, he or she goes on to say, certainly any of these areas  
9 could be due to lymphoma given the history supplied. PET  
10 study may be of benefit for further evaluation.

11 Q Okay. Thank you.

12 Let me show you Defendant's Exhibit 8, Page 470.

13 THE COURT: Is this defendant or plaintiff's  
14 exhibits?

15 MR. HARCOURT: Sorry. Plaintiff's Exhibit 8,  
16 Bates stamp 470. The date on that, I'm sorry, Your Honor,  
17 the date on that would be March 5th, 2017, I believe.

18 Q I would like to ask you what they found there  
19 (indicating) on that date in that report.

20 A Talks about right clavicle above right nipple, right  
21 side above naval, left armpit, and I'm not sure if -- then  
22 it says 2R, I don't know what that means. This is in regard  
23 to lumps on his chest.

24 Q Okay. Let me quickly ask you about two other  
25 documents, these are from defendant's records, so this is

1 Exhibit 1 from the defendant's Donaldson records and Bates  
2 stamp 279 and 293. I believe these are dated --

3 THE COURT: Perhaps the witness could tell us.

4 Q (By Mr. Harcourt) Tell us when that's dated and what  
5 was found.

6 A It's actually hard to read. Something 31-17, maybe  
7 8-31-17, it's actually hard for me to read it.

8 Q Okay.

9 A 8-30-17.

10 Q August 2017 then.

11 A Okay.

12 Q And what was found? What was --

13 A Small hard nodule, somewhere in the area of the  
14 clavicle -- it's hard to read. Small hard nodule of the  
15 right clavicle or next to the right clavicle.

16 Q Okay. That's fine.

17 A It's hard. Something about six months. Not a good  
18 copy and not good handwriting.

19 Q Thank you.

20 THE COURT: In that second line where you are  
21 reading, does it say something about measures, centimeters?

22 THE WITNESS: I think so, maybe it says two  
23 centimeters, but there is a scribble in front of the two.  
24 So I'm not sure if that's right. Definitely says is hard,  
25 definitely says clavicle, right clavicle. I think you're

1 right, it says measures and maybe two centimeters. And  
2 below that it says he has something fifteen in six months.

3 MR. HARCOURT: Okay. I'll stop there, Your Honor.

4 THE COURT: Okay.

5 MR. GOVAN: If I could ask one question on  
6 recross.

7 RECCROSS-EXAMINATION

8 BY MR. GOVAN:

9 Q This is from -- do you still have any exhibits up  
10 there?

11 A Yes, just my two affidavits.

12 Q 470, I think this was from your exhibit, Number 8.  
13 And I just want to be clear. Mr. Harcourt asked you some  
14 questions about this and noted that there was notations  
15 about something above the clavicle or right clavicle -- do  
16 you see that?

17 A Yes.

18 Q A lump on chest. And just to be clear, it's not  
19 exactly clear what this is referring to, but assuming there  
20 was a lump on a chest, that would not have an effect  
21 necessarily on the ability to obtain a peripheral IV access  
22 on arms, hands and feet.

23 A Correct.

24 MR. GOVAN: Thank you.

25 THE COURT: Would it be relevant to any of the

1 issues involved in this case?

2 THE WITNESS: Yes. If -- there's several  
3 documents regarding hard nodules -- the big concern is is he  
4 cured or is there still lingering cancer. And seeing bumps  
5 on his skin and/or in scans makes you worried about that.

6 THE COURT: Why would that be relevant to the  
7 question of lethal injection as to Mr. Hamm?

8 THE WITNESS: Specifically to Mr. Hamm, if he has  
9 at the time they -- if he requires central access, which I  
10 think is likely, if he has ongoing disease now, that raises  
11 the concern that he will have significant disease impeding  
12 obtaining central access when an execution is attempted.

13 THE COURT: And that would be because of the  
14 reasons you told me earlier, the possibility of  
15 lymphadenopathy and the effects that those swollen lymph  
16 nodes could have on the vessels that were in the three areas  
17 where the central line would be started?

18 THE WITNESS: Yes. They can distort the anatomy  
19 so the vessels are occluded or moved, shifted over, or in --  
20 they can be deeper in the tissue making them harder to  
21 access. There could be more bleeding from the nodes.

22 THE COURT: I may have opened another can of  
23 worms. Any questions in response to mine?

24 Okay. Hearing none, I'll assume there are none.  
25 You may step down and you may be excused. Thank you,

1 Dr. Heath.

2 What's next?

3 MR. GOVAN: We'd like to call Dr. Blanke, just  
4 very briefly.

5 THE COURT: Okay.

6 MR. HARCOURT: Okay. That's fine. Do that next?

7 THE COURT: Yes.

8 CHARLES BLANKE, SWORN

9 THE CLERK: Say and spell your first and last name  
10 for the Court, please.

11 THE WITNESS: Charles David Blanke, C-H-A-R-L-E-S,  
12 B-L-A-N-K-E.

13 CROSS-EXAMINATION

14 BY MR. GOVAN:

15 Q Good afternoon, Dr. Blanke, I'm Thomas Govan from the  
16 Alabama Attorney General's office. Just have a few  
17 questions from me.

18 You are not Mr. Hamm's physician, correct?

19 A That is correct.

20 Q And you have not personally examined him before?

21 A That's correct.

22 Q And you haven't -- I'm assuming you haven't seen him  
23 until today in court?

24 A Live, that is correct.

25 Q Am I correct the extent of your involvement in this

1 case is reviewing his medical records?

2 A Yes.

3 Q Okay. You stated in your report that it's impossible  
4 to state whether or not he has active lymphatic cancer.

5 A Yes.

6 Q You would agree with me that the lymphoma that was  
7 originally diagnosed was located in his left orbital area,  
8 correct?

9 A No. I would state that we know for sure he had  
10 lymphoma behind his left eye, he had other suspicious areas.  
11 We know for sure he had massive cancer cells behind his left  
12 eye that were biopsy proven and that were treated.

13 He had other suspicious areas on imaging that were  
14 not assessed. And he had other areas that we would  
15 routinely work up in a patient with lymphoma that were not  
16 assessed.

17 Q You would confirm that these other areas were not  
18 confirmed to be lymphoma?

19 A Yes.

20 Q And he received radiation treatment for this  
21 lymphoma, correct?

22 A He received radiation treatment to the areas that we  
23 know were involved, yes.

24 Q And you would agree --

25 THE COURT: To be to his head area?

1 THE WITNESS: Exactly right.

2 Q (By Mr. Govan) You would agree the records indicate  
3 at many points that the orbital -- in the left orbital  
4 region the lymphoma is in remission?

5 A To be honest, as an oncologist, I wouldn't phrase it  
6 that way. When we talk about a cancer, we usually talk  
7 about its overall status, which, of course, again is not  
8 known.

9 What I would absolutely and unequivocally state is  
10 the tumor behind his eye responded to therapy.

11 But remission, again, means that all of his known  
12 lymphoma went away or all of his lymphoma went away, and  
13 since he wasn't assessed, I would never be able to use that  
14 term with him without further assessment. Then or now.

15 Q I think you noted, I think, that there were other  
16 abnormal places picked up initially in some of the scans in  
17 2014 related to lymph nodes; is that correct?

18 A That is correct.

19 Q But you would agree with me that in Mr. Hamm's  
20 follow-up reports, for example, in March of 2016, that it  
21 was documented after finishing his treatment there were no  
22 palpable lymph nodes noted?

23 A Palpable -- I have his report, may I take a peak at  
24 it for a second?

25 Q I'm sorry?

1 A I actually have his physical exam. May I take a peak  
2 at it?

3 Q What are you referring to?

4 A And I'll give you the date after I find it.

5 Q Okay.

6 A I have an exam from Brookwood from March 16th and  
7 follow up that does state he has no palpable nodes.

8 Q Okay, thank you. Would you agree --

9 THE COURT: Does that mean that the lymphatic  
10 cancer is in remission?

11 THE WITNESS: Your Honor, I still wouldn't use  
12 that term. Those weren't the suspicious areas to begin  
13 with. The nodes that were suspicious were internal and,  
14 again, we can't comment on them because they were noted to  
15 be abnormal once and never followed up upon.

16 THE COURT: So the nodes that were questioned in I  
17 think 2014 and 2015 you say were internal. So does that  
18 mean they could not be palpated?

19 THE WITNESS: Yes, they could not be palpated.

20 Q (By Mr. Govan) You would agree with me that you  
21 cannot state to a medical degree of certainty that Mr. Hamm  
22 currently has active lymphatic cancer?

23 A That's correct. We do not know.

24 Q You would also agree with me that lymphatic cancer is  
25 not determinative of the issue of peripheral IV access?

1 A That one is a little bit more challenging. Some of  
2 the reports, of course, that suggested the nodes above the  
3 clavicle or in the chest, my concern would be they would be  
4 the tip of the iceberg which is why I would like to assess  
5 his overall node status. I have used, obviously, IVs in my  
6 practice, I'm not an anesthesiologist, I would be concerned  
7 that, for example, nodes in the underarm of the axilla or  
8 the central chest could impede -- well, certainly central  
9 venous access, as you heard, I think they could have some  
10 affect on peripheral access, but that should be fairly  
11 obvious from the examination of the veins themselves.

12 Q And there's certainly nothing in his medical records  
13 that you reviewed that state that there's any impediment to  
14 those regions currently for IV access?

15 A Except for the fact that it appears his doesn't have  
16 good peripheral access, but I don't think that we can state  
17 it's because of internal adenopathy, we don't know.

18 Q You didn't examine his veins yourself personally?

19 A Correct.

20 Q You are not expressing an opinion specifically about  
21 his venous access?

22 A Only what I read.

23 Q One last question on that topic. You mentioned that  
24 since 2014 Mr. Hamm has had a lesion under his left eye.

25 A That is correct. It was present for awhile before

1 that and the best I can tell it hasn't been treated.

2 Q You would agree with me that the -- whether that  
3 lesion exists or not does not impact on whether he has  
4 accessible veins for IV access?

5 A Only if they were going, for some reason, going to  
6 use veins in the head or neck, so yes, except for that.

7 Q A lesion under his eye would affect the ability to  
8 obtain IV on his neck?

9 A The drainage there is to the nodes behind the ear and  
10 potentially even in the neck on that side.

11 THE COURT: I'm sorry, I didn't --

12 THE WITNESS: The lymph node drainage from a tumor  
13 like that would be lymph nodes on the left side of the face  
14 and possibly even the neck.

15 Q (By Mr. Govan) You have no way -- that is just a  
16 general concern, you have no idea whether that actually  
17 applies to Mr. Hamm or not?

18 A That is correct.

19 Q You also stated in your January 16th affidavit that  
20 you specialize in medical-aid-in-dying in Oregon.

21 A Yes.

22 Q Is that correct?

23 A That is correct.

24 Q And you stated, I think, in your report the types of  
25 medication that you prescribe in Oregon, one of them you use

1 was -- you prescribe was secobarbital?

2 A Correct.

3 Q And you stated that that medication is taken by mouth  
4 in four ounces of liquid. Did I get that correct?

5 A You did.

6 Q And so that is taken in a liquid form as a drink?

7 A Yes, the majority of the time.

8 Q And the person who was doing that was using it to end  
9 their life, typically is self-administering that drink or  
10 drinking that themselves?

11 A Yes, that's actually required by Oregon law.

12 MR. GOVAN: Your Honor, I don't have any further  
13 questions of this witness. I'm sorry. One moment, Your  
14 Honor.

15 (Brief pause)

16 A I'm sorry, I apologize. I didn't finish my answer to  
17 that last question, if you'd like to hear the rest, about  
18 the drinking.

19 Q That's fine. I have a different follow-up question.

20 You mentioned that the lesion under the eye, the  
21 left eye that you indicated that Mr. Hamm has, that would  
22 not have an affect on any lymph nodes in other areas such as  
23 the right side of his neck or lymph nodes in other areas of  
24 his body, correct?

25 A Yes.

1 Q I'm sorry. Yes, you agree with that?

2 A Yes, you're correct.

3 Q Thank you.

4 THE COURT: Is there any concern about, I think  
5 this lesion was diagnosed as a carcinoma?

6 THE WITNESS: Yes, as a basal cell carcinoma.

7 THE COURT: Is there any risk associated with  
8 allowing basal cell carcinoma to go untreated?

9 THE WITNESS: Yes. Unlike the usual worry with  
10 cancer, which of course can spread to your liver, your lungs  
11 and be fatal, these type of tumors tend to be locally  
12 invasive, they burrow in where they are so they could invade  
13 into the face and eventually even into the skull and deeper  
14 than that. That would be the major concern.

15 THE COURT: All right. But no concern with a  
16 basal cell carcinoma becoming melanoma?

17 THE WITNESS: No, they are different types of  
18 tumors, Your Honor.

19 THE COURT: I'm glad to hear that.

20 DIRECT EXAMINATION

21 BY MR. HARCOURT:

22 Q Thank you, Dr. Blanke. So, very quickly on these  
23 questions of medical-aid-in-dying.

24 You indicated that your patients voluntarily drink  
25 the drugs; is that correct?

1 A So that was actually the second part of my answer.  
2 They do have to do it voluntarily; that's absolute. The  
3 majority of them drink, every once in a while we get  
4 somebody, say, with thyroid cancer or a big mass in their  
5 neck that prohibits swallowing, they cannot swallow, and we  
6 actually have to put a tube through their nose into their  
7 stomach, and then they have to self-inject the medication  
8 into that tube.

9 Q Okay. And so the -- so the tube, the tube is  
10 placed -- could you describe how that would be done exactly?

11 A Sure. It could be --

12 Q What are the different options for placing a tube in  
13 an individual in order to inject fluid into their system?

14 A Right. So, it's called an NG for nasogastric or nose  
15 and stomach tube. It's probably slightly smaller than my  
16 pinky, it's made out of soft rubber. You can spray  
17 something in the nose to numb it up and fairly easily thread  
18 the tube through the nose, down the throat, into the  
19 stomach. It's a very common procedure done for a lot of  
20 other reasons as well. It can be done at the patient's  
21 home. They do not have to be in the hospital to have it  
22 done.

23 Q And are there other ways to get a tube -- can you go  
24 through the mouth as well?

25 A You can do an OG tube for orogastric as well.

1 Q How does that work?

2 A It's similar, except you go through the mouth instead  
3 of through the nose. And there actually have been some  
4 reports -- you could put a tube directly into the stomach,  
5 but that's a little bit more of a surgical procedure.

6 Q And in -- I take it in Oregon it would be necessary  
7 that the individual who would have a tube inserted into  
8 their nose or mouth would be the person who would inject the  
9 fluid themselves?

10 A That's correct. That's an absolute requirement.

11 Q But that's not a physical requirement?

12 A Correct. It's very easy to do.

13 Q Okay. How much fluid are we talking about exactly?

14 A It's about four ounces.

15 Q What's four ounces?

16 A May I show you?

17 THE COURT: Okay.

18 THE WITNESS: So, I'm guessing this cup itself is  
19 probably six ounces, it would be full to about here  
20 (indicating).

21 MR. HARCOURT: So let the record reflect  
22 Dr. Blanke has an ordinary --

23 THE COURT: A six ounce cup that he filled to the  
24 four ounce area. Got it.

25 Q (By Mr. Harcourt) And that's the whole quantity of

1 all the liquid that needs to be injected into an individual  
2 orally for them to pass away?

3 A That's correct, regardless of which prescription we  
4 give them. The volume of liquid is always the same.

5 Q Just four ounces?

6 A Correct.

7 Q And how much -- how many times have you -- how much  
8 experience have you had with this?

9 A A lot. I didn't track it when I first started doing  
10 it until I became more specialized. The state reports,  
11 which collects this information, the highest number  
12 performed is eighty-five. I believe I'm somewhere between  
13 fifty and a hundred. I might be the eighty-five, I'm just  
14 not sure. But certainly more than fifty.

15 Q Over how many -- how much time?

16 A I started doing it in 1998, one year after the act  
17 was passed.

18 Q Okay. And how reliable is this?

19 A It's incredibly reliable. If the patient takes the  
20 medication, and I always tell them this in advance, because  
21 we have to counsel them at multiple steps that they can  
22 change their mind, but I tell them, once they drink it, they  
23 cannot change their mind. It's unbelievably fast and it's  
24 unbelievably effective. The chance of them dying, if they  
25 drink these formulas, is ninety-nine point four percent.

1 Q Okay. And how long with these formulas does it take  
2 before generally the person becomes unconscious?

3 A So, the data that has been collected is cross the  
4 board for all the formulations, but they're mostly similar.  
5 The average person is asleep in five minutes, asleep to the  
6 point where they can't respond, they're essentially  
7 comatose. And that range is between one minute and sixty  
8 minutes and then the average person dies in twenty-five  
9 minutes.

10 Q And let me ask you, when you talk about the average  
11 person, you're speaking about an average healthy person?

12 A Well, so, to qualify for death with dignity they have  
13 to have a terminal illness, so it's a little bit hard for me  
14 to use that term. But I have had people who had problems,  
15 say, pancreatic cancer that's localized and they have been  
16 otherwise healthy. So it's a spectrum.

17 Q On the feasibility question, you have done this many  
18 times?

19 A Yes.

20 Q In cases of voluntary in Oregon. On the question of  
21 the accessibility of the drugs, are these drugs difficult to  
22 get?

23 A No. They are all prescription drugs. But they're  
24 not particularly fancy or special. They should be available  
25 anywhere in the United States.

1 Q And on the -- I think you referred to it as a DDMPPII  
2 cocktail; is that --

3 A Right. So, other counsel asked about the  
4 secobarbital, I believe, or perhaps I falsely remembered  
5 that, but there is also a cocktail that is a combination of  
6 two drugs that slow the heart, as well as Valium, which is a  
7 bit of a sedative, and Morphine, which I'm sure you're all  
8 familiar with, and that's the DDMPPII cocktail.

9 Q So, basically, that's made, you said, with Morphine;  
10 is that readily available?

11 A Yes.

12 Q Do you know -- actually, most prison systems have  
13 Morphine.

14 A And I think it's on formulary for Blue Cross in  
15 Alabama, if I remember correctly.

16 Q Okay. I'm referring here to Defendant's Exhibit 1,  
17 which are the Alabama Department of Correction records, and  
18 I'm looking at pages Bates stamped starting about 492, yes,  
19 so Defendant's Exhibit 1, Bates stamp 492.

20 Can you tell me whether this -- well, what this  
21 prescription is for?

22 A This is a prescription for oral morphine sulfate  
23 which is one of the four drugs of DDMPPII.

24 Q Who was it administered to?

25 A Looks like Mr. Doyle Lee Hamm.

1 Q Okay. Let me ask you, Page 494.

2 THE COURT: Can you tell me the date of that?

3 THE WITNESS: Looks like March 19th of 2015, Your  
4 Honor, start time, and then they have a stop time of April  
5 17th.

6 And then the second medication or second sheet you  
7 handed me is also for morphine sulfate.

8 THE COURT: What is that number? Page number?

9 THE WITNESS: 493 is the second. The first one  
10 that we just talked about is 492. The second one is also  
11 morphine sulfate from February 17th of 2015, also for  
12 Mr. Hamm.

13 Q (By Mr. Harcourt) And let me show you Bates stamp  
14 495 and 497.

15 A Same drug. This one is dated January 21st of 2015.  
16 Same patient, Mr. Hamm. And we have morphine, Page 497,  
17 December 28th of 2014, Mr. Hamm.

18 Q Can you tell me -- so, some of the other drugs that  
19 are used, can you -- another -- is another one, am I correct  
20 you said was valium?

21 A It's just common valium, diazepam.

22 Q Do you know if valium is a drug that should be  
23 available in the State of Alabama?

24 A Yes, it should be available easily in the State of  
25 Alabama.

1 Q Okay. What are the other two drugs that you  
2 mentioned?

3 A They are two drugs used in patients with heart  
4 disorders, digoxin and propranolol, also extraordinary  
5 common drugs.

6 Q Okay. And you said they are --

7 A They're extraordinarily common in usage.

8 Q I'm not a doctor, I have never heard of them before.  
9 What does that mean "extraordinarily common"?

10 A It means a lot of patients with heart disease will  
11 need these drugs and get these drugs.

12 Q Okay. Let me show you what is Plaintiff's Exhibit 36  
13 (indicating). And let me ask you what that exhibit is.

14 A This is the drug guide from Blue Cross and Blue  
15 Shield of Alabama. It looks like it's dated October 17.

16 Q Okay. And can you tell me if the drugs that you are  
17 discussing are covered by Blue Cross Blue Shield of Alabama?

18 A It does look like all --

19 MR. GOVAN: Your Honor, I'm going to object to  
20 this, I guess, I mean, commenting on a document, I don't  
21 know if he has personal knowledge to -- if the document is  
22 going to be admitted, that's one thing. But for him to  
23 comment on what is or is allowed under Blue Cross Blue  
24 Shield of Alabama --

25 THE COURT: Can you tell me whether these drugs

1 that you have discussed today are listed on the drug chart  
2 in document 36?

3 THE WITNESS: If this is document 36, all four  
4 drugs are listed.

5 Q (By Mr. Harcourt) Could you refer to the pages,  
6 perhaps?

7 A I could. On Page 22, there are a variety of  
8 formulations of propranolol, which is one of the heart drugs  
9 that I discussed.

10 On Page 26, digoxin, two different formulations,  
11 also a heart drug.

12 On Page 34, there are three different preparations  
13 of valium listed by its generic name diazepam and valium,  
14 it's brand name.

15 And on Page 43, there are a whole host of  
16 varieties, meaning dosages of morphine sulfate.

17 Q Thank you. Have you, yourself --

18 THE COURT: While we're on that page, what about  
19 the first drug that you mentioned that was a single dosage?

20 THE WITNESS: The secobarbital?

21 THE COURT: Yes.

22 THE WITNESS: I would have to look through this  
23 whole thing and I'm happy to do so.

24 I don't believe that seco is on those four pages  
25 that we pulled.

1 THE COURT: Is it used for anything other than in  
2 the main process?

3 THE WITNESS: Yes, Your Honor, it's a sleeping  
4 pill. That's it's main usage.

5 THE COURT: All right. Thank you. Is it  
6 generally available in your experience, secobarbital?

7 THE WITNESS: There are definitely newer sleeping  
8 pills available, so it has to be ordered. By that I mean  
9 there's just a one or two delay in Oregon and yes, it's  
10 easily available.

11 Q (By Mr. Harcourt) May I ask, have studies been done  
12 on the effectiveness of death with dignity medications?

13 A Yes.

14 Q Have you yourself conducted some of those studies or  
15 looked at the data and written reports?

16 A Yes.

17 Q I would like to show you Exhibit 33, Plaintiff's  
18 Exhibit 33. Will you identify that?

19 A This was an article published in JAMA Oncology  
20 entitled Characterizing Eighteen Years of the Death With  
21 Dignity Act in Oregon. I was the lead author in this paper.

22 Q What did you find there in terms of the feasibility  
23 and reliability of the drug experiments with death with  
24 dignity drugs in Oregon?

25 A So, some of that was the data I quoted earlier, in

1 terms of the drugs working quickly, in terms of putting  
2 people into a coma and causing their death, as well as the  
3 overall chance of actually leading to death.

4 Q There is some question as to whether I asked what you  
5 found in your study about how long it takes for someone to  
6 pass away.

7 A Okay. So the state's data from -- this might have  
8 been an eighteen year period, it wasn't quite twenty years  
9 yet, but the state found, and we reviewed this, that the  
10 average time to coma is five minutes; the average time to  
11 death is twenty-five minutes; and the effectiveness rate,  
12 the chance of dying if you take the medication is ninety-  
13 nine point four percent.

14 MR. HARCOURT: I think that's all my questions,  
15 Your Honor.

16 THE COURT: All right. I have some questions,  
17 which counsel should not be surprised at this stage.

18 Dr. Blanke, you talked about self-administering  
19 these drugs and you talked about the possible use of an NG  
20 or OG tube.

21 Can you tell me how the medicine could get from  
22 that cup of four ounces in to the patient's tube and in to  
23 their stomach?

24 THE WITNESS: It would be put into a syringe, just  
25 like you would give a shot to somebody, and they would push

1 the plunger down.

2 THE COURT: Okay. And what would one refer to  
3 pushing the plunger as?

4 THE WITNESS: I would consider it to be an  
5 injection.

6 THE COURT: Okay. That was what I was getting at.  
7 Does the term "injection" in a medical context mean only  
8 intravenous injection?

9 THE WITNESS: Oh, no. Basically it would be --  
10 you can include injections into skin, into muscle, into body  
11 cavities, into joints. It's basically --

12 THE COURT: But those would all include a needle.

13 THE WITNESS: The ones I listed --

14 THE COURT: Except, perhaps, body cavity.

15 THE WITNESS: That's true. But even if we -- I'm  
16 trying to think of a good example. If we talk about  
17 injecting fluid into people's ears for other purposes or  
18 into their mouth, we still consider that to be an injection.

19 It's the pushing of the fluid, the needle really  
20 isn't part of the medical definition in any way.

21 THE COURT: Thank you. Any further questions from  
22 either counsel?

23 MR. GOVAN: I have a couple.

24 RECROSS-EXAMINATION

25 BY MR. GOVAN:

1 Q Dr. Blanke, a couple of questions for you.

2 You mentioned some of the drugs that are used in  
3 the Oregon -- in Oregon in the medical-aid-in-dying context  
4 are available commercially and so forth; is that correct?

5 A Yes.

6 Q And you gave an example of valium. And I think you  
7 said that was something that was kind of available and  
8 normal in the market, correct?

9 A Yes.

10 Q Would you agree that midazolam is also a drug that is  
11 commonly used in the market?

12 A In a different -- first of all, yes, in a different  
13 way. I would say that midazolam is much more commonly used  
14 and administered by professionals, whereas valium is often  
15 taken at home by patients. But otherwise, yes.

16 Q And I'm assuming that drug companies that have  
17 provided -- that manufacture these drugs have not raised  
18 objections to the drugs being used in the medical-aid-in-  
19 dying context in Oregon?

20 A I honestly don't know. But I haven't seen or heard  
21 any objection.

22 Q Okay. Are you aware of the fact that in execution  
23 context, lethal injection context, that many drug companies  
24 have enacted restrictions on the distribution of their drugs  
25 for drugs that are used in lethal injections and executions?

1 MR. HARCOURT: Your Honor, I would like to somehow  
2 object, I'm sorry, I'd like to object. We're going into a  
3 line of reasoning that I don't think Dr. Blanke is an expert  
4 on, which is the --

5 THE COURT: I think the question was merely if he  
6 was aware. And I think he can answer that. And if he's  
7 aware, he can say so. If he's not aware, he can say he's  
8 not. We'll find out.

9 A Would you mind repeating the question, please?

10 Q (By Mr. Govan) Sure. Are you aware that many  
11 pharmaceutical companies have created distribution  
12 restrictions to attempt to prevent their drugs from being  
13 used in lethal injections in different executions?

14 A I actually did not know that.

15 Q Okay. Are you aware that --

16 THE COURT: That takes care of it, right,  
17 Mr. Harcourt?

18 MR. HARCOURT: Yes, Your Honor.

19 THE COURT: Thank you.

20 Q (By Mr. Govan) Another question. Were you aware  
21 that also pharmaceutical companies are restricting certain  
22 drugs that are provided specifically to departments of  
23 corrections that carry out executions in different states?

24 A Was I aware they were restricting?

25 Q Yes.

1 A No. To give you a complete answer, from Google, I  
2 know that they -- this is my own private non-professional  
3 opinion, I know they don't like the use of their drugs, but  
4 I have no idea what they have done to limit use of their  
5 drugs.

6 Q Okay. You are certainly not opining on the ability  
7 of a department of corrections to obtain some of the drugs  
8 you've mentioned in the context of an execution?

9 A Can you say that one more time?

10 Q I'll rephrase.

11 You're not opining that these drugs that you  
12 mentioned, like secobarbital and Valium, you're not opining  
13 about the ability of a department of corrections to acquire  
14 those drugs if they were going to be used to carry out an  
15 execution?

16 A Not specifically, no.

17 Q Okay. You are not specifically aware of it, would  
18 you agree with me that if a pharmaceutical company placed  
19 restrictions on their drugs being used in executions that  
20 that would potentially raise a difficulty in the ability to  
21 acquire those drugs -- for a department of corrections?

22 A That goes back to my previous answer. I don't know  
23 how much they can limit that sort of use, so I honestly  
24 don't know.

25 Q Okay. And so when you're speaking about -- when

1 you're saying drugs are commercially available and things,  
2 kind of generally, you're just talking generally in your  
3 professional experience and in the context of the drugs that  
4 are used in medical-aid-in-dying in Oregon alone?

5 A I am saying they are widely used, they are not  
6 specially produced for this purpose. They are definitely  
7 used for other purposes in Alabama.

8 Q Okay. Did you ever use the drug pentobarbital in  
9 your practice before?

10 A Yes.

11 Q Do you still use that now?

12 A No.

13 Q Okay. Is that available to you now?

14 A No.

15 Q You mentioned as well some questions from the judge  
16 about the term "injection."

17 Is there an official, like medical journal or  
18 something that defines specifically what "injection" means?

19 A I am relatively sure if we went to a medical  
20 dictionary it would be in there, but I did not look it up  
21 for today's purposes.

22 Q Okay.

23 THE COURT: Wait a minute. I did. Just a minute.  
24 I think it was Tabor's Medical Dictionary. Are you familiar  
25 with it?

1 THE WITNESS: Yes, Your Honor.

2 THE COURT: Tabor's Medical Dictionary defines  
3 injection as the forcing of a fluid into a vessel, tissue or  
4 cavity.

5 THE WITNESS: Exactly how I would have defined it.

6 THE COURT: I think it's pretty close to how you  
7 defined it.

8 Q (By Mr. Govan) Are you aware of any state that is  
9 currently using this process that you described in Oregon,  
10 the medical-aid-in-dying process, to carry out an execution,  
11 a judicial execution?

12 A No.

13 MR. GOVAN: Okay. No further questions, Your  
14 Honor. Thank you.

15 THE COURT: Anything further, Mr. Harcourt?

16 MR. HARCOURT: Yes, Your Honor.

17 REDIRECT EXAMINATION

18 BY MR. HARCOURT:

19 Q I come from a slightly different discipline, I  
20 apologize.

21 But I would like to show you the definition of  
22 injection from the Oxford English Dictionary. It's not a  
23 medical dictionary, but common usage dictionary.

24 THE COURT: I have read that one as well.

25 MR. HARCOURT: And it could be relevant to how an

1 ordinary legislator would use the term injection.

2 MR. GOVAN: I object to that. That's purely  
3 speculative.

4 THE COURT: And it's argument, not question. I  
5 got it.

6 MR. HARCOURT: My apologies.

7 Q Could you please read the definition from the Oxford  
8 English Dictionary?

9 A On Page 24, the Oxford English Dictionary defines  
10 injection as the action of forcing of fluid, et cetera, into  
11 a passage or cavity as by means of a syringe or by some  
12 impulsive force, especially the introduction in this way of  
13 a liquid or other substance into the vessels or cavities of  
14 the body, either for medicinal purposes or in a dead body or  
15 portion of one in order to exhibit the structure or preserve  
16 the tissues.

17 Q And would you agree that that -- does that definition  
18 -- would you agree that that is a good definition of  
19 injection?

20 A Yes.

21 Q Okay. You have been asked a lot of questions about  
22 lethal injection. And I realize you're not an expert on  
23 lethal injection.

24 Do you know that some states include lethal  
25 intravenous injection in their statutes and other states

1 include only lethal injection in their statutes?

2 A I did know that.

3 Q You did?

4 A Yes.

5 Q Thank you. Let me show you what is document 20-19  
6 which I'm -- is the Defendant's Exhibit 11. Defendant's  
7 Exhibit 11. And I apologize, I can't find it.

8 Can I show the witness --

9 THE COURT: Do you want to use this one  
10 (indicating)?

11 MR. HARCOURT: (Indicating).

12 Q This is Defendant's Exhibit 11. Can you tell me what  
13 that is exactly?

14 A It's a description of the drug including its chemical  
15 structure, its clinical pharmacology, I haven't gone through  
16 all this, I'm sure it's fairly typical in terms of usage,  
17 indications and usage, when you shouldn't use it and it has  
18 a warning section as these usually do.

19 Q Does that kind of --

20 THE COURT: What is the drug at issue there,  
21 please?

22 THE WITNESS: This is the midazolam, midazolam  
23 hydrochloride.

24 Q (By Mr. Harcourt) And is that what's called kind of  
25 a label or --

1 A I don't know if this is the specific label, looks  
2 exactly like the label would look.

3 Q Okay. And can you tell who manufactures that  
4 midazolam?

5 A If I'm reading this correctly, looks like Acorn,  
6 Incorporated.

7 Q Who is Acorn, Incorporated?

8 A I actually don't know. I assume it's a company that  
9 manufactures benzodiazepine.

10 Q That's another name for midazolam?

11 A It's the class it belongs to, just like valium.

12 Q Okay. So, I suspect you might not be aware then that  
13 Acorn, Inc., has put in place regulations to prevent the use  
14 of their drug in lethal injection since -- okay. Well,  
15 okay. You're not -- you don't know Acorn, Inc.?

16 A No, I do not.

17 MR. HARCOURT: No further questions. Anything  
18 further, Mr. Govan?

19 MR. GOVAN: No, Your Honor.

20 THE COURT: Thank you, Dr. Blanke. You may step  
21 down.

22 THE WITNESS: Thank you, Your Honor.

23 THE COURT: Unless I hear an objection, you may be  
24 excused.

25 Anything else we need to take up from an

1 evidentiary standpoint?

2 MR. HARCOURT: Could I have a brief moment to  
3 collect my thoughts? Maybe three minutes?

4 THE COURT: We'll take a three minute recess.  
5 We'll come back at 6:19.

6 (Brief recess taken)

7 MR. HARCOURT: One small administrative task is to  
8 actually get these exhibits admitted either to the Court or  
9 into the record.

10 THE COURT: Okay. I have the original of the  
11 plaintiff's exhibits and -- I did forget to make that  
12 announcement at the beginning today that all of the -- all  
13 the exhibits that were offered regarding the summary  
14 judgment motion are already in evidence, I don't know how  
15 many additional ones, but you can certainly have these  
16 millions of pages into the record.

17 MR. HARCOURT: We might have some objection to  
18 some exhibits.

19 MR. GOVAN: You're talking to defendant's exhibits  
20 or my objections --

21 MR. HARCOURT: I have no objections to any of  
22 yours.

23 MR. GOVAN: Your Honor, how would you like us  
24 to -- sort of formally move to introduce the plaintiff's  
25 exhibits and I can state our objections?

1 THE COURT: That would probably be a good way to  
2 approach it.

3 MR. HARCOURT: I believe there are no objections  
4 through --

5 THE COURT: Why don't you just move to offer all  
6 of the exhibits that you produced today in these two  
7 binders, unless there's some you don't want introduced.

8 MR. HARCOURT: The only thing I would want to do  
9 is, we have agreed that instead of introducing a Conway's  
10 affidavit, which is Number 43, I believe, we're going to  
11 replace that with a small set of documents which I don't  
12 know if we can make that 43 or 45. I'm not sure how it's  
13 done.

14 THE COURT: Exhibit 43 is withdrawn?

15 MR. HARCOURT: Yes, Your Honor.

16 THE COURT: And 45 is then added and it is what?  
17 How would we describe that?

18 MR. HARCOURT: Those would be documents -- prior  
19 records from the federal habeas record --

20 THE COURT: Do you have those documents? Are  
21 those medical records that are not included in Plaintiff's  
22 Exhibit 8?

23 MR. HARCOURT: These are the originals of what the  
24 Court has. I provided --

25 THE COURT: I don't have Exhibit 45 to look at to

1 know whether it is the same medical records that are part of  
2 these other exhibits.

3 MR. HARCOURT: No, Your Honor.

4 THE COURT: We've got your Exhibit 8 and we've got  
5 Defendant's Exhibit 1, both of which are extensive medical  
6 records. And I don't know that we have got anything that  
7 reflects what the dates are that those records cover.

8 MR. HARCOURT: Right. So, Exhibit 45 is our -- a  
9 few medical records and then other records including some --  
10 all of them predate and none of them are included in the  
11 Donaldson medical records that have been provided to the  
12 Court.

13 For instance, these are medical records from his  
14 much younger time, from like 1981 before he was in the  
15 Alabama Department of Corrections or from Mississippi and --  
16 and all of this is from the post-conviction record and  
17 includes, for instance --

18 THE COURT: Well, this also includes -- this is  
19 not medical records, some of it may be, but it includes  
20 school records and a whole wide range of a variety of things  
21 that, frankly, I don't see how it's relevant to the issues  
22 that we're facing today which is whether his medical  
23 condition, as of the spring of 2017, makes the method of  
24 lethal injection as applied to him unconstitutional.

25 MR. HARCOURT: The argument regarding his current

1 medical condition --

2 THE COURT: I know, the argument is that it's  
3 cumulative. But I don't see what his school record has  
4 anything to do with that.

5 MR. HARCOURT: So, part of my argument, Your  
6 Honor, is that the poly drug abuse was related in part to  
7 earlier issues of seizures and use of anti-seizure  
8 medications, that those seizures were the result in part of  
9 head damage -- head injuries that he received as a child  
10 and, therefore, that there's a connection between all of the  
11 health pieces that lead to his becoming, for instance, a  
12 poly drug user --

13 THE COURT: I don't care what the reason was that  
14 he used drugs. That's not relevant to the issues before me  
15 today. And I see no need to go through these records that  
16 do not shed light on his current medical condition.

17 So I am going to, on my own motion, exclude  
18 Exhibit 45 as not being relevant.

19 MR. HARCOURT: And I would only say, Your Honor,  
20 that, for instance, his intravenous drug use would have been  
21 a component of the fact that his veins today aren't --

22 THE COURT: I agree. And I have taken that into  
23 consideration. There's no dispute of fact as far as I know  
24 that he was an intravenous drug user for a significant  
25 amount of time. Do you dispute that?

1 MR. GOVAN: We have nothing to factually dispute  
2 that, no.

3 THE COURT: Okay. So we don't need that. With  
4 the withdrawal of that one, does the defendant have any  
5 objection to any of the other exhibits offered by plaintiff?

6 MR. GOVAN: A few. This is spelled out in our  
7 motion or objection we filed, document twenty-seven.

8 But we object to Exhibit 35, which is entitled  
9 Public Assessment Report on Midazolam of the Medicines  
10 Evaluation Board in the Netherlands for several reasons.  
11 First, it's inadmissible under Rule 802. It contains  
12 hearsay, apparently statements and findings from this board.  
13 It's also irrelevant to the current proceedings.

14 THE COURT: Because there's not a challenge to the  
15 use of the midazolam in this case, right?

16 MR. GOVAN: Correct, Your Honor.

17 MR. HARCOURT: Your Honor, we're not challenging  
18 the use of midazolam. The relevance to this case and we  
19 have -- we did file a small response addressing some of  
20 these questions. The relevance to this case is that a  
21 defense that the defendants are raising is that they  
22 wouldn't have access to, say, Valium or the other drugs in  
23 this cocktail because the drug companies wouldn't want their  
24 drugs associated with --

25 THE COURT: But they have not presented any

1 evidence to that affect.

2 MR. HARCOURT: No, Your Honor.

3 THE COURT: I think that's one of the things that  
4 we have yet to do discovery on.

5 MR. HARCOURT: Yes, Your Honor. But I was just  
6 trying to show that even when there are objections by, for  
7 instance, Acorn, Inc., which put in place restrictions on  
8 sales so that none of their products in 2015 could be sold  
9 for lethal injections, that the shelf life on that is two  
10 years, so here we are apparently continuing to use Acorn's  
11 product. That doesn't stop -- that doesn't stop the State.

12 THE COURT: I don't see that it is -- it is  
13 hearsay and I see no reason to find an exception to it for  
14 the purposes here when the use of this drug is not at issue.

15 MR. GOVAN: The next objections are Exhibit 39 and  
16 40 which are printouts of 2014 articles from the website New  
17 Republic. And similar reasons that those articles are  
18 classic hearsay statements and to be -- and inadmissible  
19 under rules of evidence. And particularly these things, if  
20 you look in the actual documents themselves, they are  
21 unverified statements about what occurred in executions.

22 Many times they are not even quoting anybody, it's  
23 not clear where the statements are coming from. It's double  
24 hearsay, apparently, in these articles.

25 THE COURT: Far be it for me to accuse them of

1 being fake news, but I don't think that they're admissible  
2 in this case. I'll sustain the objection to those as well.

3 MR. HARCOURT: May I make a proffer of why they  
4 would be admissible?

5 THE COURT: How do you get around hearsay?

6 MR. HARCOURT: So, I'm introducing them mostly for  
7 the photographs which are -- which are official photographs,  
8 suggesting on a preliminary injunction, preliminary hearing,  
9 that this is something that I will be able to bring in later  
10 when we -- when I get some discovery to show what the  
11 significant risk is. These photographs show explicitly what  
12 the significant risk is in this case. One of them shows  
13 infiltration. The other shows repeated pricking of the  
14 body. Those -- and so I --

15 THE COURT: Okay. I don't want you to get  
16 dangerously close to a method of execution across-the-board  
17 argument, it's got to be tied to Mr. Hamm. And there's  
18 nothing linking these photographs in these instances to  
19 someone with the kind of health condition that Mr. Hamm may  
20 be dealing with that would make the as-applied argument  
21 here.

22 So, for this purpose, I am sustaining the  
23 objection. Anything else?

24 MR. GOVAN: The final one, Your Honor, that we  
25 object to Exhibit 44 which is the affidavit from Nicola

1 Cohen summarizing her efforts to obtain Hamm's medical  
2 records.

3           While I think Your Honor discussed that in the  
4 context of the motion for summary judgment, here at this  
5 point in deciding whether there's a substantial likelihood  
6 of success on the merits on the Eighth Amendment claims,  
7 what happened in accumulating records doesn't relate  
8 necessarily to the two Eighth Amendment claims that he has  
9 alleged in his amended complaint.

10           THE COURT: It relates to the timeliness argument  
11 that you're making in terms of whether granting a stay is  
12 the appropriate equitable action for me to take, does it  
13 not?

14           MR. GOVAN: We would contend it is not. And --

15           THE COURT: I would contend that it is. I'm going  
16 to overrule the objection to that affidavit.

17           MR. GOVAN: That's the final objection.

18           THE COURT: Okay. So Plaintiff's Exhibits 1  
19 through 34 are admitted. Exhibit 36, 37, 38 is admitted.  
20 41, 42 and 44 are admitted. Okay. Also, as I stated  
21 earlier, all the exhibits that were offered as part of the  
22 summary judgment motion are previously accepted as well.  
23 Defense?

24           MR. GOVAN: Your Honor, we would ask to admit  
25 Defendant's Exhibits 1 through 11. And we have the

1 originals here to provide to the Court.

2 THE COURT: Okay. Because neither Dr. Roddam or  
3 Butler testified, do you want to withdraw Exhibits 2 and 3,  
4 their CVs that were offered in the event they were called to  
5 testify?

6 MR. GOVAN: We can still include them in the  
7 record just to provide their background information. I know  
8 they didn't testify. But we can still leave them in the  
9 record for a full understanding of their background.

10 THE COURT: Okay. I understand, Mr. Harcourt,  
11 that there are no objections to the defendant's exhibits; is  
12 that correct?

13 MR. HARCOURT: Correct, Your Honor.

14 THE COURT: So Defendant's Exhibits 1 through 11  
15 are admitted for purposes of the hearing here today.

16 Okay. Anything else?

17 MR. GOVAN: As far as evidentiary matters, no,  
18 Your Honor, not from the defendants.

19 THE COURT: Okay.

20 MR. HARCOURT: No, Your Honor.

21 THE COURT: All right. I'm not going to take the  
22 time to go back and organize my thoughts in to some  
23 brilliant ruling that I'm dictating into the record in the  
24 interest of time. I'm sure that Mr. Hamm and his transport  
25 team are glad to hear that.

1           But I do want to make sure that I cover for the  
2 record that I'm overruling the defendant's motion for  
3 summary judgment as to count one, the claim of  
4 constitutional challenge to the as-applied use of lethal  
5 injection as provided in the protocols that were submitted  
6 for in camera review today.

7           I think that there are too many genuine issues of  
8 material fact that cannot be resolved on the record before  
9 the Court and that discovery is necessary on those issues.

10           I really have not addressed and nor have I allowed  
11 y'all to go into today the new claim that was added in the  
12 amended complaint of deliberate indifference to medical  
13 care. I figured the most important thing we need to be  
14 dealing with in the most efficient time possible is the  
15 question of the challenge to the execution as it is applied  
16 to Mr. Hamm. So that's what I have really been looking at.

17           And I'm not at this point addressing the motion  
18 for summary judgment as it may apply to that claim. We'll  
19 deal with it later.

20           I have also considered the fact that with the  
21 claim going forward that there is a need for discovery and  
22 for full litigation of Mr. Hamm's claim. There is a huge  
23 need in my opinion for an independent evaluation of Mr. Hamm  
24 before I can be confident in terms of what his medical  
25 condition is, how it may or may not affect peripheral venous

1 access, how it may or may not affect central venous access,  
2 and that needs to be addressed as soon as possible, and  
3 we'll talk about how to do that later.

4 But there's no way that I see that we can resolve  
5 these issues by February 22nd. I have considered the  
6 various equities involved as set out by numerous of the  
7 Eleventh Circuit cases and I'm not going to go line by line  
8 what those are today. I will issue an opinion that will.

9 But I find that the equities weigh in this case in  
10 favor of a stay of execution only pending the resolution of  
11 the question of whether the as-applied challenge will  
12 survive.

13 I do find that the plaintiff has pled sufficiently  
14 that there is an alternative to intravenous injection of  
15 drugs and for the purpose at this stage where there has been  
16 no discovery, that the pleading and the proffer are  
17 sufficient on those.

18 Alabama statute specifically provides for lethal  
19 injection, but does not limit that in terms of intravenous  
20 only. And I can only assume, because I have to assume, that  
21 had the legislature wanted to limit it to intravenous lethal  
22 injection, it could have and would have said so.

23 As Dr. Blanke testified and as the Tabor Medical  
24 Dictionary describes injection, it doesn't require a needle  
25 or a vein, and so I find that the statute does not on its

1 face prohibit the oral injection of lethal drugs for  
2 execution purposes.

3 I also note that the statute does not require  
4 specific drugs that are used, that's part of the protocol  
5 established by the Department of Corrections, so there's no  
6 statutory prohibition.

7 We will explore whether these drugs are, in fact,  
8 available for purchase to the Department of Corrections,  
9 that will be part of what we do in discovery.

10 But I don't even know, and this is something that  
11 we can really talk about in a more informal fashion, I  
12 really don't know if we need to get there until we first  
13 determine what Mr. Hamm's medical condition is and whether  
14 it will affect the intravenous method.

15 So we can talk later. And I know everybody needs  
16 to get home. So we'll set up a conference call in the near  
17 future to really come up with how we want to go about  
18 addressing the many issues that are involved in this case.

19 I think we can certainly put the Department of  
20 Corrections on notice, Mr. Govan, that I expect that we will  
21 have a prompt determination of who an independent medical  
22 exam will be conducted by and he will be made available for  
23 that in a timely fashion.

24 Did I say I am granting a stay pending the  
25 resolution of those issues?

1 Any questions or even suggestions in terms of how  
2 we best proceed?

3 And I will get an order out on this as soon as I  
4 can possibly do. As I told you, I'm going to be out of town  
5 next week with the GSA; that's all I'm going to say.

6 MR. HARCOURT: Your Honor, I would say that I'm  
7 happy to do everything I can to work, telephone conferencing  
8 and coming down here, to do all that.

9 The only footnote I suppose is that it would  
10 probably be helpful for Doyle Hamm to remain in the  
11 jurisdiction of the Court in terms of his availability to be  
12 available to the Court or for the medical, whatever.

13 THE COURT: Okay.

14 MR. HARCOURT: I can't think of any other pressing  
15 issue that needs to be addressed right now for the moment.

16 THE COURT: I have been advised that Mr. Hamm is  
17 to be transported back to Holman this afternoon -- Kilby,  
18 okay, he's not at Holman?

19 THE CLERK: Is that correct?

20 OFFICER: That's correct.

21 THE COURT: Okay.

22 MR. GOVAN: Your Honor, I think it has to do with  
23 the transportation -- I think that's kind of like a hub  
24 before they are returned to other locations. I'm  
25 assuming -- I'm assuming that he ultimately would be going

1 back to Holman, given that there was an execution pending,  
2 Your Honor's issue of a stay may change that, but that is  
3 what the initial plan was from the Department. That may  
4 change if the stay is granted or when the stay is granted or  
5 what have you, as far as returning back to Donaldson. I  
6 would assume that is where he has been housed. I can't  
7 confirm that.

8 THE COURT: Well, I'm just glad we were able to  
9 finish the hearing tonight instead of reconvening as had  
10 been on the calendar as an option.

11 I think at this point I defer to the Department of  
12 Corrections and its policies. If there is a need to have  
13 him transferred back up here, then I can entertain a motion  
14 to that affect and we can address it at that time.

15 I know you just made an oral motion, but I'm  
16 talking about a written one that would have time for the  
17 Department to weigh in on how their policies may or may not  
18 be impacted. Courts are to be reluctant to interfere in the  
19 policies of prison officials and I am.

20 Anything else?

21 MR. GOVAN: Your Honor, I just want to make sure  
22 it's clear for the record, I understand your Court's oral  
23 ruling, but since there was no actual motion to stay filed,  
24 we did not file a specific objection, so I just want to make  
25 clear for the record that we would be objecting to the

1 granting of a stay for a number of reasons. Your Honor  
2 mentioned that in this case you feel discovery and things of  
3 that nature are needed in this case, depositions, whatnot,  
4 examinations, we would contend, Your Honor, that that is a  
5 reason that weighs against the granting of a stay. If those  
6 things cannot be accomplished without granting a stay, that  
7 actually weighs in equity against the granting of a stay, it  
8 also contends there was unreasonable delay in this case.

9 And we would also --

10 THE COURT: You already made those arguments in  
11 terms of your laches arguments. I applied those also to my  
12 evaluation of the need for a stay.

13 And I will flesh that out for you, if you want me  
14 to now, we have talked about it off the record several times  
15 today. I thought y'all wanted to leave.

16 But I have considered that. And I have balanced  
17 the equities. And I understand the interest of the State in  
18 promptly carrying out its execution and its sentence. And I  
19 have committed that I am going to do my best to make sure  
20 that the stay is no longer than absolutely necessary.

21 But I am not going to make a decision that could  
22 subject Mr. Hamm to unnecessary tortuous, I think was the  
23 word Dr. Heath used, pain and suffering that could rise to a  
24 constitutional level, I think he's submitted sufficient  
25 evidence to create genuine issues in my mind that that is

1 indeed a significant likelihood.

2           And I don't see where a short stay, especially for  
3 a medical exam, creates greater harm to the State of Alabama  
4 than would going through with a lethal injection execution  
5 that could be extremely problematic given the inferences  
6 that I can draw from the medical records that this man may  
7 indeed have lymphatic cancer in portions of his body, other  
8 than in his head where he was treated with radiation, that  
9 could significantly adverse the ability to obtain a central  
10 venous line for injection.

11           And I think our Constitution and the protection of  
12 the constitutional rights of every person outweighs the  
13 concern for a minor delay in execution of this man who's  
14 been on death row for thirty years.

15           I can do a better job in writing, and when I'm not  
16 as tired as I am now, but I have considered and weighed the  
17 equities in this case and find that they weigh in favor of a  
18 stay.

19           And if there is anything else that you would want  
20 to say that you have not already said in the laches  
21 argument, if you want to file a motion to reconsider,  
22 addressing things you have not already said, I won't be  
23 ticked.

24           But if your motion only reiterates the things that  
25 we have already discussed today, it will be denied very

1 quickly.

2 Does that make sense?

3 MR. GOVAN: Yes, Your Honor.

4 THE COURT: I want to make sure I am open to  
5 anything that you have not already presented to me on that  
6 argument.

7 MR. GOVAN: Yes, Your Honor. And I was just -- I  
8 was solely not -- I understand Your Honor has already  
9 thought through this and in your order would spell out more  
10 so Your Honor's reasoning. I just wanted to make it clear  
11 for the record that we were objecting to it, make sure we  
12 were preserving any aspects and yes, there would be some  
13 things that we maybe specifically didn't address like,  
14 specifically here, like we don't believe that there's a  
15 substantial likelihood of success based on some of the  
16 testimony we heard today. But we can flesh that out, if  
17 need be, later.

18 THE COURT: Again, I didn't set out everything.  
19 But based upon the record that is in front of me at this  
20 time, and reviewing it in the light most favorable to the  
21 plaintiff in terms of the summary judgment and in terms of  
22 the standard that we are at where there has not been any  
23 discovery, I find that if the plaintiff is able to prove the  
24 things that he said, and we'll be able to figure that out  
25 pretty soon with a medical exam, that he does have a

1 substantial likelihood of success on the merits in my  
2 opinion.

3 But we have got to get past that medical exam  
4 before that can be determined in my opinion one way or the  
5 other emphatically.

6 Anything else?

7 MR. HARCOURT: No, Your Honor.

8 THE COURT: I'll get with Mrs. Sherbert and we'll  
9 look at my calendar and figure out when we can set a phone  
10 conference to discuss the timing and the strategy going  
11 forward as soon as we can do it. But it won't be next week.  
12 Believe me, I would rather be with y'all. Okay. Thank you  
13 very much.

14 I appreciate the way you have presented everything  
15 today and in writing and in submission and I hope that we  
16 can continue to work together in the same fashion going  
17 forward. Thank you.

**MEMORANDUM OPINION**

Doyle Hamm challenges the constitutionality of Alabama’s method of execution, not generally, but as applied to him. (Doc. 15 at 1–2). As the Supreme Court of the United States has repeatedly said, “because it is settled that capital punishment is constitutional, it necessarily follows that there must be a constitutional means of carrying it out.” *Glossip v. Gross*, 135 S. Ct. 2726, 2732 (2015) (quotation marks omitted). But the Eighth Amendment forbids cruel and unusual punishment, creating tension between imposing a constitutional death sentence and carrying out the death sentence in a constitutional manner.

In this country, the chosen method of execution has evolved as social mores have changed. *See Baze v. Rees*, 553 U.S. 35, 40–41 (2008) (plurality opinion) (“As is true with respect to each of [the thirty-five States that impose capital punishment] and the Federal Government, Kentucky has altered its method of execution over time to more humane means of

carrying out the sentence. That progress has led to the use of lethal injection by every jurisdiction that imposes the death penalty.”). Today, death penalty advocates view lethal injection, the most prevalent method of capital punishment, as a more humane means of execution than its predecessors. *See id.*

Mr. Hamm contends that, as applied to him, Alabama’s method of execution— intravenous lethal injection—crosses the line from a constitutional method of fulfilling his death sentence to one that would cause undue and exceptional pain and suffering. He asserts that his current medical condition, caused by years of intravenous drug use, hepatitis C, and untreated lymphoma, renders his veins severely compromised; he contends that he does not have peripheral veins suitable to handle the size of intravenous catheter required to properly administer the lethal drugs. If his current medical condition includes compromised peripheral veins, lymphoma untreated for three years, and lymphadenopathy, as he and his medical experts believe to be true, attempts to insert the intravenous catheter would subject him to unlimited and repeated needle sticks; the injection of fluid could “blow out” his veins with infiltration of drugs into the surrounding tissue; and efforts to place a central line could be hindered by enlarged lymph nodes creating a higher *risk* of puncturing a central artery—all resulting in severe and unnecessary pain.

To avoid such a gruesome scenario, Mr. Hamm suggests an alternative method of lethal injection: an “oral injection” of death-causing drug or drugs. He seeks not a total injunction prohibiting his execution, but an injunction of execution by intravenous injection.

Defendants, who control Mr. Hamm’s access to medical treatment and evaluation, argue that Mr. Hamm has not presented any medical *proof* that his condition has deteriorated as he

asserts. Further, they argue that he has not proven that his proposed alternative method of execution is appropriate or available. As a result, they seek summary judgment.

Too many unanswered questions in the current record preclude a determination of the issues before the court. The heart of this case centers on Mr. Hamm's current medical status, particularly the condition of his peripheral veins, lymphoma, and potential lymphadenopathy. Because Defendants control his access to medical care, Mr. Hamm cannot be faulted for being unable to present a definitive evaluation to the court. Without knowledge of his current medical condition, the court cannot answer the many questions raised by Mr. Hamm's request for an injunction or by Defendants' motion for summary judgment.

The looming February 22, 2018, execution date leaves insufficient time to resolve these unknowns. But Mr. Hamm has provided enough evidence to create genuine issues of material fact about his as-applied claim. As a result, based on the record as it currently exists, Mr. Hamm has shown a substantial likelihood of success on the merits, and the court finds that the execution date must be stayed pending an independent medical examination of Mr. Hamm.

After allowing testimony and argument at a January 31, 2018 hearing, the court announced its decisions: (1) to deny summary judgment as to Defendants' timeliness challenge of Mr. Hamm's as-applied claim because genuine issues of material fact exist about when his cause of action accrued; (2) to deny Defendants' motion for summary judgment as to the merits of Mr. Hamm's as-applied claim; (3) to deny as premature Defendants' motion for summary judgment as to the merits of Mr. Hamm's other Eighth Amendment claim; and (4) to grant a temporary and limited stay of execution. The court now memorializes those rulings in a written opinion and order.

First, the court WILL DENY Defendants' motion for summary judgment as to the timeliness of Mr. Hamm's as-applied claim. The court finds that genuine issues of material fact exist about whether and when Mr. Hamm's medical condition worsened to a degree that gave rise to his as-applied challenge to Alabama's method of execution, triggering Alabama's two-year statute of limitations. The court also finds that the equitable doctrine of laches does not bar Mr. Hamm's complaint because he reasonably sought relief in the Alabama Supreme Court before filing his federal lawsuit.

Second, the court WILL DENY Defendants' motion for summary judgment as to the merits of Mr. Hamm's as-applied claim because he has created genuine issues of material fact about whether Alabama's method of execution is sure or very likely to cause him needless suffering and whether a feasible, readily implemented alternative method of execution exists that would significantly reduce a substantial risk of severe pain.

Third, the court WILL DENY AS PREMATURE Defendants' motion for summary judgment as to the merits of Mr. Hamm's other Eighth Amendment claim because the parties have not yet had an opportunity to engage in discovery about that claim.

Fourth, the court RESERVES RULING on Mr. Hamm's request for a preliminary injunction enjoining Defendants from executing him by intravenous injection, because the record is too sparse for the court to decide whether, as applied to Mr. Hamm, execution by intravenous injection would violate his right to be free from cruel and unusual punishment. But the court WILL STAY the execution for the purpose of obtaining an independent medical examination and opinion concerning the current state of Mr. Hamm's lymphoma, the number and quality of peripheral venous access, and whether any lymphadenopathy would affect efforts to obtain

central line access. The results of that examination will determine whether the stay should be extended for discovery on other issues raised by Mr. Hamm's amended complaint.

## I. PROCEDURAL HISTORY

This matter is before the court on Plaintiff's request for a preliminary injunction (doc. 15 at 44) and Defendants' renewed motion for summary judgment (doc. 16).

In 1987, Mr. Hamm was convicted in Alabama of robbery-murder and sentenced to death. *See Hamm v. Comm'r, Ala. Dep't of Corr.*, 620 F. App'x 752 (11th Cir. 2015). In 1990, the Alabama Supreme Court affirmed his conviction and sentence, *Ex parte Hamm*, 564 So. 2d 469 (Ala. 1990), and the United States Supreme Court denied certiorari. *Hamm v. Alabama*, 498 U.S. 1008 (1990). After exhausting his state collateral attacks in 2005, Mr. Hamm sought federal habeas relief. *Hamm*, 620 F. App'x at 756–58. In 2013, this court denied him habeas relief, and in 2015, the Eleventh Circuit affirmed. *Id.* at 758–59. On October 3, 2016, the United States Supreme Court denied certiorari. *Hamm v. Allen*, 137 S. Ct. 39 (2016).

On June 23, 2017, the State moved the Alabama Supreme Court to set Mr. Hamm's execution date. (Doc. 12-1). On August 8, 2017, on the Alabama Supreme Court's order, Mr. Hamm filed an answer requesting that the court allow Dr. Mark Heath to examine Mr. Hamm before deciding the State's motion to set an execution date. (Doc. 12-2). Dr. Heath completed that examination on September 23, 2017, and on December 13, 2017, the Alabama Supreme Court entered an order setting Mr. Hamm's execution for February 22, 2018. (Doc. 15-1 at 2; Doc. 14-17). On the same day that the Alabama Supreme Court entered that order—December 13, 2017—Mr. Hamm filed his initial § 1983 complaint. (Doc. 1).

Because Mr. Hamm's complaint contained a request for preliminary injunctive relief, the court immediately set a hearing. (Doc. 3). Before that hearing, Defendants filed a motion to

dismiss or, in the alternative, for summary judgment on Mr. Hamm's complaint. (Doc. 12). The court construed the entire motion as one for summary judgment and notified Mr. Hamm of the need to submit evidence in opposition to that motion. (Doc. 13). Mr. Hamm filed a response *and* an amended complaint, which reiterated his as-applied challenge and raised an Eighth Amendment challenge to his treatment during his time on death row. (Doc. 15). Defendants renewed their motion for summary judgment, and the parties completed briefing and the submission of evidence on an expedited schedule. (Docs. 16, 17).

## II. BACKGROUND FACTS

### 1. Medical Terminology

Before discussing the disputed and undisputed facts, the court must set out some medical terms. Under Alabama's lethal injection protocol, lethal injection is performed by "peripheral venous access" or, if peripheral venous access is not possible, by "central line placement." Peripheral venous access requires insertion of a catheter into one of the peripheral veins in the arms, hands, legs, or feet. Central line placement is insertion of a catheter into the jugular vein in the neck, the subclavian vein near the clavicle, or the femoral vein in the groin. According to Dr. Heath, the anesthesiologist who testified on Mr. Hamm's behalf, to obtain a central line, the practitioner must apply local anesthesia; insert a small needle into the vein; thread a wire through the needle into the vein; withdraw the needle while leaving the wire in place; cut a small opening, large enough to allow the catheter to enter the body, in the patient's flesh near the entry place for the wire; thread the catheter along the wire and into the vein; withdraw the wire; and suture the skin closed over the catheter. In the absence of an emergency, the practitioner should use an ultrasound to monitor the placement of the needle, the wire, and the catheter.

Another set of important medical terms is lymphoma and lymphadenopathy. Lymphoma is a blood cancer, and lymphadenopathy is enlargement of lymph nodes. A number of things can cause lymphadenopathy, including lymphoma and “less common illnesses.” *Lymphadenopathy*, Taber’s Medical Dictionary Online, <https://www.tabers.com/tabersonline/view/Tabers-Dictionary/768963/all/lymphadenopathy?q=lymphadenopathy>; (Doc. 15-1 at 4). Dr. Heath attests that lymphoma is a progressive disease, meaning that a past diagnosis of lymphoma can indicate “significant involvement and enlargement of lymph nodes in other areas of [Mr. Hamm’s] body, including his neck, chest, and groin.” (Doc. 15-1 at 4). According to Dr. Heath’s testimony, lymphadenopathy can greatly complicate central line access because the largest clusters of lymph nodes are located around the jugular, femoral, and subclavian veins. Swelling of those lymph nodes can distort the tissues surrounding the veins, making accessing those veins more difficult.

## 2. Alabama’s Lethal Injection Protocol

Alabama’s confidential, sealed lethal injection protocol provides that, as soon as possible after arrival at Holman Correctional Facility, where all Alabama executions occur, a physician will make an assessment of the inmate’s vein structure. An IV team will also view the inmate’s veins before the execution. Aside from non-medical staff, two trained medical professionals, usually Emergency Medical Technicians (“EMTs”), and, as needed, one physician, are part of the IV team.

On the day of the execution, two IV lines will be placed in the inmate’s veins. If the IV team cannot access peripheral veins, medical personnel will use a central line to obtain intravenous access. After two team members check the IV lines, one leaves the execution chamber and gives the Warden a signal to proceed; one team member remains in the chamber at

the inmate's left side. The Warden administers the lethal injection solution from another room. The solution consists of midazolam hydrochloride, two other drugs, and saline, administered sequentially.

The lethal injection protocol describes the process by which the remaining IV team member—who is not one of the trained medical professionals—can check whether the inmate is conscious after the Warden has started administering the midazolam hydrochloride. But the protocol does not describe how long the IV team may attempt to obtain peripheral access, how many times the team may attempt peripheral venous access, how the team determines if peripheral access is unobtainable, or what sort of medical equipment or medical specialist is available in the event the team must attempt to obtain a central line.

### 3. Mr. Hamm's Medical History

No one disputes that Mr. Hamm has a long and complicated medical history, which includes intravenous drug use, hepatitis C, and a 2014 diagnosis of B-cell lymphoma with a tumor behind Mr. Hamm's left eye. And no one disputes that Mr. Hamm's history of intravenous drug use complicates the accessibility of his peripheral veins. Instead, the essential factual disputes in this case revolve around (1) whether, despite the undisputed inaccessibility of *many* peripheral veins, Mr. Hamm still has enough good quality peripheral veins for the State to execute him using the procedures described in its confidential lethal injection protocol; (2) when, if ever, Mr. Hamm's lymphoma went into remission; (3) whether Mr. Hamm is currently experiencing lymphadenopathy; and (4) when, if at all, the condition of Mr. Hamm's veins worsened to an extent to give rise to his as-applied challenge.

In April 2014, a doctor conducted a CT scan of Mr. Hamm's abdomen and found “[n]o pathologically enlarged lymph nodes.” (Doc. 14-4 at 18). But a May 2014 report from another

doctor reported “numerous abnormal lymph nodes” in Mr. Hamm’s chest. (Doc. 14-3 at 6). The physician noted, however, that “[t]here [were] no palpable nodes in the cervical, supraclavicular [above the clavicle], axillary [armpit], or inguinal [groin] areas.” (*Id.* at 7). The court notes that a lack of palpable lymph nodes does not prove a lack of lymphadenopathy; Dr. Heath testified that lymphadenopathy can occur internally in areas that a physician would not be able to feel by palpation.

Although physicians noted potential lymph node issues in those 2014 reports, Mr. Hamm never received any further medical examinations or treatment relating to those issues. (Doc. 19-1 at 1). And according to Dr. Charles Blanke, an oncologist who testified on Mr. Hamm’s behalf, “[b]ased on the medical consultations done to date, it is impossible to state with any degree of certainty whether or not [Mr. Hamm] has active lymphoma overall.” (*Id.* at 2).

Mr. Hamm, in an affidavit, stated that since March or April 2017, nurses at Donaldson Correctional Facility had been able to draw blood only by using a small butterfly needle on a vein in his right hand. (Doc. 14-6 at 1). He attests that they “have had problems drawing blood from there,” but it is the only vein from which they have had any success drawing blood. (*Id.* at 1–2). He states that in October and November 2017, nurses had unsuccessfully tried to draw blood from his hands, arms, and legs, “each time pricking [him] about 4 or 6 times.” (*Id.* at 2). By contrast, nurses from Donaldson attested that they were able to draw blood on October 3, 2017, on the second attempt; on November 7, 2017, on the third attempt; on November 14, 2017, on the first attempt; and on December 18, 2017, on the first attempt. (Doc. 12-6 at 2; Doc. 12-7 at 2). Nurses were unable to draw blood on October 31, 2017. (Doc. 12-6 at 2). Dr. Heath explains that drawing blood with a small butterfly needle is easier than obtaining intravenous access with a catheter, as a catheter is larger than a butterfly needle. (Doc. 14-5 at 2–3).

Difficulties obtaining access with a butterfly needle can indicate even more difficulty obtaining access with a catheter. (*Id.*).

On March 4, 2017, around the same time that Mr. Hamm noticed nurses having difficulty drawing blood, he also submitted a sick call request stating “need to see the doctor. I have lumps in my chest . . . .” (Doc. 14-4 at 12). On March 5, 2017, a nurse noted four “knots” on Mr. Hamm’s chest near his clavicle, armpits, and above his navel. (*Id.* at 11). Dr. Roy Roddam, a prison physician, filled out a “progress note” on March 7, 2017, stating that Mr. Hamm was complaining of “mildly tender” knots on his chest. (*Id.* at 10). The handwriting is difficult to read, but appears to say that Mr. Hamm had “subcutaneous nodules” below the right clavicle and chest, among other areas. (*Id.*). Dr. Roddam wrote: “These feel like lymph nodes but could be [illegible] as their location is against lymphadenopathy.” (*Id.*). Dr. Roddam noted the need for an X-ray and wrote “may need biopsy if continues to enlarge.” (*Id.*). The record before the court on the motion for summary judgment contains no information about any X-ray or follow-up.

Dr. Heath examined Mr. Hamm on September 23, 2017. (Doc. 15-1). The Donaldson Correctional Facility staff would not permit him to bring in his medical equipment, but he reports that “Mr. Hamm has extremely poor peripheral venous access.” (*Id.* at 3). He states that Mr. Hamm has no usable peripheral veins on his left arm and hand or either of his legs or feet. (*Id.*). On his right hand, he has one “small, tortuous vein . . . that is potentially accessible with a butterfly needle.” (*Id.*). Dr. Heath could not evaluate the accessibility of Mr. Hamm’s jugular, supraclavial, or femoral vein because he lacked medical equipment. (*Id.* at 4).

Prison physician Dr. Roddam attests that he conducted a medical examination of Mr. Hamm on January 2, 2018, and found “no evidence of lymphadenopathy in the cervical,

supraclavical, or axillary areas of Mr. Hamm's body." (Doc. 12-4 at 2). But Dr. Roddam's affidavit does not state whether he conducted any imaging tests, or merely palpated those areas of Mr. Hamm's body. Dr. Roddam also states that, in his opinion, "Mr. Hamm has two superficial veins in his right wrist that would be available for venous access." (*Id.*). Finally, and in contrast to almost every other medical professional who has examined Mr. Hamm, prison nurse Dennis Butler attests that Mr. Hamm has numerous peripheral veins suitable for peripheral intravenous access with a catheter. (Doc. 12-5 at 2).

#### 4. Proposed Alternative Method of Execution

Mr. Hamm proposes, as an alternative method of execution, "oral injection" of either: (1) 10 grams of secobarbital; or (2) "DDMP II," which is composed of 1 gram of diazepam, 50 milligrams of digoxin, 15 grams of morphine sulfate, and 2 grams of propranolol. (Doc. 15 at 23). The proposed alternative procedure follows the procedure used under Oregon's Death with Dignity Act. Dr. Blanke, who specializes in end-of-life care and medical-aid-in-dying, testified at the evidentiary hearing that each of these drugs is common and readily available for prescription in the United States.

Dr. Blanke described a method of administering the proposed alternative drugs: a nasogastric tube, which is a thin tube placed up the nasal cavity and down into the stomach. He testified that the drug or drug combination would be placed into a syringe, which would then be inserted into the end of the nasogastric tube. The person administering the drugs would compress the plunger of the syringe, pushing the fluid through the tube and directly into the stomach; *i.e.*, the drugs would be injected into the person through the nasogastric tube. He testified that patients lose consciousness within five minutes and die within twenty-five minutes.

### III. DISCUSSION

The court has before it Mr. Hamm's request for preliminary injunctive relief enjoining Defendants from executing him using intravenous injection. (Doc. 15 at 44). The court also has before it Defendants' motion for summary judgment on Mr. Hamm's amended complaint. (Doc. 16). The court will address Defendants' motion for summary judgment first, followed by Mr. Hamm's request for injunctive relief. Finally, the court will discuss the need for a brief stay of execution, even though Mr. Hamm has not requested one.

#### 1. Motion for Summary Judgment

Summary judgment allows a trial court to decide cases when no genuine issues of material fact are present and the moving party is entitled to judgment as a matter of law. *See* Fed. R. Civ. P. 56(a). When a district court reviews a motion for summary judgment it must determine two things: (1) whether any genuine issues of material fact exist; and if not, (2) whether the moving party is entitled to judgment as a matter of law. *Id.* In deciding a motion for summary judgment, the court "draw[s] all inferences and review[s] all evidence in the light most favorable to the non-moving party." *Hamilton v. Southland Christian Sch., Inc.*, 680 F.3d 1316, 1318 (11th Cir. 2012) (quotation marks omitted).

Mr. Hamm raises two claims in his amended complaint. (Doc. 15 at 21, 30). Defendants move for summary judgment, contending that the statute of limitations and the equitable doctrine of laches bar his amended complaint, and that Mr. Hamm has failed to create a genuine issue of material fact about a substantial risk of serious harm to him or about a known and available alternative method of execution. (Doc. 16; Doc. 12 at 26–35; Doc. 18 at 19–30).

The court notes that, because Mr. Hamm's execution is scheduled for February 22, 2018, it expedited briefing and submission of evidence. Neither party has had an opportunity to

conduct discovery. The court finds that, based on the record that currently exists, genuine issues of material fact exist about whether Mr. Hamm's amended complaint is timely filed and whether Alabama's method of execution is unconstitutional *as applied to him*. But the court notes that once Mr. Hamm has had an independent medical examination and/or once the parties have had an opportunity to conduct discovery, evidence may negate the genuine disputes of material fact that currently exist.

*a. Statute of Limitations*

Defendants contend that, under binding Eleventh Circuit precedent, Alabama's two-year statute of limitations bars Mr. Hamm's complaint. (Doc. 12 at 20). They contend that his claim accrued no later than July 2004, two years after Alabama adopted its current execution protocol. (*Id.* at 20–22). And they contend that Mr. Hamm's unique medical condition does not change that analysis because the factual allegations underlying his as-applied challenge have not changed in the last two years. (*Id.* at 22–24).

Because Mr. Hamm's as-applied claim challenges Alabama's method of execution, Alabama's two-year statute of limitations for personal injury actions applies to that claim. *Boyd v. Warden, Holman Corr. Facility*, 856 F.3d 853, 872 (11th Cir. 2017). Typically, an inmate's "method of execution claim accrues on the later of the date on which state review is complete, or the date on which the capital litigant becomes subject to a new or substantially changed execution protocol." *McNair v. Allen*, 515 F.3d 1168, 1174 (11th Cir. 2008). Under either of those triggering dates, Mr. Hamm's lawsuit would be untimely because the state courts completed review in 1990, (doc. 1 at 5–6), and Alabama enacted its current execution protocol on July 1, 2002. *See West v. Warden, Comm'r, Ala. Doc.*, 869 F.3d 1289, 1291 (11th Cir. 2017).

But Mr. Hamm does not raise a facial challenge to Alabama's method of execution. Instead, Mr. Hamm contends that, because of his unique medical condition, which arose years after the limitations period for a facial challenge expired, Alabama's method of execution is unconstitutional *as applied to him*. The Eleventh Circuit has indicated that the triggering date for an as-applied challenge is different from the triggering date for a facial challenge.

For example, in *Siebert v. Allen*, the plaintiff raised a facial challenge to Alabama's method of execution, and while his lawsuit was pending, he received a diagnosis of hepatitis C and pancreatic cancer. 506 F.3d 1047, 1048 (11th Cir. 2007). The plaintiff "immediately" filed an amended complaint adding an as-applied claim. *Id.* The district court dismissed the facial challenge based on the plaintiff's unreasonable delay in bringing the claim, but concluded that the as-applied claim was not barred by the statute of limitations or the doctrine of laches because the plaintiff filed it "as soon as he could have brought it." *Id.* at 1049. The Eleventh Circuit agreed. *See id.* at 1050 ("Given the timeliness of the filing of Siebert's 'as-applied' claim . . .").

And in *Gissendaner v. Commissioner, Georgia Department of Corrections*, the Eleventh Circuit affirmed the dismissal as untimely of a plaintiff's as-applied claims because "they rely on factual conditions that have not changed in the past twenty-four months." 779 F.3d 1275, 1281 (11th Cir. 2015). The only reason to count back twenty-four months from filing would be if specific factual conditions could trigger a new statute of limitations for an as-applied challenge. The court rejects Defendants' argument that Mr. Hamm's cause of action for his *as-applied* challenge expired in 2004, two years after Alabama last significantly changed its lethal injection protocol.

Mr. Hamm filed his complaint on December 13, 2017. So the question is whether Mr. Hamm's as-applied claim accrued within the preceding two years; *i.e.*, after December 13,

2015. Mr. Hamm contends that his peripheral vein access worsened in the spring of 2017, meaning that Defendants would have to resort to a central line to execute him; but his lymphadenopathy makes central line placement extremely risky. If that contention is true, then his as-applied challenge is timely.

The court finds that genuine disputes of material fact exist about whether and, if so, when Mr. Hamm's medical condition changed in a way that gave rise to his as-applied challenge. Mr. Hamm states in a sworn affidavit that nurses at Donaldson began having trouble even drawing blood—a process that is easier than inserting a catheter—starting in March or April 2017. (Doc. 14-6). That affidavit is sufficient to create a genuine issue of material fact about when medical professionals began having trouble gaining peripheral venous access.

Defendants contend that “Hamm provides no evidence, *outside of his self-serving affidavit*, to support” the assertion that his peripheral venous access began manifesting in 2017. (Doc. 18 at 6 n.1) (emphasis added). But as the *en banc* Eleventh Circuit reminded us a few days ago, “an affidavit which satisfies Rule 56 of the Federal Rules of Civil Procedure may create an issue of material fact and preclude summary judgment *even if it is self-serving and uncorroborated.*” *United States v. Stein*, slip op. 16-0914, at 2 (11th Cir. January 31, 2018) (*en banc*) (emphasis added); *see also Feliciano v. City of Miami Beach*, 707 F.3d 1244, 1253 (11th Cir. 2013) (“To be sure, Feliciano’s sworn statements are self-serving, but that alone does not permit us to disregard them at the summary judgment stage.”); *Price v. Time, Inc.*, 416 F.3d 1327, 1345 (11th Cir.) (“Courts routinely and properly deny summary judgment on the basis of a party’s sworn testimony even though it is self-serving.”), *modified on other grounds on denial of reh’g*, 425 F.3d 1292 (11th Cir. 2005).

Defendants argued at the hearing that the court should disregard Mr. Hamm's affidavit because it is a sham affidavit. "The Eleventh Circuit, in limited circumstances, allows a court to disregard an affidavit as a matter of law when, without explanation, it flatly contradicts his or her own prior deposition testimony for the transparent purpose of creating a genuine issue of fact where none existed previously." *Furcron v. Mail Centers Plus, LLC*, 843 F.3d 1295, 1306 (11th Cir. 2016). Defendants have not pointed to any prior deposition testimony from Mr. Hamm stating that his peripheral veins were inaccessible before 2017. And in any event, the court notes that Mr. Hamm underwent at least one MRI with contrast in 2014, indicating that medical professionals were able to insert a catheter at that time. (*See* Doc. 14-4 at 16). The court declines to find that Mr. Hamm's affidavit is a sham.

The court also notes that genuine disputes of material fact exist about how many of Mr. Hamm's peripheral veins are accessible for drawing blood. Dr. Heath says Mr. Hamm *might* have one vein; Dr. Roddam says Mr. Hamm has two; and Mr. Butler says Mr. Hamm has multiple accessible veins. But as Dr. Heath testified, veins that are accessible for drawing blood may not be accessible for inserting an intravenous catheter. Even if Mr. Hamm has peripheral veins that can support insertion of a butterfly needle for the purpose of drawing blood, the court finds a genuine dispute of material fact about whether peripheral venous access exists for the purpose of inserting an intravenous catheter.

Next, the court finds the existence of a genuine dispute of material fact about whether Mr. Hamm's lymphoma is active and whether he is currently experiencing lymphadenopathy. According to Dr. Heath, lymphoma is a progressive disease. According to the medical records available to the court on this motion for summary judgment, aside from the tumor in his head, Mr. Hamm has received no medical treatment for his lymphoma since 2015 at the latest. It is not

a stretch to infer that an untreated (and unmonitored) progressive disease could worsen over the course of time and finally manifest in later years.

The court finds that Mr. Hamm presented sufficient evidence to create a genuine dispute of material fact about whether the cumulative effect of his lymphoma, history of intravenous drug use, and untreated abnormal lymph nodes in his chest and abdomen resulted in worsened peripheral veins that manifested in spring 2017. The court WILL DENY Defendants' motion to dismiss Mr. Hamm's complaint as time-barred under the statute of limitations.

*b. Laches*

Defendants contend that, even if Mr. Hamm's complaint is timely under the statute of limitations, the court should dismiss it based on the doctrine of laches because Mr. Hamm unreasonably delayed filing his complaint, causing the State undue prejudice. (Doc. 12 at 9–10).

The court finds that, if Mr. Hamm's condition truly worsened in March 2017, a nine-month delay is not unreasonable in this case, especially in light of his efforts to exhaust his claim. Mr. Hamm contends that, based on principles of federalism and comity, he *could not* have filed his § 1983 complaint until after the Alabama Supreme Court rejected his as-applied claim. And the Alabama Supreme Court *requested* Mr. Hamm's response to the State's motion to set an execution date.

Indeed, the Supreme Court in *Nelson v. Campbell* stated that the Prison Litigation Reform Act, which applies to death sentenced inmates challenging the method of their execution, “requires that inmates exhaust available state administrative remedies before bringing a § 1983 action challenging the conditions of their confinement.” 541 U.S. 637, 650 (2004). But the court doubts that opposing the State's motion to set an execution date qualifies as exhausting *administrative* remedies under the Prison Litigation Reform Act, or that Mr. Hamm's federal

case was not ripe until the Alabama Supreme Court set the execution date. Nevertheless, the court finds that Mr. Hamm reasonably believed that he needed to make his argument to the Alabama Supreme Court before making it to this court.

In addition, the court notes that, despite the diligent efforts of Mr. Hamm's counsel to obtain Mr. Hamm's medical records from Defendants, they did not provide those medical records to him until June 2017. Nor did Defendants permit Dr. Heath to examine Mr. Hamm until September 2017. It was not unreasonable for Mr. Hamm to wait to file his complaint until he had some evidence to support his allegations. Because laches is an equitable doctrine, and the equities in this case play both ways, the court WILL DENY Defendants' motion to dismiss Mr. Hamm's complaint based on laches.

*c. Merits*

"The Eighth Amendment, made applicable to the States through the Fourteenth Amendment, prohibits the infliction of 'cruel and unusual punishments.'" *Glossip v. Gross*, 135 S. Ct. 2726, 2737 (2015). The Supreme Court has noted that "because it is settled that capital punishment is constitutional, it necessarily follows that there must be a constitutional means of carrying it out." *Id.* at 2732 (quotation marks omitted).

Alabama Code § 15-18-82.1 provides that "[a] death sentence shall be executed by lethal injection, unless the person sentenced to death affirmatively elects to be executed by electrocution." Ala. Code § 15-18-82.1(a). Mr. Hamm did not elect execution by electrocution within the time period required by the statute, so he has waived that method of execution. *See id.* § 15-18-82.1(b) (requiring the prisoner to elect execution by electrocution within 30 days after July 1, 2002); (Doc. 1 at 3–4). As a result, under Alabama law, the only currently lawful

method to execute Mr. Hamm is by “lethal injection.” The Alabama Code does not define “lethal injection.”

To prevail on an Eighth Amendment challenge to a State’s method of execution, a prisoner must demonstrate that “the method presents a risk that is ‘*sure or very likely* to cause serious illness and needless suffering, and give rise to sufficiently *imminent* dangers.’” *Glossip*, 135 S. Ct. at 2737 (quoting *Baze v. Rees*, 553 U.S. 35, 50 (2008) (plurality opinion) (some quotation marks omitted) (emphases in original). In addition, “prisoners must identify an alternative that is feasible, readily implemented, and in fact significantly reduce[s] a substantial risk of severe pain.” *Id.* (quoting *Baze*, 553 U.S. at 52) (second alteration in original); *see also Gissendaner v. Comm’r, Ga. Dep’t of Corr.*, 803 F.3d 565, 569 (11th Cir. 2015) (applying the readily-available alternative requirement to an as-applied challenge of a State’s method of execution). The proposed alternative method “must significantly reduce a substantial risk of severe pain.” *Arthur v. Comm’r, Ala. Dep’t of Corr.*, 840 F.3d 1268, 1299 (11th Cir. 2016).

*Glossip*’s ‘known and available’ alternative test requires that a petitioner must prove that (1) the State actually has access to the alternative; (2) the State is able to carry out the alternative method of execution relatively easily and reasonably quickly; and (3) the requested alternative would in fact significantly reduce a substantial risk of severe pain relative to the State’s intended method of execution.

*Id.* at 1299 (quotation marks and alteration omitted). The Eleventh Circuit has interpreted the “known and available” prong of *Glossip*’s test to require that the plaintiff first show that the State’s statutorily authorized method of execution is unconstitutional before proposing any other method that is not statutorily authorized. *Id.* at 1316–17; *see also Boyd*, 856 F.3d 853, 867 (11th Cir. 2017).

A genuine dispute of material fact exists about whether Mr. Hamm has adequate peripheral venous access to allow Defendants to execute him without resorting to a central line.

And a genuine dispute of material fact exists about whether Mr. Hamm has lymphadenopathy in areas of his body that would make a central line placement extremely dangerous. As a result, the court finds that a genuine dispute of material fact exists about whether executing Mr. Hamm using the intravenous injection method described in Alabama's lethal injection protocol "presents a risk that is 'sure or very likely to cause serious illness and needless suffering, and give rise to sufficiently imminent dangers.'" *Glossip*, 135 S. Ct. at 2737. If his medical condition is as he alleges, then his execution would be unnecessarily painful and dangerous.

Mr. Hamm has offered two alternative methods of execution: (1) 10 grams of secobarbital; or (2) "DDMP II," which is composed of 1 gram of diazepam, 50 milligrams of digoxin, 15 grams of morphine sulfate, and 2 grams of propranolol. (Doc. 15 at 23). Dr. Blanke, a physician who specializes in medical-aid-in-dying, attests that he has used those methods for patients in Oregon. (Doc. 15-3). He attests that they cause death in "more than 99% of cases" and that complications are "extremely rare." (*Id.* at 1-2).

The court finds that, if Mr. Hamm can prove the inaccessibility of his peripheral and central veins, his proposed alternative "significantly reduce[s] a substantial risk of severe pain." *Arthur*, 840 F.3d at 1299. He has offered at least some evidence that, *as applied to him*, Alabama's method of execution may be ineffective and painful, while his proposed alternative is very likely to be effective and painless.

Defendants contend that Mr. Hamm's alternative is not feasible or readily implemented because Mr. Hamm would have to drink either of the proposed drug combinations, so they cannot be considered "lethal injections." *See* Ala. Code § 15-18-82.1(a) (requiring execution by "lethal injection").

As Dr. Blanke testified and as Taber’s Medical Dictionary states, the medical definition of “injection” does not require a needle piercing the body; it requires only “[t]he forcing of a fluid into a vessel, tissue, *or cavity*.” Injection, Taber’s Medical Dictionary Online, <https://www.tabers.com/tabersonline/view/Tabers-Dictionary/757723/all/injection?q=injection> (emphasis added). Non-medical dictionaries appear to agree. *See* Inject, Merriam-Webster’s Dictionary, <https://www.merriam-webster.com/dictionary/injecting> (“[T]o force a fluid into”); Inject, Oxford English Dictionary, <http://www.oed.com/view/Entry/96079?redirectedFrom=inject#eid> (“To drive or force (a fluid, etc.) in a passage or cavity, as by means of a syringe, or by some impulsive power; said esp. of the introduction of medicines or other preparations into the cavities or tissues of the body.”).

The court finds that administration of the proposed alternative drugs through a nasogastric tube would comply with Alabama’s statute requiring execution by “lethal injection” because it would involve forcing the liquid into Mr. Hamm’s body. But the court also finds that, even if Alabama’s statute requiring “lethal injection” required a needle piercing the inmate’s skin, Mr. Hamm has presented sufficient evidence to create a genuine issue of material fact about whether that type of “lethal injection” would be unconstitutional *as applied to him*. As a result, even if administration of the drugs by nasogastric tube is not statutorily allowed under Alabama law, the court finds that, *at this stage*, Mr. Hamm has presented sufficient evidence to defeat summary judgment. The court WILL DENY summary judgment as to Mr. Hamm’s as-applied claim.

The court notes that Mr. Hamm raised an Eighth Amendment deliberate indifference claim in his amended complaint, which he filed during the expedited briefing schedule on his initial complaint. The court finds that ruling on Defendants’ motion as to Mr. Hamm’s second

claim would be premature because the parties have not had an adequate opportunity to conduct discovery. *See WSB-TV v. Lee*, 842 F.2d 1266, 1269 (11th Cir. 1988) (“[S]ummary judgment may only be decided upon an adequate record.”). The court WILL DENY AS PREMATURE the motion for summary judgment on the merits of Mr. Hamm’s second Eighth Amendment claim.

## 2. Request for Injunctive Relief

Mr. Hamm has not moved this court to stay his execution, but he does seek an injunction enjoining Defendants from executing him by intravenous injection. (Doc. 15 at 44). But “[t]he standard for granting a temporary restraining order or a stay of execution is the same.” *Gissendaner*, 779 F.3d at 1280. The movant must show that “(1) he has a substantial likelihood of success on the merits; (2) he will suffer irreparable injury unless the injunction issues; (3) the stay would not substantially harm the other litigant; and (4) if issued, the injunction would not be adverse to the public interest.” *Valle v. Singer*, 655 F.3d 1223, 1225 (11th Cir. 2011). In addition, “[a] court considering a stay must also apply ‘a strong equitable presumption against the grant of a stay where a claim could have been brought at such a time as to allow consideration of the merits without requiring entry of a stay.’” *Hill v. McDonough*, 547 U.S. 573, 584 (2006) (quoting *Nelson*, 541 U.S. at 650).

The court reserves ruling on Mr. Hamm’s request for preliminary injunctive relief because the court lacks sufficient information to determine whether execution by intravenous injection would violate Mr. Hamm’s right to be free of cruel and unusual punishment. At this stage, Mr. Hamm has presented sufficient evidence to defeat Defendants’ motion for summary judgment, but he has not presented evidence *establishing* that he lacks the number and quality of peripheral veins needed for Defendants to execute him under Alabama’s lethal injection

protocol. Nor has he presented evidence *establishing* that he is experiencing lymphadenopathy, such that Defendants could not safely resort to the protocol's alternative method of execution using a central line. The court notes that Defendants control Mr. Hamm's ability to obtain such information *and* the medical examinations that will be necessary for Mr. Hamm to prove those facts (or for Defendants to disprove them).

As a result, although the court declines to enter a preliminary injunction at this time, the court will enter a stay of execution so that an independent medical examiner can be appointed to examine Mr. Hamm and report to the court about his current medical condition. The court acknowledges that Mr. Hamm has not requested a stay of execution, but the court *sua sponte* finds that a stay is necessary. *See Grayson v. Allen*, 499 F. Supp. 2d 1228, 1234 (M.D. Ala. 2007), *affirmed by* 491 F.3d 1318 (11th Cir. 2007) (“‘Consideration of the merits’ means more than a hurried hearing by a harried judge and counsel. As the Eleventh Circuit intimated in *Jones [v. Allen]*, 485 F.3d 635, 640 n.2 (11th Cir. 2007)], consideration of the merits in this circuit means full adjudication, entailing a sufficient period to conduct discovery, depose experts, and litigate the issue on the merits, including any appeals. . . . [I]f full adjudication is not possible on a fast-track schedule here, then the issue of a stay of execution arises . . .”).

The court has considered the equities and has concluded that, under the information currently available to Mr. Hamm and to the court, he has shown a substantial likelihood of success on the merits, a risk that he will suffer irreparable injury absent a stay, no substantial risk of harm to Defendants, and that the stay would not be adverse to the public interest.

As discussed above, Mr. Hamm has created genuine issues of material fact about whether Alabama's method of execution is unconstitutional *as applied to him* in light of his unique medical conditions. If, with the benefit of discovery, he can substantiate the inferences the court

was required to draw in his favor at the summary judgment stage, he would prevail on his as-applied claim. At this stage, Mr. Hamm has shown a substantial likelihood of success on the merits. The risk that Mr. Hamm will suffer irreparable injury absent a stay is self-evident, and the court will not dwell on it.

The court will, however, briefly dwell on the risk of harm to Defendants. The State of Alabama has a legitimate interest in carrying out the execution of Mr. Hamm's sentence. The family of Mr. Hamm's victim also has a significant interest in the execution of Mr. Hamm's sentence. The court is mindful of those important considerations. But the court notes that both of those interests will be satisfied; Mr. Hamm will be executed, either by intravenous injection or by "oral injection."

The court has also considered whether a stay would be adverse to the public interest. The court finds that, in this case, a stay could not be adverse to the public interest. The public interest requires *constitutional* punishments. An execution that is carried out in a cruel and unusual manner is decidedly adverse to the public interest.

Finally, the court has considered the "strong equitable presumption against the grant of a stay where a claim could have been brought at such a time as to allow consideration of the merits without requiring entry of a stay." *Hill*, 547 U.S. at 584. As discussed above, at this stage, and on the record currently before the court, the court finds that Mr. Hamm brought his complaint in a timely manner. If he brought it later than the court would have preferred, it was not due to lack of diligence or in a bad faith attempt to delay his execution.

As soon as possible after the entry of this opinion and order, the court will appoint an independent medical examiner who will examine Mr. Hamm and report the medical findings back to the court. The medical examiner will evaluate the accessibility of Mr. Hamm's

peripheral veins as well as the current status of his lymphoma and whether he is currently experiencing lymphadenopathy, or any medical condition that would interfere with Mr. Hamm's execution by lethal intravenous injection. Once the court has received the medical examiner's report, the court will reevaluate the necessity for a stay or a preliminary injunction.

#### **IV. CONCLUSION**

The court WILL DENY Defendants' motion for summary judgment on timeliness grounds. The court WILL DENY Defendants' motion for summary judgment on the merits of Mr. Hamm's as-applied claim. The court WILL DENY AS PREMATURE Defendants' motion for summary judgment on the merits of Mr. Hamm's other Eighth Amendment claim. The court RESERVES RULING on Mr. Hamm's request for a preliminary injunction. The court WILL STAY Mr. Hamm's execution.

**DONE** and **ORDERED** this 6th day of February, 2018.

**KARON OWEN BOWDRE**  
CHIEF UNITED STATES DISTRICT JUDGE
